That's one really nice thing about Sirius Satellite. They have the
BBC World Service News 24/7, along with the CBC on World Radio Network
on PRI which carries ''As It Happens'' live.

Once you get the International News habit, you realize that the masses
are being brainwashed by the US commercial media. No other word for
it.

Actually I am not new to usenet. And I made the invalid assumption that those reading would know to only create a new thread when the actual subject of the discussion changed. Most of the violaters here start a new thread everytime they reply to a post. *That* is what I am complaining about.

Thanks.

Looking at the schematic, it's got a ceramic/xtal/mechanical(?) filter
for the first IF, so you can't really screw up the tracking by shifting
the IF like you could with an all LC tuned IF.

What I'd look for first is to see if the dial pointers haven't shifted
on the cord(s).

The upper atmosphere was affected. Low frequency communications was
supposed to be affected by this event but I could not find any further
descriptions.

Source record: 8587

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed God to save you. Welcome to the family of God.

If you decide to wait till later you may die before you get another chance to be saved because none of us knows exactly when we will die.

This means that if we die without trusting in Jesus Christ as our Lord and Saviour we will be forever separated from the love of God in a place called Hell. This place called Hell is a place of eternal torment, suffering, pain and agony for all those who reject Jesus Christ.

Choose Jesus Christ today and you will have peace in your life now and forever.

Have a great day!

Radio Guangdong provided us with a special CD called "Sentimental String". This is a disc for pure music enjoyment with the violin as the key instrument and multi-accompaniment of various human sounds. With its gentle, smooth and stretching style, the string expresses affectionate feeling and communicates with audients by humanized musical language. If you want to be part of that beautiful experience, you will have to answer a simple question:

According to Chinese calendar, which animal represents 2005? (Answer: Chinese Chicken)

In addition to our main prize, you will also receive some other exciting merchandise from our partner broadcasters!

You will easily give us the right answer if you read carefully our newsletter and listen to Radio Guangdong programme this weekend on WRN (http://www.wrn.org/).

So, we are looking forward to your answers which you can send until Thursday, February 24 to mail@wrn.org. Please put "WRN English Newsletter" into the subject line, and don't forget your name and address.

Grundig S350 on sale at sportsmansguide.com
$69.97 + shipping (which I didn't check for cost)
If your entire purchase is $99 or more you can get
$10 off by using this Coupon Code: SPG1335
There are errors in the radio's description...
like "digital tuning" (it has a digital readout but is analog tuned)
and major broadcasters like Germany targeting North America.
I've purchased there once before and got a great set of binocs.
But haven't bought any electronics from them.

Kids Say the Darndest, Most Stalinist Things
By Bill Maher
Bill Maher is the host of HBO's "Real Time With Bill Maher."

February 18, 2005

A new survey found that a majority of high schoolers think newspapers should not be allowed to publish without government approval. And almost one in five said that Americans should be prohibited from expressing unpopular opinions.

Lemme tell you little darlings something: This is my livelihood you're messing with, so either learn the Bill of Rights or you don't deserve Social Security.

Now, to those of you who think I'm overreacting: Yes, I understand that when you're in high school you're still very young and that no one really cares what kids say anyway ï¿½ it's not like priests are dating them for their brains.

But the younger generation is supposed to rage against the machine, not for it; they're supposed to question authority, not question those who question authority.

And what's so frightening is that we're seeing the beginnings of the first post-9/11 generation ï¿½ the kids who first became aware of the news under an "Americans need to watch what they say" administration, the kids who've been told that dissent is un-American and therefore justifiably punished by a fine, imprisonment ï¿½ or the loss of your show on ABC.

President Bush once asked, "Is our children learning?" No ï¿½ they isn't. A more appropriate question might be, "Is our teachers teaching?" In four years, you can teach a gorilla sign language. Is it too much to ask that in the same amount of time a kid be taught what those crazy hippies who founded this country had in mind?

I know the Morals & Values folks want us to take time out of the school day for prayer and the Ten Commandments and abstinence training and at least two theories of evolution ï¿½ the one agreed upon by every scientist in the world and the one that involves naked ladies and snakes ï¿½ but, lest we forget, last month the people of Iraq risked death and danger to send a simple, inspiring message: America, get out of our country. But also, we want the freedoms you take for granted.

Now, I didn't mind being on the losing side of the last election. But as a loser, I guess I have some "unpopular" opinions ï¿½ and I'd like to keep them. I'd even like to continue to say them right out loud on TV, because if I just get up there every Friday night and spout the Bush administration's approved talking points, that's not freedom or entertainment. It's Fox News.

Didn't I read somewhere about gravity waves travelling a little
faster than light?

I'm just thinking about those big geological events on 25 and 26
December.

Ah, yes. <http://physics.about.com/cs/gravity/a/speedofgravity.htm>

1.06 c.

Well, that tears the idea of that association, as the associated
gravity wave would have passed through some 2,830 years ago.

Ventura county is experiencing similar weather to LA county with an abundance of rain, flooding and mud slide alerts with more on the way this weekend. Last two days a little over 2 inches with 4 inches in places like Ojai. At least we have not have any tornados like San Diego has had today.

We have had very rare thunder storms so the antennas were disconnected last night.

I'm about 100 yards from the beach and the previous storms had water halfway up the driveway due to some plugged storm drains but these last rains were no problem because they were cleared this time around.

He's being a bit misleading, but not untruthful when you read his text.
The 2002 and the 7600d were the same, the 2003 came out a bit later but I
don't know if it was any different from the 2002.
Although they're good radios, they are not in the same catagory as the 2010.
For one thing, they're 1/4 the size.

As far as I'm concerned, the SW7600 series is the direct descendent of the
2002/3; same size, same general features.

If we ever go to war with China, then your comparison will be valid.
Otherwise, it's not trading with the enemy, and therefore is not an
endorsement of a regime hostile to the US. Many US companies did
business with Nazi Germany before war was declared in 1941, and it was
not illegal nor an endorsement of Nazi policies or the Nazi regime's
existence. It was just business. Capitalists do business with everybody
as long as they have money, unless their government forbids them from
doing so with a certain country.

It will probably be just under 300 dollars.....I know, quite a bit of money, but it will be the best ever made. I am working on the enclosure design right now. I still have to work out the mechanicals for the active antenna. If any of you ever get in the Chicago area, give me a shout and I can demonstrate the engineering unit for you.
I really did want to make a 150 dollar version and do a fancy version later on.....the boss has other ideas.

| That's one really nice thing about Sirius Satellite. They have the
| BBC World Service News 24/7, along with the CBC on World Radio Network
| on PRI which carries ''As It Happens'' live.

Actually, a relatively insignificant correction: As It Happens as cleared by PRI
on Sirius 108 is already 1-1/2 hours later than when it aired, live, to the
Maritimes. You can get As It Happens on the Atlantic zone feed at
www.cbc.ca/audio.html, starting at 5:30pm ET. Further, PRI only clears the
first hour of AIH. AIH is well aware of what airs in the U-S, and, while I
wouldn't say it's deliberate, that last segment has a certain status, as such
it's quite a treat to listen to the last 30 minutes, using whatever other means
you might have. The most recent piece I heard in that last segment was that the
Pentagon had, a number of years ago, commissioned some research to see if Viagra
could be used to create a "gay bomb", whichwould be used on the enemy to so
thouroughly distract them with the rapture of coitus with others in their
platoon. So you can see, the folks who run the Pentagon really are homophobic.
You'll find it in the last 6 minutes of this archive
(http://cbc.ca/asithappens/media/dailyshow/2005-01-14-aih3.ram) if you're
interested.

| Once you get the International News habit, you realize that the masses
| are being brainwashed by the US commercial media. No other word for
| it.

Long convinced of that, here. I don't take any of my news anymore unless I get
it "vetted" by seeing a similar report from outside the country. We're really
in trouble when (and not to make it seem that I'm too paranoid, I should
probably amend that to "if") filters go up to prohibit the masses from listening
to outside sources. It's already been shown that the northern border states
are, by virtue of their exposure to Canadian media outlets, better informed and
more tolerant than those in the central and southern U-S. Not that it's a

primary reason, but the effects are certainly measureable. You have to wonder, though, how it can be that people who listen to shortwave (as the cross-post'ed newsgroup suggests...I'm looking at alt.radio.broadcast myself) don't get a wiff of what's happening outside their own little worlds, where the U-S is best, because they live in it.

It stopped raining 15 minutes ago but the bottom is about to fall out again.
They say we are going to have snow in the mountains behind me tonight down
to 5,000 ft.
I've been home from Monday night and we got a lot of yard work done but
is was between showers. Today I have stayed in with the radios, not a lot on
SW but the scanner has been very active.
I think I am going to rewrite my scanner program for both north and
south. I would like to add a lot of MilAir. That's what rainy days are for.

Source record: 8477

Wrapping the antenna wire back on itself as you do with "Frankenstein" or forming the G5RV into a quasi-rectangle is liable to result in an antenna that performs no better than a single wire as long as the maximum dimension, especially in directions in the plane of the shape and perpendicular to the longest side. However, I have heard people extol the virtues of a bedspring as an antenna - an extreme example of winding on itself. Of course, the more wrapping about you do, the more the wire approaches a solid, the limiting condition. Looking at Frankenstein, I'm reminded of a fat dipole, something like the "butterfly" antenna element frequently used at UHF. If you connect the free end and all the criss-crosses to the feed point, it certainly would be. With an overall length of 82 ft per the diagram, it would probably have a major lobe pointing straight up around 6 MHz. Height above ground will control the gain at lower elevation angles while the slight inverted Vee shape will broaden the lobe towards the narrow ends. At higher frequencies, the major lobe will divide into smaller lobes at lower elevations. The fatness factor will moderate the impedance range of the antenna around its 6 MHz resonant frequency.

I rather doubt that either your G5RV or the Frankenstein are great DX antennas, the way they are laid out. Both are liable to favour short to medium distances below 10MHz and are unlikely to provide the necessary low elevation angle sensitivity for really long DX in all desired directions at any frequency. I think you would be better off with less wire, laid out straight to take advantage of directional properties. Three mutually orthogonal antennas with a switch would be great. Attach a vertical antenna, say a CB whip or longer, to your chimney, as high as possible, for one. Run two independent dipoles in a cross pattern, even an X like you have would be a good compromise, from the chimney. Then you can switch among them for best reception - often one will stand out above the others because of direction, polarisation, frequency, and arrival angle of the incoming signal will best match one antenna.

Regards,
Tom

I shudder to think what the US will be like with them in power, 30 or so years from now. I suppose that Americans will have an approved list of conversation topics, with an all seeing nationwide surveillance system monitoring for compliance. One slip of the tongue, and you disappear. Or else we will all have a computer chip implanted in our brains, monitoring our thoughts constantly and continuously reporting back to the secret police. One unapproved thought from you, and boy, you're in trouble-with a few keystrokes or a spoken command, the secret police command your brain and heart to shut down, and you suddenly keel over dead while working the checkout counter at Wal Mart (the only remaining employer). Or it could be the reverse-the computer chip is in control of the wetware, and feeds us a continuous stream of government approved thoughts and feelings. The human brain will be used only for controlling body function, actual thinking will be done by the computer chip which will be directly connected to the Ministry of Truth. Imagine the possibilities! No more terrible twos, no more teenage rebellion, no more bitching about how bad your job is. You will only think government approved thoughts, only talk government approved topics of conversation, they will decide when and what you feel.

Source record: 8486

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed God to save you. Welcome to the family of God.

If you decide to wait till later you may die before you get another chance to be saved because none of us knows exactly when we will die.

This means that if we die without trusting in Jesus Christ as our Lord and Saviour we will be forever separated from the love of God in a place called Hell. This place called Hell is a place of eternal torment, suffering, pain and agony for all those who reject Jesus Christ.

Choose Jesus Christ today and you will have peace in your life now and forever.

Have a great day!

Actually, it was posted yesterday as a 1-5 day forecast and includes Earthquake, Volcanic or Storm Activity.

http://standeyo.com/Reports/041222.EQ.warning/050218.Deyo.EQs.html

If you'll scroll down to the two maps at the bottom both indicate a bright blue adjacent to a bright yellow just about the center of the map. The colors indicate temperatures with the blues and yellows being extremes from the norm.

There are actually three that could affect America. LA area, the one referenced above and one on the NW of South America where South and Central America join.

Be sure to read his caveat. As much as 30% error because of clouds and false signals from buoys.

> cuhulin

Your Grundig and Telefunken were probably made in the 50s, especially if they have tubes. Yes, those were the world's best radios in their day. Many American tube radios of the period had cheap plastic cabinets and tinny sound, and after 1955 or so Americans started phasing out tube radio production in favor of transistor radios, so tube radios got even worse in America as design quickly shifted to transistor portables and transistorized "hi fi" stereo equipment. The Europeans (Dutch and British as well as Germans) kept making quality tube table radios for a while after 1955, and when they shifted to transistors those had excellent quality and sound as well, unlike the cheap plastic four transistor shirtpocket portables that were being sold in America. I have a British transistor portable from about 1970 that I bought off ebay.uk, and it's made in Britain (unlike stuff sold in America which was made in Japan, Hong Kong, Taiwan and other Asian nations) and has very good sound quality despite being an off brand the name of which I can't remember at the moment. It also has REAL teakwood endpieces. I've always wanted a German transistor portable from the same period, but I don't

speak German (necessary for corresponding with Germans on ebay.de) and the weak dollar puts buying one out of reach. IMO the Americans haven't made a decent radio in 60+ years-I have a 1939 black dial Zenith that is VERY beautiful and has excellent sound, with bass, altobass, and treble controls. It's definitely in the same league as the German tube radios of the 50s. OTOH, I have a 1965 Arvin tube table radio that is made of cheap plastic, has a circuit board that the tubes plug into, and sounds like an American transistor portable of the same era. How the mighty fell!

> Hey Honus,
> Your talking to a Marine, some ones going to pinch your head off and
put
> it where the sun don't shine.

I was speaking to Al Arduengo on a finer point of Usenet etiquette. I also brought up cuhulin. I'm not familiar with Arduengo's military background, if he has one. I'm familiar with cuhulin's, though...and he was in the Army IIRC. So I can only assume that you think I'm addressing you, although I'm not sure why. I haven't addressed you in this thread. As a matter of fact, I may have never addressed you at all, ever. So, if you're the Marine in question, let me assure you that I wasn't speaking to you. Besides that, nothing in my post could be considered critical of you in any way, since you never came up. How you got yourself involved in this I don't know. Am I'm mistaken about cuhulin, and he was in fact in the Corps? As for someone pinching my head off, keep your empty threats to yourself. The last thing that impresses me is some one making threats from behind his keyboard. Does that apply to you? I don't know...that's for you to decide.

> Don't forget.

Don't forget what?

> Burr
>
> PS: Use your real name, if your a man.

Come threaten me to my face, if you're a man.

See how easy that was? Hollow threats impress no one. I could post using the name Burr Patterson and you'd have no way of knowing if it was true or not. Anyone on the net can call themselves whatever they want to. Does it bother you that I don't use my real name? Great! That's one of the reasons that I don't do it. Not only that, Honus is a real surname. If I hadn't told you that Honus wasn't my name, you'd just look like an ass for accusing me of using a nym because I could easily claim (and "prove") that it -was- my real name. (www.whitepages.com) It's all kind of funny, coming from a guy named Burr. Until someone that I trust about vouches for you, or until I investigate it for myself (which I have no plans on doing) I've no assurance that that's your real name. I'm sure it is, but it doesn't matter whether it is or not. I'm not going to come looking for you. I'm not going to call you at home. I'm not going to send you a mail bomb. Were you planning on coming looking for me? I'm sure that's not the case. So get over it. It means -nothing-, and I'm not about to start using my real name because you

want me to, or because you think less of me since I don't.

Oh, wait...was that use your real name directed at cuhulin, and not me? Or one of the other guys here that don't use their real names? No...I didn't think so.

> yet. I'll keep you posted!

Alright...I've reposted the old pages, just for you. (Mostly.) They weren't the best; I was teaching myself html, and that was a fun way to do it. Some of the text is pretty rough too...in more ways than one. Don't go there if you're thin-skinned. I'm having it professionally redone by the company that registered the domain name for me. They're also providing hosting. They're really good, and I'm looking forward to the final product. Problem is, I have to tell them what I want it to look like, and I'm drawing a -total-blank. That's also the condition of the check that I haven't sent them yet, for the design. <gbg> Just kidding...they'll get them both at the same time. Anyway, I've disabled the guestbook and send me e-mail functions. The section that you're specifically looking for is called "Tomato Allah". It has some fish with the script for Allah on their sides. The rest of it is worth a look too, though. Burr might especially get a kick out of the section on how I got stuck with this silly nym. ;) Just remember...this is the rough draft. <gbg> Don't judge me too harshly.

Is AIH on RCI shortwave? My internet connection isn't all that great...

The "gay bomb" idea is too funny, even if it is homophobic. Imagine a
drug that can be sprayed on an enemy, and suddenly the attacked feel an
overwhelming urge to assfuck each other, and they do so until the
assfuck-free American troops rush in and force them to surrender in less
time than it takes for them to pull their cocks out of each other's

butts. Of course, the drug would work both ways, and spraying it on
American troops would produce an even more extreme result. Now imagine
it sprayed by terrorists from a crop duster over San Francisco... :)

The guys at the Pentagon have some really weird ideas.

>

I have no idea. I'm reading from the shortwave group, and I can say for
myself that I TRY to listen to the BBC every night-that is when local
interference isn't playing havoc with the reception. I also like
listening to Radio Havana Cuba-they're not so strident in their
anti-American rhetoric anymore, and their perspective is truly unique.
For example, the latest prisoner abuse scandal that was reported by
America's ABC-TV as simply being "guns pointed at the heads of
detainees" was reported by the Cubans to involve quite a bit more,
including physical abuse (punching and kicking, but no sexual stuff this
time). Who's right? Who knows? As for the Canadians, The World At Six
comes on at 5 pm my local time, and I choose to watch the local news
instead (gotta get the weather report). But As It Happens is earlier,
although I'll probably miss that too since my upcoming new job will
likely require me to work early afternoons.

I figure that the majority of shortwave listeners in the US listen to
DOMESTIC shortwave, which is why rec.radio.shortwave is so full of
loonies.

PS: Seems your idea wasn't that far off the mark after all:
http://www.universal-radio.com/catalog/commrxvr/0014.html
That thing converts the whole 0-30 MHz range to digital with a sample rate of 66.67 MHz and a 14 bit resolution (dynamic range ~84 dB). You can then grab approx. 160 kHz wide pieces from the spectrum and send them to the PC for analysis (including demodulation in whatever mode) via USB. Spectrum analysis is the primary target application for the thing, which sounds reasonable since the dynamic range wouldn't be suitable for a DX rig. I guess things would become yet more interesting with a USB 2.0 or Firewire interface, which would allow up to 20 times wider spectral windows.

I assume that in several years it'll be possible to sample the whole 0-30 MHz range with 16, later with 18 and yet later with 20 bits, at which point a full-featured communications receiver covering signals from .1 ï¿½V to 100 mV should be possible. Distortion, however, will probably be a matter for itself. I bet the strong signal handling of good pro rigs will not be reached by direct-A/D based receivers any time soon. But interesting niche solutions they are for sure...

I heard on the news tonight that so californica had 2 twisters.
I bet that is an odd happening.
We get them every spring here in Kentucky and Ihate the
damn things.
Hope neither of you were close,and that you all don't get
covered by mudslides.
The weather can suck at times.
We are supossed to have a minor ice storm tonight.
The last one we had left my parents with out power for 7 days.
Terry

Two words: global warming. I heard on the BBC that scientists have proved that the warming of the earth is due to human meddling. I've also heard that the earth could warm up to 11 degrees over the next 50-100 years. The ice sheet over the Arctic has ALREADY lost an area equal to the size of Texas AND Arizona. The Sacramento River delta in California-the source for most of the agricultural water in the central valley, and of SoCal's drinking water-is going to change from fresh water to salt water over the next few decades, making it unusable for any human use. Hang on folks, there's more coming...

Source record: 8612

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed God to save you. Welcome to the family of God.

If you decide to wait till later you may die before you get another chance to be saved because none of us knows exactly when we will die.

This means that if we die without trusting in Jesus Christ as our Lord and Saviour we will be forever separated from the love of God in a place called Hell. This place called Hell is a place of eternal torment, suffering, pain and agony for all those who reject Jesus Christ.

Choose Jesus Christ today and you will have peace in your life now and forever.

Have a great day!

This is a great "pro" quality recorder that usually goes for $200 to $300.
it would be a great recorder for radio listeners.
you can learn more about it here:
http://www.d-mpro.com/users/getdownload.asp?DownloadID=108

the built in mic doesn't seem to do anything but the recordings using the
LINE-IN are great at both speeds !
price is $50 plus $12 for shipping

I have the PMD201 and it has been a great additon to my
equipment. I bought mine at a surplus auction about 10
years ago and use it daily.
My only complaint is that the pause button does not kill the
motor, andit is only mono. I wish I had a stereo, but beggers
can't be too choosy.

Wonderful! An interview with one of Hugo Chavez's trained monkeys! You can bet that anything coming out of anyone associated with the Chavez government is pure, unadulterated bulls**t! If you can't do any better than to quote from one of Fidel Castro's rump wranglin' butt-buddies you'd better give up.

You really do need to read this:

http://www.crichton-official.com/speeches/speeches_quote04.html

It's lengthy and requires some concentration, but don't let that scare
you off. There's more to science (and reality) than what you hear on
your favorite radio program .. or than what matches your media driven
preconceptions.

I know absolutely nothing about any of this except that most of it dates back to probably WWII Signal Corps days. Tube type receivers and so-on. Some are a little later than that era. There's a lot of glass jars with little spare doodads. Wish I could be more descriptive.

Question: Is there any market for this stuff or should I toss it? I've never gotten familiar with e-bay and wouldn't know where to start on that, but we're going to have a garage/estate sale in a week and I just wonder if I should devote any display space for this stuff. I imagine the average person wouldn't have any use for it.

I'll check back for comments.

TIA

Pat

The 2001D was the international version of the 2010. The former came in
various versions with blocked coverage and no SSB for certain countries
such as Saudi Arabia. The latter was sold only in North America with
full HF coverage and SSB.

Take photos. Put it on E-Bay. Offer it as-is.
Make the buyers pay for shipping and handling.
Worst thing you can do is sell it in bulk to
the local hams as they most likely know what it's
worth and will try to pay you pennies-on-the-dollar
for stuff you can make reasonable $$$ for on e-Bay.
I've seen hams show up at the widow's door a day
after the ham has been planted under 6' of dry
earth. Don't let em snocker you out of what
may be big $$$. Find a local honest ham (NOT a
Dealer!) who will broker the stuff for you for a
fair price. There's alot of vultures in the radio hobby
that will rob you blind in a heartbeat if you let em.

Pete,

I've been curious about your technical background, particularly your
formal education. Where did you learn the subject matter which you
implement so well with radio receivers?

Thanks

4634. *post 101* >> GOOD NEWS! - Over 2000 years ago Jesus Christ suffered and died on a cross and rose from the dead so that we can be forgiven of our sins(misdeeds) and have a home in Heaven when this life has ended. Most people just don't know how to ask Jesus Christ into their hearts. Heres how...

Newsgroup: rec.radio.shortwave
Date: 2005-02-20 05:22:47 UTC
From: RL_Grossi_2005@sbcglobal.net
Message-ID: <1108876967.372795.139280@z14g2000cwz.googlegroups.com>
Source record: 8633

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed God to save you. Welcome to the family of God.

If you decide to wait till later you may die before you get another chance to be saved because none of us knows exactly when we will die.

This means that if we die without trusting in Jesus Christ as our Lord and Saviour we will be forever separated from the love of God in a place called Hell. This place called Hell is a place of eternal torment, suffering, pain and agony for all those who reject Jesus Christ.

Choose Jesus Christ today and you will have peace in your life now and forever.

Have a great day!

4644. DX Test WOKY 920

Newsgroup: rec.radio.shortwave
Date: 2005-02-20 06:41:31 UTC
From: dxAce <flashoveride@eclipsed.com>
Message-ID: <4218311B.2FACC73C@eclipsed.com>
Source record: 8642

WOKY 920 in Milwaukee, WI is currently conducting a DX test until 2 AM EST.

Currently playing standards and AC. Heard an ID in CW a few minutes ago.

An easy one here, but then I'm just across the lake from them.

Christian Vision is beginning a series of tests in DRM to the United Kingdom. Having declared its intention to run significant regular transmissions to UK and Europe later in the year, the tests in partnership with transmission providers in Europe are a prelude to this. With the cooperation of T-Systems International, Media&Broadcast in Germany, Christian Vision will be using the J�lich site for shortwave transmissions in English as follows:

```
21st-27th February:
1600-1800 UTC on 7200kHz
Antenna: log periodic - (equivalent to HR1/2/0/.5)
Bearing: 285 deg
Power: 40kW

(More details at http://medianetwork.blogspot.com/ )
```

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed God to save you. Welcome to the family of God.

If you decide to wait till later you may die before you get another chance to be saved because none of us knows exactly when we will die.

This means that if we die without trusting in Jesus Christ as our Lord and Saviour we will be forever separated from the love of God in a place called Hell. This place called Hell is a place of eternal torment, suffering, pain and agony for all those who reject Jesus Christ.

Choose Jesus Christ today and you will have peace in your life now and forever.

Have a great day!

> The dynamic range even of a balanced FET mixer is finite after all.

Still, a properly designed mixer of this type should have an IP3 of at least
+10dBm. The Palstar R30 uses this type of mixer, and has an IP3 of +18dBm.
The only other radio that had a balanced JFET mixer that had that kind of
2nd order IM problem was an AOR3030. That had to be one of the worst
receivers I ever owned. That company was even too cheap to put a bandpass
filter in the MW range.....instead, they inserted a 10dB attenuator. I
ended up putting a MW bandpass filter of my own design. After changing all
of the front end filter diodes, I.F. filter switching diodes, and AGC diodes

to 1N5767 PIN diodes the receiver had some semblance of a real receiver
(note, only a semblance).
All in all, the '2010 isn't a bad receiver, considering everything it does.

> input (but how likely is that?). I guess I'll grab a piece of paper
> now...
>
> Stephan

You would think that it would be the case, but it just isn't.....my
first dual conversion receiver had a 1st I.F. of 10.7MHz and a 2nd I.F. of
455kHz. Low-side injection of the 10.245MHz 2nd LO at a level of +7dBm into
a diode ring mixer.
Upper sideband = 10.7MHz.....lower sideband = 9.79MHz. I had a
910kHz rejection of only 35dB, which is pretty bad for this type of design.
I went through all of the calculations and had the folks at Piezo Technology
stuck. They never heard of such a thing. I tried different filter
termination impedance, tuned circits at 10.7MHz, atteunator pads to provide
a resistive termination for the crystal filter. It was out of desperation
one day that I tried a copper shield around the 2nd LO and the image dropped
down below the noise floor of the system. The offending culprit was WOPA
1490 interfering with WILL 580. WOPA was in Oak Park, Illinois, while WILL
is in Champaign, Illinois, at the University of Illinois.
Once I went to lower power 2nd LOs the problem hasn't shown up. Also, with

the selective diplexer I am using after the 1st mixer (BW =13kHz @ 6dB), the additional selectivity helps out quite a bit.
When I told some of my co-workers at Collins Radio Co. about it, they hadn't heard of this mechanism either.

Alex Jones wasn't the only kook at WGTG, either. The guy who ran the station at the turn of the century (and whom I hate to have to admit was a fellow ham) IMO holds the record for irresponsibility in SW broadcasting. Note that I refer to the real WGTG in Georgia, not the pirate station that used the same call letters.

Good News!

Do you know how simple it is to go to Heaven after this life has ended?

The good news is that God came from Heaven to earth in the person of Jesus Christ over 2000 years ago and died for our past, present and future sins(misdeeds). He was born in the land of Israel supernaturally to a virgin Jewish woman named Mary. He lived a sinless life for thirty-three years and then sacrificed His sinless blood and died on a cross to pay the death penalty for our sins.

After Jesus died He rose from the dead three days later as He said He would. The Holy Bible also tells us that Jesus Christ ascended into Heaven and that all who accept Him as their Lord and Saviour will live forever with Him in Heaven where there is no more death, sorrow, sickness and pain.

The Holy Bible very clearly explains how simple it is to be saved and on your way to Heaven, "For if you confess with your mouth, "Jesus is Lord," and believe in your heart that God raised him from the dead, you WILL BE SAVED." (Romans 10:9)

You can be saved right now and on your way to Heaven if you will open your heart to Jesus and pray the following prayer:

Dear Jesus Christ, I want to be saved so that I can have a home in Heaven when I die. I agree with You that I am a sinner. I believe You love me and want to save me. I believe that You bled and died on the cross to pay the penalty for my sins. I believe that You rose from the dead. Please forgive my sins and come into my heart and be my Lord and Saviour. Thank You Lord Jesus Christ for forgiving me and saving me through Your merciful grace. Amen.

You are now a Christian if you said the prayer and allowed God to save you. Welcome to the family of God.

If you decide to wait till later you may die before you get another chance to be saved because none of us knows exactly when we will die.

This means that if we die without trusting in Jesus Christ as our Lord and Saviour we will be forever separated from the love of God in a place called Hell. This place called Hell is a place of eternal torment, suffering, pain and agony for all those who reject Jesus Christ.

Choose Jesus Christ today and you will have peace in your life now and forever.

Have a great day!

>Who rates as the biggest shortwave kook(s) of all time ??? Feel free to add
>your own "winner" if not already listed.
>
>Steve Quayle

One of many nutcases who've also appeared on Coast-To-Coast AM over
the years. Why not just lump them all under Art Bell and get it over
with? Then this might get my vote.

>Brother Stair

See comments below.

>John Stadtmiller

One of Ted Anderson's "Genesis" puppets. Fits right in with Alex Jones
and numerous other zealots. See comments below.
>
>Jeff Rense

Another UFO nutcase. How can you mention him and not Sherry Shriner
and her Bible codes? Yeah, these people - really off the deep end IMO.

>Radio Moscow (prior to Soviet break-up)

You have to bear in mind that this was a part of the Soviet propaganda
machine...a throwback to the roots of SWBC as part of the Nazi
propaganda machine during WWII. This, when SWBC began, was what SWBC
was all about. In that sense, Radio Moscow can hardly be considered a
SW kook unless you want to also list propaganda stations from the
other side such as VOA, Radio Free Europe, and the like in the same
category. These stations were telling their side of a political
dispute. That's a far cry from watching flying saucers land.

>Jack Blood

Nah. Just a fill-in for Stadtmiller.

>Voice Of Korea

Fits in with my comments about Radio Moscow.

>Hal Turner

No worse than Limbaugh.

>Radio Havana

This used to be one of my most hated stations on the airwaves due to its vicious anti-American propaganda...but again, refer back to my comments on Radio Moscow.

>HAARP

Huh? This was bona fide scientific research conducted jointly by USAF and the US Navy. Its roots go back to things most people have forgotten about, like Project Argus and Project Starfish, products of post-WWII attempts to use nukes to disturb the Van Allen belt and assess the effect this had on radio communications. Before HAARP there was also something called HIPAS conducted by the Navy. I won't post all the details, but Google up some of these projects and familiarize yourselves with the background on HAARP, and I think you'll get the sense that this isn't shortwave kookism so much as it is an indication of the fact that there is simply no limit to the degree to which the military will attempt to use science to gain an advantage over an enemy. If the military implications of these projects is troubling to you, well, perhaps it ought to be, but again, there is a world of difference between this and watching flying saucers land.

>Pastor Peters

He and Brother Stare and a few others like him are icons for the right-wing religious zealots who have overrun shortwave broadcasting in the US. Whether or not you consider them to be kooks depends, I suppose, on your own religious beliefs. Personally, I tend to avoid listening to the likes of these.

>Jackie Patru

What, you're gonna mention her and not Dave Riley? ;-)

>VOIRA

Another propaganda outlet. Once again, this is what SW broadcasting was invented for in the first place.

>WWCR in general

WWCR, WNQM, WMQM, WITA, WVOG, and others. See my comments under Pastor Peters.

>The Liberty Net

This group is a black eye on the face of ham radio, and as a licensed ham myself, I deplore their presence on our part of the radio spectrum. 'Nuff said.

>The Licolnshire Poacher

Lincolnshire Poacher was originally a cold war spy station that used a male voice in A.M. to send messages over a tune played non-electronically. Some of the early transmissions originated from

HMGCC Gawcott in Buckinghamshire. The L.P. we hear today is not the same as the one which was around in the 1970s. The BBC have always distanced themselves from the idea of involvement with number stations, but I will remind everyone that staff at BBC relay stations outside the UK (now operated by Merlin Communications, the privatized World Service Programme Delivery Services department of the BBC) are not in fact employed by the BBC - they work for the British Foreign Office, and always have! Think about it...

>Radio Marti

The US response to Radio Havana, basically.

>Radio Marti's jammers

The Cuban response to the US response to Radio Havana. again, this isn't kookism, it's what SWBC was invented for in the first place, the distribution of propaganda by mass media.

>Alex Jones

Covered above.

>Respectfully,
>
>Michael

Some of the names above I had forgotten about, Michael - thanks for the trip down memory lane, here.

>Dave Von Kleist and his equally kooky wife Joyce Riley.

Lost what credibility he had left when he started selling his "911 In
Plane Site" video. These two also tie in with the Gulf War Illness
debacle (Jackie Patru, mentioned in Michael's post). Then there is the
issue of Riley's involvement with the Southern Poverty Law Center, a
notorious front organization with close links to the FBI. There is
also a link between Riley and Dr. Garth Nicholson, a key figure in
secret US biowarfare programs, and Linda Kennedy, a lawyer who once
worked for Riley and von Kleist as a personal assistant but later
split with them, alleges that Riley and von Kleist have had direct
contacts with FBI and Military Intelligence. Bottom line - since we
really don't know who these people are, it's entirely possible that
Von Kleist and Riley are not what they seem to be and would have you
believe they are. But if I proceed further I will begin to sound like
some of the shortwave kooks this thread is about, so I end here. :-)

This is the case in which eleven Christians, including 17-year-old Lauren Murch, were arrested and charged with three felonies and five misdemeanors for peacefully witnessing at OutFest, a homosexual block party, sponsored by the city of Philadelphia, PA.

They "could" have gotten up to 47 years each. Check it out at:

If it really is WWII era, I would have to imagine there are collectors who would be interested in this stuff. Tube receivers if in good condition tend to be rather sought after. I would imagine you would get better prices putting it on eBay, though. Maybe you can find someone to do the listing for you?

Who thinks the thoughts doesn't matter. The fact that they are Stalinist would still apply. And yes, it's damn scary that our young people are not being taught the basis of our system of government or the ideals upon which the country was founded, freedom of speech, the press, peaceable assembly and religion being important enough that they made them the first issue in the Bill of Rights.

Please don't "toss it," even the "dooo-dads."
Many restorations of historic equipments are going begging
because people toss the little parts.
It would help if we knew where you were located.

The average public is not going to have an interest in
the items, but there are collectors all over the country
who would pay a reasonable amount for the old tube equipment.
The loose parts won't fetch much- a few bucks-
because there's no way to
know exactly what's included- the buyer takes that risk.
He's hoping for that one knob or one resistor that completes
a set he's restoring. And sometimes, several people can
find parts for their projects from one small parts box.

If we can found out where you are and some information
on your estate sale, we'll send along the information
to collectors in your area. You can be sure that
some of them will show up to make a reasonable offer
on the equipment (will depend on model and condition, of course).

Thanks for letting us in the collector community know
about your items.
Kindly,
David S.

I'd like to be able to hook more than one receiver up to a single speaker via some kind of switch or selector. And I'd like to be able to do this SAFELY, without frying anything. Can someone point me to a switch that would do this?

Thanks,

Steve

All you did was name the ZOG mouthpieces, but that's what makes monitoring what they say important.

They tell us exactly what to expect from the global state, but if you believe that none of what these stooges talk about is true, then you're more of a "kook" than they are.

I mean, biometrics, chemtrails, the gun grab, the legal hatred of White people, the outlawing of morality, the evil of jews, the drugging of children, schools for gay kids, the wide-open borders, and the Chinese products on our store shelves are just silly illusions right?

After all, you didn't list any SW voice that has already been silenced, murdered, or smeared in effigy on America's Most Wanted, because they represented THE RESISTANCE.

The mole, the US media and a White House coup

The reporter who wasn't is part of a wider press scandal, writes Paul Harris in New York

Sunday February 20, 2005
The Observer

For two years Jeff Gannon cut an unobtrusive figure at White House press conferences. The shaven-headed, craggily handsome man worked for an obscure news agency called Talon News, known for its conservative sympathies. He was often the subject of jokes by colleagues on weightier news organisations.
No one is laughing now, because Gannon was far from being a harmless distraction. He was writing under a false name and working for a Republican front organisation. Suddenly, his 'softball' questions to White House officials looked less like eccentricities and more like plotting by an administration which has frequently displayed a dark mastery of the arts of press control.

When it emerged that Gannon was also linked to gay prostitution websites and might be a gay prostitute himself, the scandal as to how he was allowed daily access to the White House grew even murkier. The American media is now being forced to confront the possibility that Gannon, whose real name is James Guckert, was simply a Republican plant, used by officials, including President George W Bush, to ask easy questions in difficult press conferences. 'The idea of having a mole in the White House press corp is amazing, but that's what it looks like,' said Jack Lule, a journalism professor at Lehigh University.

But the Gannon affair, which has shocked much of America's political establishment, is just the latest scandal in the media establishment. Newspapers including the New York Times and USA Today have been hit by plagiarism and forgery scandals. Other papers and television stations have been consumed with a soul-searching inquest into how they were misled about non-existent Iraqi weapons programmes. Added to that is growing evidence of a White House campaign to bypass or control the media in its everyday presentation of government policy , which included paying one journalist hundreds of thousands of dollars to promote its policies.

Last week a federal watchdog warned the Bush administration that any video news releases must state that the government is the source.

Twice in two years, government departments have been accused of distributing fake news packages, using actors as journalists.

On the internet, the mainstream media is derided and scorned. One question is dominating US newsrooms and television studios: ignored, scandalised and now corrupted, just what is America's mainstream media for anymore?

The extent of the Bush White House's command and control of the press corps is often revealed in the seemingly innocuous White House pool reports. These are dispatches dutifully filed by a correspondent assigned to travel with Bush and contain little but lists of endless meetings, meals eaten and clothes worn. But no detail is too small to be ignored by Bush's ever-watchful press handlers. One report, on 13 August 2004, contained a remark from Bush that it was a 'good question' as to who to support if Iraq's soccer team played the United States in the Olympics. Officials scurried to 'correct' it. 'To clear up any possible misconception ... the president would of course support the American soccer team in any hypothetical game with Iraq,' a new report said. 'The initial report should have done more to reflect the exchange was mainly in jest.'

Such micromanagement has been a hallmark of the Bush White House and its all-powerful policy guru, Karl Rove. Added to that has been what appears to be a concerted effort to subvert the mainstream media.

Administration officials were recently revealed to have paid three senior journalists to promote or design policies. More than $240,000 of taxpayers' cash was paid to black pundit Armstrong Williams to push the agenda of Bush's education department. Critics were blunt in their assessment of what Armstrong's contract with the government meant. 'It is propaganda,' said Melanie Sloan of watchdog group Citizens for Responsibility and Ethics.

At the same time, Bush has held fewer Washington press conferences than any of his modern predecessors, while courting local media, such as small city newspapers, which are perceived as easier to steamroll. During last year's election campaign Bush avoided interviews with leading newspapers, such as the Washington Post , but frequently invited reporters from smaller swing state publications to speak with him on Air Force One. Vice-president Dick Cheney took the strategy one step further and banned New York Times reporters from travelling with him.

The media has not helped its own case. First, New York Times reporter Jayson Blair was found to have plagiarised numerous stories. The incident cost Blair his job, forced the editor to resign and was the subject of fevered Manhattan dinner party chatter for months. Then USA Today 's top foreign reporter, Jack Kelley, was discovered to have fabricated stories from around the world and invented interviews and witnesses from Cuba to Jerusalem.

Right-wing media ratcheted up the long-standing conservative complaint that the media is dominated by liberal publications. Though many journalism experts deny that is the case, the image has settled in the American consciousness, forcing newspapers, magazines and television stations to go out of their way to prove they are not liberal. 'We have a conservative media and also a mainstream media, which is also now fairly conservative because it has been forced to deny being liberal,' said Lule.

The Gannon case is a prime illustration. If, during the Clinton administration, a fake reporter from a Democrat front organisation, using a false name, had been exposed as attending White House press conferences it would have been a national scandal. If he had then been shown to be a gay prostitute, the scandal could have threatened a Democrat presidency. With 'Gannon' and Bush there has been no such outcry. The mainstream media has approached the story warily, while right-wing organisations such as Fox News have largely ignored it.

That has created a vacuum in the US media. It is a space being filled by 'bloggers' from both left and right who write personal journals, or weblogs, on the internet. It is here that the real media battles are now being fought. The internet has become a sort of Fifth Estate as the Fourth Estate of the mainstream media has slid toward irrelevance. The groundwork was done mainly by the right. Internet gossip hound Matt Drudge, whose Drudge Report is a key source for every American political journalist, struck the first blow with his breaking of the Monica Lewinsky affair.

Since then a plethora of right wing blogs have sprung up. Unlike Britain, where political blogs are barely part of the debate, internet sites in America are seen as a vital political tool. Conservative bloggers have taken two big scalps recently. Last year bloggers questioned the veracity of a CBS news report on Bush's National Guard service. They dumped enough doubt on the story to cause four CBS reporters to lose their jobs, tarnish the reputation of legendary anchor Dan Rather and insure that the substance of the CBS story - whether Bush fulfilled his service - never emerged as an election issue.

Last week, CNN's chief news executive, Eason Jordan, resigned after an internet campaign prompted by his claim that American soldiers targeted journalists in Iraq. Though Jordan said that his remarks had been misinterpreted, the bloggers' revenge was so vehement he ended his 23-year CNN career. One anti-Jordan website, Easongate.com, crowed openly when he quit: 'To every reader, commentator, e-mailer and blogger that committed to this cause, thank you.'

The left has also had victories. It was not the mainstream media that exposed Gannon, but left-wing website Media Matters for America which enlisted other liberal bloggers to help. All the significant breaks in the story emerged online, forcing Gannon to resign, reveal his real name and go into hiding.

Some commentators see the emergence of blogging as a media force as a liberating phenomenon. Unlike the mainstream media, blogging is cheap, easy and open to anyone regardless of qualification or background or money. 'Blogging gives a voice to those who were previously silent,' said Ananda Mitra, a communications professor at Wake Forest University.

Others see it as part of the trend towards partisan journalism. Spearheaded by the nakedly right-wing Fox News, journalism in America has come to resemble a political shouting match rather than any form of debate of the issues. But with soaring viewership, Fox has emerged as one of the most powerful forces in the media landscape. Other networks, such as CNN and MSNBC, have sought to copy Fox's personality-led and opinion-based news.

The media is in the midst of a transformation which the Bush administration is keen to foster. They have discovered that a partisan and atomised media can be controlled, manipulated and used to an unprecedented degree.

It is a lesson that liberals are also learning. In answer to the talk radio of Rush Limbaugh - one of America's most popular and conservative commentators - liberal groups have set up Air America. Defying the critics, it has established itself as a left-wing radio network every bit as ruthless in skewering its opponents' points of view as its right-wing equivalents. In answer to right-wing television, former presidential candidate Al Gore is rumoured to be seeking backers to finance a liberal television network. Now both sides are equally ready and willing to use any means necessary to tear the other apart. The old-fashioned mainstream media is disappearing. 'Once that pattern is put in place, it is going to be hard to break,' said Lule.

How the media shot themselves in the foot
A series of scandals have not helped the American media's reputation and its struggle for independence.

New York Times

Reporter Jayson Blair was fired and the newspaper's editor forced to resign after Blair was found to have plagiarised numerous stories.

USA Today

Foreign reporter Jack Kelly was discovered to have invented stories, interviews and witnesses from around the world.

CBS

Four reporters lost their jobs and the reputation of legendary anchor Dan Rather was tarnished after doubts were cast on a news report of Bush's National Guard Service.

CNN

Chief news executive Eason Jordan resigned his 23-year career after he claimed that American soldiers had deliberately targeted journalists in Iraq.

BAD,
.
Is this 'perceived' failing theirs ?
Or - Is It the Failing of 'our' Public Schools and Education System ?
.
Are We Teaching 'our' Young Future American Citizens :
* To Love American
* To Respect America's History, Culture and Traditions
* To Understand and Respect 'our' Form of Government
* To Be Proud To Be An American
Or - Are we 'indoctrinating' these Children in our Public Schools
to be Citizens of the World and Feel Bad about Being an American
and to Hate America ?
.
America Teach Your Children Well - amen, Amen. and AMEN !

Radio Shack (which we all love to hate) has a 6 position rotary switch, get that, a project box, some wire and make one, it's quite simple. You could either direct wire to the speakers or mount 1/8 inch phone jacks on the box if you want to be fancy. Shouldn't be any safey issues for either the speaker or radios.

Your displays of ignorance are endemic to these boards. Just take the recent suggestion that Canada is fascist as an example of a totally absurd, totally off the track comment, and you have a small idea of how ignorant you are. You seem to know many facts, but are totally unable to assemble them into reasonable ideas.

Thank you for redefining fascism. I wasted so much time and money going to school, when I could have learned everything I needed to know from you and DXAce.

This is the greatest coup of any president. I next uspect that Hussein was never captured, but that they put an actor in there to fake the role.

This president talks a great deal of moral values, but in action none of those values are present.

There is nothing in your resume that I can see that actually indicated that you received your degree. The only thing I can see is that you 'enrolled' at Arizona State University.

Can you provide a graduation date? School you graduated from? What degree(s) did you receive?

Just curious.

| Thank you for redefining fascism. I wasted so much time and money going to
| school, when I could have learned everything I needed to know from you and
| DXAce.

Actually, David, I think he's pretty much got the definition right, if you look at the Fascism of Nazi Germany. But I also think he's being sarcastic, so far as it "can't happen here." Because it *is* happening here. The thing about these extreme forms of government is that their claims and their methods rarely agree....the big-brother doublespeak: Freedom is Slavery, Good is Evil, stuff like that. The bottom line is that both Russian-style communism (Marx/Leninism) and German-style fascism (as Nazism is a distinct branch of fascism) there are the haves and the have-nots. What attracts you to capitalism, if I can presume, is that, ostensibly, the difference between these classes can be quite small, and in the recent past, it was. But seeing as the U-S has one of the greatest gaps between the wealthy and poor, considering the overall wealth of the nation, we may well be sliding towards one of these (guess which one) in fairly short order.

LOL, you should have been on the list "wholebean". You surely qualify as
a full blown kook. Have you been on SW, a guest on the Liberty Net, or
other low life group??

Look, up in the sky, it's a bird, no, it's a plane, no, it's a chemtrail
spraying black ops plane!! What are they spraying today?? LOL.

Why shouldn't white people get hated, just like all the other colors
have been hated by white types like you? LOL.
You're just a whining white boy..

What's the problem with a school for gay kids?? Oh, you're just angry
that you can't beat them up anymore without getting in trouble...

Talk about mouthpieces..sheesh.

BDK, Non whining white boy...at present, anyway..

A lot of the technical things folks talk about that some radios have and or what some radios should have,I don't know much about what it all means.If that new radio turns out to be a real super radio and the price you talk about,I think it is a resonable price.I would be interested in buying such a radio.

Indeed I did. I received 117 credits there, too. And was on the Biz School Dean's list the entire time. I also have an assortment of credits from the Universidad Central del Ecuador, the Pontificia Universidad Cat&lica del Ecuador, the Colegio Universitario del Sagrado Coraz&n in San Juan and a bunch of online creadit-bearing stuff. I also have 6 home-study degrees from CEI and NRI in electronics, broadcast engineering and electronics design & theory.

Since I spent most of my college time nearly a decade years after being a
radio station owner and manager, I selected courses that would do me good,
not get a degree. So I had need for the knowlege, not the degree. the nice
thing about not needing a degree to be employed is that you can sample
disciplines, which I did.
>
> Can you provide a graduation date? School you graduated from? What
> degree(s)

> did you receive?

Unfortunately, I was given a job offer before graduating... to run the broadcast division of a major retailer. Since my credits would not have given me a degree, anyway, since they were too widely spread, I moved over to Puerto Rico.

Now it's your turn. What are your credentials? Somehow, I suspect this to be the preamble to a pissing contest, in which I will post facts and you will ramble and insult with vague references to reality.

I disagree with the "cronyism" aspect of fascism DX posted. true fascism, and not the embelished cult of naziism, is a tad more complex, and is based mostly in right wing authoritarianism. The Peron administration of Argentina was closer to fascism than the German, Italian or Spanish manifestations, but was also bound by a personality cult which made it deviate from the text definition.

I see a world "slide" (using your term) towards a change in the middle class... a reduction of sorts. The byproduct is an increasingly economically active lower or working class. As this grows, a new middle class will emerge. This is all being created by multinational capital, as nations do not have the trans-national power to create change. Of course, none of the corporate execs are elected by the people, so we have an oligarchy on a world scale.

The good solution is a small audio mixer with as many inputs/channels as
your number of receivers.
http://www.markertek.com/CatList.asp?cat=AUDIOEQUIP&subcat=AUDIOMIXER&search
=0&off=

I would request a catalog and browse their extensive inventory. You may
also come up with
other unrelated ideas: home page www.markertek.com

School is a waste of time, unless you're there to learn something technical.

''In an article in the 1932 Enciclopedia Italiana, written by Giovanni Gentile and attributed to Benito Mussolini, fascism is described as a system in which "The State not only is authority which governs and molds individual wills with laws and values of spiritual life, but it is also power which makes its will prevail abroad.... For the Fascist, everything is within the State and... neither individuals nor groups are outside the State.... For Fascism, the State is an absolute, before which individuals or groups are only relative...."

Mussolini, in a speech delivered on October 28, 1925, stated the following maxim that encapsulates the fascist philosophy: "Tutto nello Stato, niente al di fuori dello Stato, nulla contro lo Stato." ("Everything in the State, nothing outside the State, nothing against the State".) Therefore, he reasoned, all individuals' business is the state's business, and the state's existence is the sole duty of the individual.

Besides totalitarianism, a key distinguishing feature of fascism is that it uses a mass movement to attack the organizations of the working class: parties of the left and trade unions. Thus Fritzsche and others describe fascism as a militant form of right-wing populism. This mobilization strategy involves Corporatism, Corporativism, or the Corporative State [2] (http://www.infoplease.com/ce6/bus/A0813636.html), all terms that refer to state action to partner with key business leaders, often in ways chosen to minimize the power of labor unions. Mussolini, for example, capitalized on fear of an imminent Socialist revolution [3] (http://www.thecorner.org/hists/total/f-italy.htm), finding ways to unite Labor and Capital, to Labor's ultimate detriment. In 1926 he created the National Council of Corporations, divided into guilds of employers and employees, tasked with managing 22 sectors of the economy. The guilds subsumed both labor unions and management, but were heavily weighted in favor of the corporations and their owners. The moneyed classes in return helped him change the country's laws to raise his stature from a coalition leader to a supreme commander. The movement was supported by small capitalists, low-level bureaucrats, and the middle classes, who had all felt threatened by the rise in power of the Socialists. Fascism also met with great success in rural areas, especially among farmers, peasants, and in the city, the lumpenproletariat.

Unlike the pre-World War II period, when many groups openly and
proudly proclaimed themselves fascist, since World War II the term has
taken on an extremely pejorative meaning, largely in reaction to the
crimes against humanity committed by the Nazis, who were allied with
Mussolini during the war.''

You can thank your local public Leftist/"Progressive" = Socialist/Communist school board and teacher's(?) union for that!
Which should explain why school vouchers are so heavily opposed. The money from your property tax is the power for the Leftist school board's "agenda".

The best thing you can do for your children is scrimp and save every damn penny you can to send them to a private grammar and high school. Check out the Coverdell savings account to pay for private K1, private H.S. and public/private college tuition expenses as well as other savings vehicles: http://www.savingforcollege.com/coverdell_esas/

Keep your children as far away from the Leftist agenda as possible lest your children end up as Maoist robots.

I mean every reporter with access to the White House dare not say
anything damaging to the administration. They will lose their access
and their jobs.

The personal beliefs of good reporters don't affect their journalistic
objectivity.

I wondered about that comment myself. The post before was talking about noise in synthesizers, and of course, the KWM-1 didn't have one of those. So either he was claiming a noisy local oscillator, or he was talking about something else in the radio that was noisy, which is comparing apples to oranges.

According to your logic the U.S. should have allowed business to employ more "Soviets" during the cold war.

> Otherwise, it's not trading with the enemy, and therefore is not an
> endorsement of a regime hostile to the US.

The idea that close economic ties with a murderous communist dictatorship in China, which
is completly against moral and ethical Western values, will bring that regime to callapse is a
historically proven fallacy.

> Many US companies did
> business with Nazi Germany before war was declared in 1941, and it was
> not illegal nor an endorsement of Nazi policies or the Nazi regime's
> existence. It was just business. Capitalists do business with everybody
> as long as they have money, unless their government forbids them from
> doing so with a certain country.

And you condone this!? Much like the Socialist government of the EU is pulling to permit
EU countries to sell arms to China? Even after the recent murders of thousands of Chinese
citizens by the PLA? The tally of which is greater than the Tiananmen massacre of 1989!
Which was the reason for the arms sales ban in the first place.

Does the actions of big business and government make their laws
morally right? Or is it society and its individual that make it so? Do you know the difference?
Apparently not!

Your morals are misguided as are your leaders and politics. If you support a communist regime
in China you need to write your congressman and voice your opinion as such and join the Party.
Instead of sitting ideally and knowingly doing nothing for the cause AGAINST "individual" liberty
which you very much enjoy at the cost of your ancestors lives. Pay back will be a real pain and
soon.

Keep your eye on Taiwan.

That's because the local boosters down there didn't want to scare off
the folks moving in from Kansas back during the boom years, so the
local media called them "Microbursts". There's a chapter on this in
Ecology of Fear by Mike Davis, an L.A. area writer.

>That is a first in California I think.

As I remember the book, it's more like two a year in the L.A. area.
Interesting things happen when the local newspaper company is also
a big real estate developer.

Your going to jail.

4726. OT: I am a recovered leftist, with over 25 years of sobriety

Newsgroup: rec.radio.shortwave
Date: 2005-02-20 18:20:51 UTC
From: tianli_ <tianli@sina.com.cn>
Message-ID: <111hldmbk16dp64@corp.supernews.com>
Source record: 8728

12 Steps for Reformed Leftists

The first step in any successful recovery program, such as Alcoholics Anonymous or Narcotics Anonymous, is to admit that there is a problem. For a leftist, then, stepping out of denial is the beginning of a journey toward clearer thinking and political sanity. I approach this topic with only a hint of humor, because I myself am a recovered leftist, with over 25 years of sobriety. Was I drunk on left-wing propaganda? Yes, and I became a user at a very tender age as a child, in fact, in the home of my parents, who schooled me in the ways of communism and socialism.

I believe this topic is extremely important at this juncture, because the far left is finding itself on the wrong side of history yet again and many of its members are lost at sea. I try to imagine myself, had I not awakened to the wrongness of my ideology, trying to survive both the re-election of George W. Bush and the successful Iraqi election. I would be beside myself with anger and disappointment. My index fingers would be in utter fatigue from non-stop pointing to assign blame. I might even threaten to move out of the country, as my brother and his wife are doing!

I feel sad for leftists because they are stuck in their addiction. Strong wording? I think not, because I was there. Leftist ideology is a powerful and cunning potion, and if it gets into the mind at a young enough age, it can be extremely difficult to kick. Let me explain.

I was brought up in the 1950s and 60s in a suburb of New York City by two World War II veterans whose own parents were immigrants from Eastern Europe. My mother s father took her to Communist Party meetings when she was a youngster, and my parents attended camps in upstate New York where young reds congregated, and where they met. As a child I read the works of Howard Fast and the periodical entitled The National Guardian. By the age of twelve, I was completely indoctrinated into the Communist mind-set and openly debated my seventh-grade social studies teacher on U.S. policy during the Cuban Missile Crisis.

I was convinced of the evils of capitalism and believed that if the West would just not interfere, the Soviet Union would become a workers paradise (an old rant still mouthed today by many, including my mother and my son s college history professor). My mother took me to various demonstrations before I left for college, at which time I involved myself in activist work against the Vietnam War, to my everlasting shame.

There is no way for a cradle conservative to imagine the pain that a recovering leftist goes through when the veil is finally lifted. The second step in official 12-step programs is belief in a higher power, believing

that your higher power can restore you. In recovering from leftist thinking, this step is not a requirement, but for me it was essential. In fact, during my 30th year I experienced a spiritual awakening that initiated many changes in values, which in turn brought me to my first conservative action step: voting for Ronald Reagan in 1980. To borrow Michael Medved's term, I had become a "theo-con."

Belief in a higher power is not always the starting place for a leftist in recovery. For some, it is intellectual honesty. Most recently, the Iraqi election came under attack from the far left in the United States and abroad. British Prime Minister Tony Blair rightly opined that anyone believing in liberty and self-rule could not possibly oppose the election. But leftists were able to do so because of intellectual dishonesty and their belief in ends-justify-the-means politics. Since a successful election in Iraq means a victory for the hated Bush and a vindication of the military, the left must oppose it.

But in opposing Iraqi self-rule, the left must abandon one of its core positions: freedom from tyranny for the oppressed. Those on the left cannot have it both ways, and in continually trying to do so, they expose themselves as the intellectually bankrupt people they really are. Leftists ready to recover must use what recovering alcoholics call rigorous honesty to rid themselves of the habit of "dual think." The fourth step in AA is a fearless moral inventory, and the folks on the far left who dare to take a fearless intellectual inventory will realize that their dual-think positions are untenable.

It can be frightening for a person to walk away from a lifetime of strongly held beliefs and into new ways of thinking. Family and close friends may misunderstand and even reject you. This happens. It is similar in many respects to what happens to individuals who leave a cult; they find themselves ostracized, ridiculed or marginalized. It is best not to engage in too many political discussions until you are sure of what you now stand for, how to defend your new positions, and who you can trust. Reading magazine articles and books to develop a knowledge base is essential.

I was in recovery for over 20 years when I read David Horowitz's "Radical Son," which documents his life journey from "red diaper baby" to leftist activist to highly regarded conservative scholar. It was not until I read this book that I realized that I was not alone in my "conversion" and how deeply angry I was at having been so brainwashed as a child. I now regard the politicizing of young children as a form of child abuse. This realization enabled me to deal with my anger and to begin to grow beyond it.

The 12th step in the AA program is to carry the message of recovery to others. It is a marvelous step because in doing so, you cement the fact that you have finally arrived at some place of clarity and are strong enough to spread the message. To all those whose beliefs have been shaken by recent events, to all those whose ideological houses have been built on sand: Take heart, because there is hope if you will bravely admit that you were in the wrong and move to the right. As Dennis Prager says, it is okay to be wrong;

it is not okay to stay that way.

Montreal
February 17 2005

On February 25, 2005, Radio Canada International will be celebrating its 60th anniversary. RCI's history is one of remarkable successes and rich anecdotes. It's a history worth discovering... and rediscovering. Did you know that Radio Canada International has attracted some of the leading lights in Canadian journalism over the years, including future Quebec premier Ren&#65533; L&#65533;vesque and legendary CBC host Peter Gzowski?

Some might recall that Prime Minister W.L. Mackenzie King set up a shortwave service during the Second World War to inform and entertain our troops overseas with programming from Canada. But few people are aware that RCI also played a key role in promoting Canadian music. After making its debut on the international scene in 1945, RCI quickly became an ambassador for homegrown artists. Many famous names in Canadian music, including Oscar Peterson and Glenn Gould, made some of their first recordings in RCI studios.

RCI Today

- RCI produces programming in nine languages.

- More than 300 hours of programming are broadcast each week via shortwave, satellite and www.RCInet.ca .

- RCI programs are rebroadcast in over 75 countries through its 300 partner stations.

- RCI airs special programming for listeners in Florida and the Caribbean, featuring the best of CBC Radio One and Radio-Canada's Premi&#65533;re Cha&#65533;ne.

- Listeners from all over the world participate in RCI phone-in shows.

- RCI broadcasts language courses for the whole family.

- The daily Cyberjournal provides a roundup of the key news stories.

- RCI oversees the Canadian Institute for Training in Public Broadcasting, which offers radio, television and new-media training to journalists, managers and technicians in emerging democracies.

- Internet users can listen to live and archived programs in nine languages at www.RCInet.ca and explore a brand-new databank containing over 20,000 links pointing to nearly 200 countries.

A Special 60th Anniversary Contest for
18 - to 30-Year-Olds Who Want to Build a Better World...

International Development Week (January 30 to February 5) and the UN-sponsored International Year of Microcredit 2005 will be marked in an original way by D&#65533;veloppement international Desjardins (DID) and Radio Canada International... the two have teamed up to launch Building the Future Now!, a major worldwide contest for 18- to 30-year-olds.

What can we do in 2005 to build a fairer, more prosperous, more equitable world? Young people around the world will be challenged to answer this ambitious question in a short essay or illustration, giving them a chance to win one of two international development education missions organized by DID in partnership with the Canadian International Development Agency (CIDA). Prizes are valued at $15,000, and contestants can enter by visiting www.RCInet.ca .

RCI has also produced a series of short radio features, consisting of two-to three-minute interviews with young adults whose lives have benefited from microcredit. They hail from Africa, Latin America and Asia, and can be heard on RCI's international airwaves throughout the year.

Relive the best of RCI on CD and on the Web...

We also invite you to visit a special 60th anniversary section of the RCI website, jointly produced by the CBC Archives team and RCI staff. It contains a wealth of radio and TV clips-with different selections in English and French- that look back at the landmark events of the past 60 years on RCI. Judith Jasmin, Maurice Chevalier and Ren&#65533; L&#65533;vesque are just a few of the stars of yesteryear you'll be able to see and hear again. Be sure not to miss this fascinating walk down memory lane at www.RCInet.ca and www.radio-canada.ca/archives .

For further information: Denis Pellerin, Communications Director, RCI, Promotion, Analysis and Broadcasting, French Radio Communications and RCI, (514) 597-4204, denis_pellerin@radio-canada.ca;

Interviews available with our spokespeople: Sylvain Lafrance, Vice-President of French Radio and New Media; Jean Larin, Executive Director of RCI;
A complete press kit with audio and photo archives can be obtained on request

4729. Sony SW100 power feed?

Newsgroup: rec.radio.shortwave

I am looking to feed the 3v DC into a Sony SW100 from a third party PSU.
I don't seem to be able to fix up the plug?
I have tried all the common power plugs that were supplied with the adaptor
and others but they are all a little large or small?
Is it and unusual size?
Do I have to go through Sony?
Thanks
Garry

If you leave the volume up it would indeed. I used a two position
switch in the past but only had one radio on at a time so that wasn't
a consideration. Including some 8 ohm resistors (1 - 5 watt) and the
associated switching scheme would make a pre-built more attractive for
those not inclined to tinker.

Not for a Japanese device. The outer diameter should be 2.35 mm,
possibly color coded yellow. + inside, - outside.

> Do I have to go through Sony?

No, certainly not. Possibly you've got an adapter (how old?) that does
not include these "newfangled" (early '90s) plugs yet.

Wow. YOU need to be on domestic SW. If you can't get a broadcasting
license, get a ham license and get on one of the far right nets. You'd
fit right in.

The only SW voice that has been killed off is Bill Cooper, and the only
one that has been jailed is Steve Anderson. I don't know if those two
guys were any more "right" (in more than one way) than any of the other
far right kooks on SW who are still around, and it's arguable that both
of those guys drew police into a deliberate confrontation, so they're
not exactly innocent.

Well, the Soviets weren't capitalists. Their economy was state
controlled. In China, the old state run businesses are gradually going
away, while privately owned business (albeit with a close connection to
the state) is thriving. The Chinese are interested in doing business
with America on capitalist terms. That's why there are so many Chinese
made products on store shelves in America. They were acquired through
legit trade.

> > Otherwise, it's not trading with the enemy, and therefore is not an

> historically proven fallacy.

I didn't say that. Stop putting words in my mouth. I said that as long
as we're not at war, and as long as it's trade based on accepted
principles of capitalism, it's not the capitalist businessman's job to
make moral or ethical judgements.

> > Many US companies did
> > business with Nazi Germany before war was declared in 1941, and it was

> Apparently not!

You call yourself a capitalist, a "reformed leftist", yet you want to tell businesses who to do business with based on politics. It is NOT the capitalist's business to make moral judgements, it is not his business to make political judgements, it is his business to make money. Whether this is correct or not is not at issue, it is the way things are, and the true capitalist will seek to minimize cost and maximize profit in any way that he can. That is the driving force behind capitalism. Trying to cherrypick who capitalists should and shouldn't do business with is essentially anticapitalist.

You see, I'm a reformed leftist too, but I seem to understand my newfound ideology of capitalism better than you do. Perhaps you should educate yourself about capitalist theory as you once did about communist theory.

>
> Your morals are misguided as are your leaders and politics. If you support

> which you very much enjoy at the cost of your ancestors lives. Pay back
> will be a real pain and
> soon.

You keep accusing people who trade with China, or who buy Chinese products because they are well made and serve their purpose well, of being supporters of the CCP when we have told you that this is not the case. In fact, most consumers and capitalists are truly acting in their own self interest just as Adam Smith said they would. They don't make moral/political judgements on whether the stuff they buy is somehow morally wrong because the government it is produced under is not perfect (even the US has massive human rights violations), they simply look at whether the stuff in question serves their needs. This is the invisible hand Smith talked about. Sometimes the invisible hand does things that some people may have objections to, but the hand is more powerful than any one individual's influence on it.

>
> Keep your eye on Taiwan.

If China attacks, and we then go to war against them because of that, I expect Chinese products to disappear from store shelves. It will be a rude awakening to CEOs who put the world's manufacturing capacity in a single country which is not stable. But until then, since Chinese products are virtually impossible to avoid, I will continue to buy on

whether the product is right for me.

The only reason I have no degree is that I was approached by a headhunter before graduation with a unique opportunity. Since going to college was a lark, I skipped out. I was, in case you did not notice, a radio station owner at age 17. Unlike many, I went to college to get exposure to disciplines not normally taught in biz school or broadcast school... things like cultural anthropology, sociology, music, etc.

OK, according to the chart there were two, one each in the years 1982
and 1992. They both caused no damage and are category F0. The same story
with the rest of them. Usually just a few people injured so I guess they
never made a memorable splash in the paper.

I wonder if the two Ventura county events were really waterspouts
instead of tornados. I have heard of waterspouts spotted off the coast.
I still have no recollection of these two tornados in Ventura county.

Maybe someone can find a news article on them.

In any event I only recollect one or two reports of tornados in California in the past so the charts were an eye opener as to the number of them.

Whatever stormy weather that shows up in Texas and Louisiana,usually some of it heads on over to here in Mississippi.I can pull up that NOAA weather map thingy on the internet with the radar loop and see what is heading this way.It is just like looking at the weather reports on tv news.The weather here right now is warm,partly cloudy and somewhat rainy.Flowers are growing in my yard and most of my front yard is green.

Yes, and it has a precise definition. Puffery involves making broad, generalizing and unsustainable statements about a product or service in advertising. A good example would be "the richest taste." Since "rich taste" is indefinable, but still a positive, this is puffery.

Things that can be defined, proven or quantified are not, generally, the subject of puffery.

As usual, your tangential approach, based on casting doubt by changing the argument, is not working.

Other than an occasional "Nibi Nibi Islands ATC active this morning on 6069" you ware a waste of bandwidth.

No, the point is that I do not need a degree, did not need one and was studying for personal satisfaction. Someone who already has a career does not benefit from an undergraduate degree if they are already in a top management position. As Telamon (with whom I sometimes disagree) stated, it is just a piece of paper. And, to me, irrelevant... or I would have done a couple of night classes and gotten the degree.

Skiing holiday. The avalanche guys were communicating on a FRS hearable channel. They had about 3 feet of snow, rain then another 2 feet. Top layer shears off the rain layer. Lots of fun to ride up the chairlift, hear the talk, hear the thud as they fired into the snow pack than the low thump as the avalanche is brought down. This was in the east Kootenay mountains of B.C. (which is all I'll report after talking to them, their preference. May I suggest those of you who go to ski areas in the mountains take along your scanners and FRS. You just never know what you'll hear. SW reception with an ATS 404 was quite poor except for Australia and the BBC.

4779. OT social policy and conservative/liberal

Newsgroup: rec.radio.shortwave
Date: 2005-02-20 22:13:00 UTC
From: uncle arnie <unclearnie@nowhere.at.all>
Message-ID: <111i2rcn9nlopb1@corp.supernews.com>
Source record: 8829

This is from a chat on a chair lift while skiing. Clearly OT, but perhaps topical for this ever present liberal-conservative issue in the NG.

Does conservatism mean gov't should not interfere as much as is possible in the lives of citizens? If so, how do those who want less gov't interference - perhaps we could call them "fiscal conservatives" - find themselves allied with "social conservatives" re issues like gay marriage, abortion rights, public prayer, etc. Freedom from gov't interference should mean freedom to live your life as you so choose? How does it offend my lifestyle is someone wants to live contrary to the way I do? Is the alliance between the fiscal and social conservative a thinly disguised religious agenda? Can't say as I know the answers, but there sure are alot of people prepared to boss others around, and they come from all levels between socialist and conservative. Frankly, fiscal responsibility but with non-interference in others' lives sounds more conservative than the current social policies I see stated by conservatives. Maybe this is just trying to appeal to voters and ideals be damned.

| Why don't you both stop feed the troll and cluttering up these newsgroups?

I've got "the Ace(hole)" killfiled, so you won't see any replies to that waste of a human brain from me. But this thread, considering that it raises the question as to whether free radio will be hard to find in the new United States, is (or was) on-topic for alt.radio.broadcasting, amazingly. It's actually rather intriguing that, in large measure, this is actually happening, with the disconnect between the U-S's implementation of IBOC and the Canadian's selection of Eureka, that access to unfiltered news sources will diminish for U-S residents, even those situated close to the Canadian border. If I were a paranoid, I'd be getting the hell out of the U-S. (Wait...I *am* getting the hell out of the U-S.)

| > Why?

| Because you broke the law.

Copyright law requires the owner of copyright to file a complaint. Copyrights
are, in large measure, the responsibility of the copyright owner to protect.
And, considering that the use of copyrighted material could be considered "fair
use", there's room for argument. Still, to assure that "fair use" is indeed
fair, I would suggest that the poster of copyrighted material copy only the
salient parts of the article in the newsgroup, and link the full article so as
to preserve the owner's ability to maintain control over their property.

We now return you to your orginally-scheduled squabble....

Source record: 8832

I've made two trips with my daughters this winter into the Cascade Mountain foothills (near Mt. Rainier) trying to find snow for sledding, but both times found no snow. The papers around here are saying that we only have 28% of the normal snowpack in the Cascades.

Meanwhile, it's been sunny all week and my lawn was overgrown. So Tuesday I hauled out the lawnmower, which growled to life slowly, seemingly upset at being woken early out of a winter hibernation.

They are calling this another "El Nino" winter up here, but I think we'll likely have water shortages in the summer and an early fire danger season.

Republishing an entire article is never considered "fair use" under
copyright law.

I was 12 years old. The Family had an old non-working Zenith 6s222 black dial. By some miracle I was able to get it going again. I remember late nights tuning that beautiful dial searcing for stories from around the world. Sure wish I had that old radio again. What a wonderful experience!

I've had much better receivers since but none has provided the enjoyment of that old Zenith.

Ask Pete KE90A on this group to send you the schematic and PC board
picture for his sync' detector. It's a good design.

I doubt you could find any professional radio repair service that would
work on the 2600 since it's about 25-years old and there are no factory
parts available for it. Even so, the labor cost could easily exceed the
value of the radio. See if you can find an electronics 'wizard' in your
area that would be willing to check it out for a nominal fee or maybe
for free.

Good question, but based on my experiences with the DSB sync detectors in the Drake R8 and the Lowe HF-225, I would have to say that the modified R-75 worked as well as the 225 and definitely maintained better lock on signal fades than the R8. So, I would have to say that it worked properly, at least on the one I modified. The best sync detectors I've seen are in the Drake SW2 and the Lowe HF-150. They are SSB selectable.

cheapest parts source, but they won't have all you need is:

Dans Small Parts

ttp://www.fix.net/dans.html

Most complete parts source is Mouser Electronics, they have it all, so much its hard to navigate to their page which has your part, their huge free paper catalogue helps to find stuff online

http://www.mouser.com

Best site for plans and advice on which tiny equipment you want is norcal qrp club, no matter where you live in the usa

http://www.fix.net/norcal.html

Best site to learn about liscensing info publications :/ is ARRL.

http://www.arrl.org

Best site to get those ARRL books quickly to you is unversal radio:

http://www.universal-radio.com

If you're a tinkerer, you can buy a used ham radio HF transmitter off one of the hamfest websites and hook it up to a car battery. If it's AC powered (120v) you can buy an inverter that will hook up to the terminals of the 12v car battery and give you 120v AC power. You'll need a pretty heavy duty inverter if you're running a tube rig though, and it will run down the battery quickly, for those reasons you'll want to consider an early transistorized transmitter. Last I checked, some could be had for a couple hundred bucks if you knew where to look, but that was a while ago, ebay might have inflated prices across the board by now. It also depends on what you're going to use it for. If it's for use at home when an ice storm wipes out power for a week you can rig your already existing home setup to run off car batteries. If it's for out in the woods a tabletop transmitter might be too much to lug around, you'll want to look into used mobile rigs.

First is the (unfortunatly now defunct) Jeremiah 33.3 guy who
used to be on WBCQ. He was a one hundred percent free
range/grain fed/gluten free/no dyes or perfumes Omega
Class Solar Flare Kook if there ever was one!!
If you missed J - 33.3 (Doug) when he was on the air, you missed
a real treat. His greatest claim-to-fame was his insistence
that David Rockefeller and Ailen Greys from The Motherships (!)
were currently orbiting planet Earth in a secret NASA
spacestation and controlling the activities of the "New World
Order" leaders via electronic microchip brain implants.....---> :) whee!!
:)

A close second has to be James Lloyd of christianmediadaily.com
An ex-rock musician that 'found jeebzus' and now broadcasts from a
studio someplace in Oregon. Predicted the end of the USA
and gave dates for it a few times. [his predictions bombed out
every time as expected] Has several others on his
network that shill or echo their version of blather. (currently on
shortwave)

Third is Elizabeth Border of The Divided Kingdom on 5.085
M-F at 10 PM Central time (11 PM EST) Here is a RARE
female Kookette that occasionally talks with a SOCK PUPPET (!!)
named Barbie on world affairs. Has to be heard to be believed.
This gal has to be on a heavy regimine of Luvox or Lithium or
the Brown Acid from 1969.

Fourth has to be Texe Marrs of World of Prophecy. A guy who
puts out outrageous and humorous conspiracy theories. Catch
him Sunday nights on WWCR. Been in the religion business
for 30+ years and is a consistent screwball. Very amusing listening.

"A human being cannot be created out of 23 chromosomes.
It needs 46. Sperm and egg must get together - and they
frequently do. Sperm and eggs are created by a special kind
of cell division called meiosis. Meiosis separates partner
chromosomes. As a result, sperm and eggs contain just

one copy of each chromosome - that's 23 in total.
The Human Genome has been described as the
'autobiography of the species', because our combination
of 3 billion DNA 'letters' is what makes us human.
But humans share a lot, in DNA terms, with other
species. 51% of our sequence is shared with the
humble Yeast Cell. 57% is shared with the common
Garden Cabbage. And a whopping 98% is shared
with the Chimpanzee....."

THAT SEZ IT ALL FOLKS!!

Here is some shortwave trivia for you......

Below is one of the first posts ever to this newsgroup. The first
post I could find was dated November 17th, 1989.

I wonder what Ralph Brandi and Richard Shapiro are up to today? One
should thank them for creating this group a long time ago.

Lloyd

Message 4 in thread
From: Ralph Brandi (ralph@mtune.ATT.COM)
Subject: Welcome to rec.radio.shortwave

View this article only
Newsgroups: rec.radio.shortwave
Date: 1990-04-01 12:20:28 PST

Welcome to the rec.radio.shortwave newsgroup. This group was created
late in
1989 after a suggestion by Richard Shapiro, in order for those of us
who are
interested in the hobby of monitoring radio communications to have a
friendly
place to exchange messages, tips, and opinions. If you are interested
in this
sort of hobby, then we think that you will be at home here.

This is a set of monthly postings put together to answer some of the
more
commonly asked basic questions about the hobby. There is a posting
explaining
some of the basics of shortwave (HF) radio, and one covering scanning
the
higher frequencies (VHF and up). If you find that you have other
questions,
either following up items mentioned here, or other questions, please
post.
There are a number of people here with varying degrees of expertise
and
experience who are more than willing to help. We hope we've
anticipated many
of the questions the beginner will have. And so, without further
ado....

o What is rec.radio.shortwave for?

As stated above this group was created for USENETers to have a place to discuss
the radio monitoring hobby. This group is not moderated, however 'serious'
arguments and any kind of flame wars are strongly discouraged. That is not to
say that genuine disagreement and discussion of differing opinions is not
welcome. We only ask that you keep the tone friendly, and in the spirit of
international cooperation upon which the hobby is founded.

This group is intended to be a place where ANY radio monitoring topic can and
should be discussed. We are happy to hear from posters who listen to any part
of the radio or microwave spectrum, from DC to daylight. We discuss topics of
almost any kind, ranging from (but not limited to) shortwave broadcasting,
scanning of all kinds, clandestine and pirate broadcasts, DXing small or
distant shortwave stations, utility and teletype monitoring, military
eavesdropping, the ECPA, station schedules, QSLing sw broadcasters, spectrum
usage, equipment design and modifications, antennas, receiver reviews and
recommendations, and many more.

Despite what the newsgroup name might imply, we definitely DO NOT limit
discussions to shortwave only. Those of you who are interested in scanners and
VHF/UHF/etc. will find that you fit right in.

For more in-depth answers to questions you may have, we direct your attention
to the postings entitled "Welcome to rec.radio.shortwave (Shortwave)" and
"Welcome to rec.radio.shortwave (Scanning)", depending on where your interests
lie.

I'm trying to decide what to buy for my first SW radio. I'm considering the Sony 7600GR or the Sangean AT-909. Can anyone give some pros or cons of each? Or suggest another? Maybe just personal preferences. Also, I will probably buy from Amazon(by far the lowest prices I've found), are there any fair warnings I should know about.

The Sony has a syncronous detector. This is a coveted feature that helps
very much with selective fading.

My first radio was a 909.

I wish it would have been the 7600GR. With it's synch, it is better for broadcast listening, which was the reason I got into shortwave in the first place.

Thanks for the information.I had been wondering if our American Troops during WW II had made any simple transmitters from whatever odds and ends parts they could scrounge up.Sort of similar to the radios they made from oatmeal boxes,razor blades,wire,thumb tacks,paper clips,pencils and field head phones.I like to read about things like that.

Hiya... I have a Sony 7600gr and I love it. It is a good performer in general and it has a ssb selectable sync detector. That feature really helps out for broadcast listening. It is also VERY good to use for medium wave (AM broadcast) DX'ing.

The 909 has a lot of great features too, but it does not have a sync detector and it is very well known for being a weak performer using only its whip antenna. If you can hook it up to a good external antenna, its performance is quite good to excellent. Given that it has so many other features, I think it may be a better radio in a lot of cases if you want to use it like a table top base receiver.

So... If you plan to use your new radio as a "portable" off the whip for broadcast listening, I'd choose the 7600gr. If you want to set up a nice external antenna and use a radio for dx'ing, I'd get the 909.

Still, that is not to say that you cant use the 909 as a portable off the whip or use the 7600gr as a table top base with an external antenna. The 7600gr is just better to use as a portable for broadcast off the whip and the 909 has more features that would make it the better choice to set up as a base receiver.

Foxhole radio used a razor blade for the rectifier, a safety pin and a #2 pencel led for cat whisker. The Gillette Blue Blade brand got their color from factory fire hardening which made the surface a semiconductor. Old stock blades are always available very cheaply on EBAY, I don't know where in the world else???. Authentic WWII era are single edge.

http://www.gizmodo.com/archives/images/ww2_foxhole_radio_planz.jpg

A jerry-rigged transmitter would generate hash up and down the bands, hopefully the radio police would punish }:-|

Back in the WW II years,some of the Swiss people used transmitters and to get the antennas up high enough in the air because of the mountains they used some big baloons filled with hydrogen or helium gas and the antenna wire was which was attatched to a baloon and the other end of the long wire was attatched to a home made reel which was usually made of wood,sort of like a big fishing reel.When they was through transmitting untill next time,they would use the reel to haul down the antenna.I read about that in a Saga magazine way back in the 1950's.

Here, the VOA can't send a QSL card to Dubuque, because it might promote a propaganda service to Americans. But Federal agencies are busy feeding "news" videos to TV, as if TV news doesn't already have sufficient credibility problems.

http://www.nytimes.com/2005/02/19/politics/19gao.html?

The New York Times
February 19, 2005
Administration Is Warned About Its 'News' Videos
By ANNE E. KORNBLUT

WASHINGTON, Feb. 18 - The comptroller general has issued a blanket warning that reminds federal agencies they may not produce newscasts promoting administration policies without clearly stating that the government itself is the source.

Twice in the last two years, agencies of the federal government have been caught distributing prepackaged television programs that used paid spokesmen acting as newscasters and, in violation of federal law, failed to disclose the administration's role in developing and financing them.

And those were not isolated incidents, David M. Walker, the comptroller general, said in a letter dated Thursday that put all agency heads on notice about the practice.

In fact, it has become increasingly common for federal agencies to adopt the public relations tactic of producing "video news releases" that look indistinguishable from authentic newscasts and, as ready-made and cost-free reports, are sometimes picked up by local news programs. It is illegal for the government to produce or distribute such publicity material domestically without disclosing its own role.

Mr. Walker, who as comptroller general is chief of the Government Accountability Office, Congress's investigative arm, said in his letter: "While agencies generally have the right to disseminate information about their policies and activities, agencies may not use appropriated funds to produce or distribute prepackaged news stories intended to be viewed by television audiences that conceal or do not clearly identify for the television viewing audience that the agency was the source of those materials."

"It is not enough," he added, "that the contents of an agency's communication may be unobjectionable."

Mr. Walker's letter was made available late Friday afternoon by Democrats on Capitol Hill. Asked for a response Friday night, the White House had no immediate comment.

The two best-known cases of such video news releases - one concerning the new Medicare law, the other an antidrug campaign by the Bush administration - drew sharp rebukes from the G.A.O. after separate investigations last year found that the agencies involved had violated the law.

Those cases were followed by disclosures that the government had paid at least one conservative commentator, Armstrong Williams, to promote the administration's No Child Left Behind education measure and had put two other conservative writers on the federal payroll to help develop programs. These episodes have prompted calls from Democrats for stricter oversight of the administration's publicity practices, which have cost millions of dollars of federal revenue.

In the Medicare case, a video made in the style of a newscast featured a spokeswoman named Karen Ryan who claimed to be reporting from Washington on Medicare law changes strongly backed by the administration but opposed by many Democrats, who consider them a windfall for the pharmaceutical and insurance industries. In part of one script, she said that "all people with Medicare will be able to get coverage that will lower their prescription drug spending."

Often there is an intermediary in the process: a public relations firm hired by a government agency to produce a polished video and direct other aspects of a publicity drive.

One centrally involved firm is Ketchum, a giant in the public relations industry whose representatives arranged for both the Medicare video and the contract with Mr. Williams, a pact that is now under investigation by three government agencies. Ketchum has received $97 million in government public relations contracts since 2001.

The G.A.O. letter did not caution agencies to curtail their publicity practices, telling them simply to adhere to disclosure requirements.

"Prepackaged news stories," Mr. Walker wrote, "can be utilized without violating the law, so long as there is clear disclosure to the television viewing audience that this material was prepared by or in cooperation with the government department or agency."

But Democrats said they hoped the letter would lead to tougher scrutiny of what they describe as an aggressive publicity machine within the administration.

"The G.A.O. is sending a clear message to the Bush administration: shut down the propaganda mill," Senator Frank R. Lautenberg of New Jersey said in a statement on Friday. "The G.A.O. is simply telling the White House to stop manipulating media, stop paying journalists and be straight with the American people."

Undoubtedly the buyer has been looking for a 150e for a while.

When a collector or someone who is looking for a specific item puts a value on something, they tend to include the value of time they've spent or are likely to spend looking for another one that's as nice as the one at hand.

It's possible this sale will bring more out of the woodwork, but I spent a couple years looking for an HF-150e before giving up and going for the larger 7030+ for my camping and vacation radio.

I wouldn't have gone as high as this one closed, but I'd have paid a premium to get one.

The point is that in this country it is illegal for the government to trick the governed, or to attempt to trick the governed. That is how totalitarians behave.

I don't know about the cabbage bit (or who The Socket Puppet is, for that matter), but that description of meiosis seems right, based on my dimly remembered high school biology. Human beings do, in fact, share a good amount of our DNA with most every life-form on this planet. That includes things like yeasts and molds.

Put in computer science terms, there is a lot of redundancy in DNA. This is handy because the environment that DNA is required to work within is pretty "noisy", and redundant information allows for errors/mutations without sacrificing overall intelligence/stability.

The 98% for chimps (most apes, actually) is a pretty accurate number based on well-established research. That 2% makes all the difference in the world in terms of morphology. Heck, the amount of genetic variation between individuals (of the same species) is often measured in fractions of a fraction of a percent.

4889. OT: amplifying surround speakers

Newsgroup: rec.radio.shortwave

Message-ID: <bjoSd.2878$Ba3.837@newsread2.news.atl.earthlink.net>
Source record: 8940

I'd like just a touch more volume from the surround speakers for
my old Kenwood Dolby Pro-Logic system. Because of the way
I have to situate the speakers part of the sound is muffled by furniture
between me and them (a high back sofa I sit on).

Is there a small (ac powered) amp I can get to place between the receiver and the
surround speakers to boost their volume just a bit? They're only 40watt
speakers so I don't need something monstrous.

front speakers ------ receiver -- amp -------------- rear speakers

Though my question is not SW related, I'm asking here because you
guys and gals know tons about lots of stuff... maybe a few of you can
give me a lead on this.

Thanks all.

>
Does the U.S. have it's house all in order then? No large facilities storing extremely dangerous material that recently failed multiple security checks? Any problems with civilians getting secret access to passenger jets during airport security tests? Do you need Canada to assist with that?

The point of terrorism is that it attacks so-called soft targets that most of us (in North America, anyway) have never had to consider before. Everyone will catch up eventually. The U.S. and Canada have always worked hard to keep the worlds longest undefended border open for trade and culture. We have a long, shared history of cooperating on mutually beneficial cross-border activities, including the sharing of intelligence information and security duties. Seeing that Canada is America's largest trading partner (and vice-versa) it makes sense for this trend to continue.

Dams and research facilities are big chunks of infrastructure that are incredibly hard to maintain. Changing any kind of process for these facilities can test the patience of Job (those of you in the military probably know exactly what I'm talking about!) and it can take a few revisions to work the kinks out.

However, the first rule of security is to make sure you know what you really want to accomplish with a new security system. Step one is to survey the existing process and determine all the weak spots you can. Then you publish this information amongst a team of security experts and draw up an implementation. And then you survey the process /again/. Usually this plan is in stages, so you can test and revise within a schedule, making sure you reach your milestones. There is nothing more dangerous than a half-baked security process that a.) may not actually do what you expect it to do, and b.) makes you think you are safe when you really aren't.

Case in point: <http://www.syslog.com/~jwilson/pics-i-like/kurios119.jpg>

In fact, we want to see more reports like this made public. This is what democracy and free access to information give us. The time to worry is when our watchdog organizations start reporting that nothing is wrong at all.

To segue skillfully back onto a relevant topic, I wonder if RCI has repeated the CBC report that (I think) broke this story originally? Ok, that was a lame segue, but I did my best to stay on topic.

You can complain to eBay if you get scammed like this. The seller agrees to charge "reasonable" shipping costs, and you are not expected to pay obviously inflated shipping costs even if you win the auction.

Anyway, negative feedback works both ways.

The problem (for me) is that I often don't know where the buyer lives until the bidding is done. Since I send stuff by post, the cost can vary greatly depending on the destination. I feel it's fairer to not charge a flat rate to the farthest destination when I might be selling to someone just up the street.

We may never know what caused this outburst. Could have been withdrawal from some drugs, legal or otherwise. Could have been the two fellow employees "had it coming" to them for some past action that will never be revealed.

Notice the wounded employees have their names withheld but the shooter is identified.

If there had been harassment in the work place the employer will cover it up, especially if it had been reported and nothing was done about it. It's called CYA - Cover Your A**.

It seems like people other than government employees can "go postal" as evidenced by this article.

Oh, Detective Sgt. Jeff Barnes said, "Lett had arrived at work and was disgruntled for some reason." No kidding!

Source record: 8950

I got my initial experience just experimenting with different designs from the ARRL Handbook, hobby radios in some of the electronics magazines, etc. I had 20 years experience as an electronics repair technician. In 1992, I decided to get an Associates degree in Electronics Technology at Triton College, in River Grove, Illinois. One of the classes I took over there was a speech class, so I decided to give a dissertation about radio systems. The first radio was nothing but an elaborate version of a crystal radio, except I used an op-amp with diodes in the feedback loop to have a low level precision rectifier.
It worked well, but I wanted more, so I gave my friend Dean Woodman, NB9Z a call. I can't tell you how many 2:00 in the morning phone calls I had with him concerning design problems. He was my greatest mentor, but unfortunately, he died in a fire about 4 years ago when some gang bangers burned his house down. Very sad story.
Anyway, I asked him how hard it would be to design a receiver that would have the system gain like a Collins 651S-1. He said "it's easy.....just use a couple of MC1350 I.F. ampliers, with a good mixer ahead of the system".
After that, I designed my first I.F. subsystem with these devices, but still, I had to devise and AGC system. After trying numerous designs, I eventually came up with one of my own, using a couple of op-amps.
Next, came the mixer.....my first mixer used a single diode with a resistive summing network. I never saw this design published, but I thought I would give it a try. I worked out pretty well, but I decided to give Mini-Circuits a try. I discovered that company in a Nuts and Volts advertisement. The SRA-3 mixer worked out pretty well, so well, in fact, that I decided to make a dual conversion receiver. I used ceramic filters from old broken CB radios, along with their crystal filters.
At this time, I didn't know how to design synthesizers, so I used a good signal generator as the 1st LO. I used a conventional Colpitts design as the 2nd LO, running it a 5mW into another diode ring mixer. The results were encouraging. A year went by, and I graduated with my degree.
As luck would have it, Rockwell-Collins had an advertisement in the Chicago Tribune for circuit board designers. It is pretty funny.....a week before that ad showed up I was telling my wife that Collins Radio Company would be a place for my dream job.
This turned out to be a very good move; there were extensive training classes on printed circuit board design, not only for signal integrity but also from the EMC standpoint. An example is when routing digital lines, using microstrip of the characteristic impedance of the digital devices. For instance, CMOS families have a typical impedance of 70 to 90 ohms. By following these guidelines, it is possible to design a radio that doesn't have digital hash getting into the RF portion of the system. Another thing I discovered when working over there was the concept of "filament growth",

whereby if two PCB traces are too close together and there is a certain potential, a filiment of metal can grow between the traces and short them out. This mechanism can also occur throught layers of FR4 material because the substrate has a certain amount of porosity.
Continuing on, Mini-Circuits came out with the POS-XX series of VCOs, so I thought why not give them a try.
I still didn't know anything about synthesizers yet, so I devised a circuit that used a 10-turn pot as the tuning element. I used three op-amps to develop the V_Tune for the low end of the pot and the V+X_Tune voltage for the high end of the pot.
By using a string of metal film resistors and switching them at different points along the voltage divider for the V_Tune voltage I was able to have a bandswitched tuning system that tuned in 3MHz sub-bands to cover from 0 to 30MHz.
After this design was completed, I met Gary Pershin, also of Rockwell-Collins. You may have seen his homebrew designs mentioned on rec.radio.homebrew. He said "Pete, why don't we design a synthesizer?" I told him that I didn't know how to do that, so he came up with a design that used an MC145152 parallel programmable system. I didn't want to use DIP switches to tune the radio, so I came up with a sequencer design that used an optical encoder to send a string of pulses to an array of 74190 counter chips. Gary came up with a good implementation to set the Asynchrous inputs of the counters to have a default startup frequency of 10MHz. Using an XOR gate, he came up with a good way to eliminate the tuning error when changing tuning directions with the Quadrature optical encoder.
He called me one evening and said "Pete, I have acquired synthesis!" We had our first synthesized receiver!
After I was at Rockwell-Collins for 2 years, I transferred to the Synthesizer Group, where I took extensive in-house classes about filter design, receiver design, and synthesizer design. These were graduate level classes given by some of the best folks in the industry, so I am grateful for this. When I was in the Synthesizer Group, I worked with some of the noted experts in the industry, so once again, I had the benefit of their years of experience.
The next design I came up with was a unit that used a Philips TDA1572 chip as the I.F. subsystem. This is the design that I had up on my website for awhile, after getting clearance from Rockwell-Collins to make the design public.
In the year 2000, my wife really got homesick for Chicago, so we moved back to our hometown and I took a job with Motorola, working with spread spectrum technology. I knew this wasn't the job for me, so I left Motorola and took a job driving a cab for several months; this allowed me to regroup. In June of 2003, I took a job with my present employer, and have been there ever since.
I do want to branch out and start my own company.....this seems the way to go. I have so many products that I would like to market that would be beneficial to the SWL community. The reason that I got interested in receiver design in the first place was because I got tired of the overpriced, compromised design offerings that were on the market. That is the biggest reason I set up my radio design website.....I wanted to share my designs for the world so they wouldn't have to go through all the

years of "paying the dues" and doing all of the research. It was a fun thing.
So, on a final note.....I only have a 2-year degree in Electronics, and 90% of my knowledge comes from on the job training, in-house design classes, and experience. When I finished my education at Triton College, I gave my favorite professor, Niel Volk, a super-duper MW receiver that had a tracking front end and a Mechanical Filter in the I.F. strip. When he said "Pete, I just don't know what to say", I said "oh, just tell me that this is a cool radio and that you will enjoy it".
Anyway, I hope this gives you a little bit of an idea of who I am and what I am about!

I looked for one as well, but largely because I overestimated the amount of front end overload I'd encounter on the standard 150. I live in NYC and hardly ever experience overload problems on my 150. I can't see spending more for a heartier front end.

Hello SWL'ers

Selling my R8B with VHF converter and MS-8 speaker. All equipment looks very good, operates even better. Cosmetically 9.5 out of 10 and operationally 10 out of 10. I have the original R8B manual and copy of VHF converter info, no original drake box. Selling to supplement my digital photography hobby. Questions direct to nmar@earthlink.net.

New price from Universal Radio is $1817 for this combo. I will ship it to your door in the continental U.S. for $1175 which includes professional packing and insured shipping. Will only consider trades for Nikon D70 body in same condition or Nikon digital camera accessories to reach the value of this equipment.

Goes to ebay on 2/26 if no one responds here. 73 and thanks for reading.

The US House of Representatives in America more than interestingly passed a bill on Wednesday which will certainly make broadcasters in America take note.

The bill, if approved by the Senate and then the President, will impose unprecedented fines on those broadcasting material that could be described as indecent.

The bill has been criticised as stifling free speech.

But the supporters of it are saying that stiff fines are needed to give deep-pocketed broadcasters more incentive to clean up their programmes and to help assure parents that their children won't be exposed to inappropriate material.

The measure was passed 389 to 98.

Perhaps that's why we haven't read about it.

The maximum fine will rise from 32,500 dollars to half a million for a company, and from 11,000 to half a million for an individual broadcaster.

The Republican from Texas who sent the bill to the house said "This is a penalty that makes broadcasters sit up and take notice ... this legislation makes great strides in making it safe for families to come back into their living room."

The White House said it strongly supported the legislation that "will make broadcast television and radio more suitable for family viewing".

Now the Senate is considering a similar bill.

It's said that when the differences are worked out, it will all go to President Bush for signature.

Opponents of the legislation say that they are unclear about the definition of "indecent".

Mention was made of Saving Private Ryan, the World War II drama, which several ABC affiliates in America last year did not air because of worries that violence and profanity would lead to fines.

I should say there are already mechanisms in America to fine people for a breach of broadcasting standards.

The Federal Communications Commission already has wide latitude to impose fines.

It can fine an individual company, a group of stations, an individual broadcaster.

Apparently last year fines totalled over 7 million dollars.

But all five members of the Federal Communications Commission, three Republicans and two Democrats, are in favour of greatly increasing the fines.

And this legislation allows the Commission to fine someone like, for example, a disc jockey, without first issuing a warning.

Now I'm sure there are many Australians who feel that we've got something to learn from this legislation.

Already under American law radio stations and television channels can't air obscene material at any time.

And can't air indecent material between 6am and 10pm.

The Senate bill varies from the House of Representatives bill by seeking to raise the maximum fine on broadcasters to 325,000 dollars with a cap of 3 million dollars a day.

Now people watching/listening to us often wonder how violence in language and action, physical, verbal and sexual, can parade at any time as entertainment.

And certainly is allowed under the umbrella of free speech.

The legislation seems to be telling people like us to tidy up our act.

Many who watch television and listen to radio would argue that the call is long overdue.

Alan Jones

But then how will Bush tell us about the next invasion of a sovereign foreign country? THOSE acts are REALLY indecent. Will the taxpayer have to pay the penalty incurred by the warmongers? Perhaps they'll invent a new word for what he does..like NeoIndecent in order to circumvent the law.

You hate the 'crap' on your voluntarily paid subscription television,
but you force yourself to pay AND watch it until next December...Do
you also force yourself to watch all those pay per view channels too?
You must really have strong will power to keep watching all the stuff
that offends you so much.

I could never be that strong, I don't watch TV any more. It's a
wasteland. Over three years and counting.

> flat Pacific atoll because global warming may test your swimming skills .

Actually, it hasn't rained all that much up here in northern California.
All the rain has been in LA. And it's because of a persistent low
pressure area parked off the LA coast-there's been no systems coming in
from the Pacific, so the Pacific NW has been low on rain.

As for Kyoto, it would be a good idea if the US signed it, but the
majority of the pollution comes from developing nations which aren't
covered. China burns coal for nearly all its electricity, but China
isn't covered by Kyoto. And weather isn't an isolated phenomenon-what
happens in one place may affect climate on the other side of the world.
For Kyoto to really be effective, it would need to cover the entire
planet. That's still no reason not to sign it, though.

I read that if the sea level rose three feet, that the Florida Keys and
most of South Florida would be drowned, leaving Miami perched on a small
strip of land jutting into the ocean. That would also drown most of the
islands in the Pacific, leaving the residents with the unenviable task
of swimming to Australia. Already Eskimo fishing villages in Alaska are
disappearing beneath the waves. And we don't know what will happen next,
since we don't fully understand the planet's climate yet.

I tried making a foxhole radio when I was a kid from plans I found in a
1950s book. I never could get it to work, though. Probably because I had
a modern razor blade, the book didn't mention anything about the
specific brand of blade.

Hi Tianli,

Yes, there's DX you can catch within a short distance of the coast that is virtually impossible inland. On mediumwave, you can catch some countries that are no longer on shortwave, such as Fiji, Tonga, Tahiti, the Marshall Islands, and the Cook Islands, to name a few.

Which reminds me... if you'd like a taste of the broadcasting of Radio Cook Islands, you can listen to two MP3 recordings I made when I was in Rarotonga in 1993. Check out the files on Chris Mackerell's (NZ) Web site: http://www.owdjim.gen.nz/chris/radio/DXSoundBites/R_Cook_Islands/

73,

Guy

I had a really small basic program for the Vic-20 and C-64 that would
do a respectable job of Decoding Morse. It couldn't have been more
than twenty lines long. There were also rtty decoders available.

http://www.mods.dk/view.php?ArticleId=1038

A really blurred schematic for an interface is here:

http://www.mfjenterprises.com/man/pdf/MFJ-1225.pdf

A mention of two CW programs are made here:

http://64.233.167.104/search?q=cache:8UalN6740J0J:www.schmarder.com/dave/+%22vic-20%22+morse+%2Bcw+download&hl=en

OR:

http://tinyurl.com/5736e

The above site is being worked on, so I posted the cached version.
A huge list of sites, referred to by the previous page:
http://www.geocities.com/CapeCanaveral/Hall/8701/hamlynx/hammisc2.htm

This site has a morse/Telex decoder program forthe Vic.

You guys really need to dispose of those WebTV units. Cuhulin's post was -not- the first in the thread. That's evidenced by the fact that the thread title mentions left leaning political views and sobriety, and cuhulin's post talks about how much Budweiser he drinks and that he's a confirmed Republican.

"I drink a six pack of Budweiser each week.I am and I always have been and I will always be a,REPUBLICAN."

I was aware that he was quite ill recently, as I viewed him on the net 15 days ago, and he was obviously very ill then. For the time being, Ms. Scott said that the broadcasts will continue, and that next Sunday,February 27, a farewell servie will be held for the 75 year-old pastor.

Those old simple computers like the Comodore, Radio Shack Color Computer, etc., will work fine as a dumb terminal along with a radio modem or other decoding device. They just need a serial port, enough processing power to load some kind of comm software and display basic text. I used a Coco 16 that had been bumped to 64k and a faster clock along with a tape drive, home brew RF modulator and a 40 character screen. The CoCo worked great along with an AEA PK232MBX for several RTTY modes and cw.

Looks like the fucking idiots in the crook house of rep once again are tryingh to dictate what is "family viewing" Screw them, if you don't like what you see on TV you have the option of hitting the "off" button, but most people are too fucking fat, lazy and stupid to even hit the off button on the remote.

It is the responsibility of the parent to tell there child about what they may happen to see on TV, all of a sudden the gov't now has to raise someones kids. Welcome to the new nanny state.

All those 'politicans who voted "yay" can kiss my American arse and die. They are scum and do not truly represent the true American ways, but more or less a highly corrupt agenda based on control and not freedom.

He was diagnosed with prostrate cancer about 4 years ago. Doctors told him it was the worst kind one could have and he needed an operation and chemo right away. He instead went on a herbal / vitamin diet and insisted he had been healed. He actually was doing fine up until about 6 months ago when he started having severe nausea spells. In the last month he tried medical procedures in Mexico, but everything failed. He finally suffered a stroke last week and never regained consciousness. I believe the doctors only gave him 5 years even if he went ahead with the operation and chemo. He didn't and lived almost 4, so he beat the odds.

His wife, Melissa, is to take over the church as pastor, but the consensus seems to be she's not strong enough to hold it together. If anyone is really interested in what's happening, go to the newsgroup alt.fan.gene-scott. Lots of activity there right now.

My prayers go out to Dr Scott's family and followers and may they find peace.

When he was on a local channel on Sun night, I always cracked up when he
would lecture the viewers when they didn't cough up the cash, and then
say, "I'm disgusted with you, play the damn music!!" Then there would be
a half hour of his Jack Russell Terriers playing, or his wife riding her
horse. Then he would come back on and look at the camera for a while,
and mutter a few words, and then, the dogs would be playing again.

Message-ID: <JUxSd.39856$wi2.8871@newssvr11.news.prodigy.com>
Source record: 8981

I can't seem to find a good detailed review of the Sony AN-LP1. If anyone owns one could you please comment on it's performance especially compared to a random wire. Is it more of a noise amplifier or does it do a good job of keeping the floor low? Also, if you know of reviews I cannot find I would be happy for the links.

Thanks very much.

This is EXCELLENT NEWS if it can be confirmed.
Yes folks, another charlatan TV/Radio 'mercan preacher
assumes room temp because he allegedly didn't want prostrate
treatment cause it may have crimped his style and as a result
the cancer ate him starting from the balls upward....????

Well folks, now the real fun starts!!!

Who will be his Successor designate ?
Has there been any hints of a pending
Jonestown or a Heaven's Gate type
mass-apeshit in La yet....?

But most important of all ----> Where did all the MONEY GO BEFORE HE
CROAKED?

And now, if Y'all will excuse me, I'm goin over to alt.fan.gene-scott to
enjoy all the wailing and gnashing of teeth over lost financial gifts.....

I used to watch him on UHF in the early 80's for purely entertainment
purposes. He had a suit that looked like he bought it at Col.
Sanders' estate auction Until a few months ago I didn't even know he
was still around.

It's still coming in loud and clear in eastern NC at 05:00 UTC. Lots of music and an announcement. At 4:30 today Dr. Scott when home to be with the Lord. (didn't say 4:30 where -- assumed Pacific time)

Going to give a "send off celebration for Dr. Scott" . . . .

Will continue to broadcast the program with Dr. Scott's messages. Sounds a bit like Oliver B. Green's, Katherine Koulman's (? sp) and a few others' ministries.

I expect it will continue for a couple years or more with gradual dwindling of the income and thus the broadcast outlets. This is the way some others seem to have gone.

Same situation when Bro. Stair passes. Expect it to continue for years.

Point: Don't expect too much air time to be "freed up" right away! :-)

I'd go with the 7600GR because of it's sync' detector. The 909 is a
close second because it has a tuning knob, but no sync'.

There are still too many unhandled threat situations in the US so I
don't think we have the time or resources for taking care of foreign
problems.

I'll keep my big mouth shut for a few days.

Man we are getting the rain in the LA area. I just got down here about
3pm and it has rained in belts all afternoon and so far tonight.

I have seen rain when I lived in the Houston area but it's the run off
from the hills and mountains that is tearing everything up. I was sure glad
I was in my old four wheeler, I drove through 6 inches of water many times
on the way down here on 395.

From: Al Patrick <arp@_NOSPAM_inet4u.com>
Message-ID: <111ligr19m9rb9e@corp.supernews.com>
Source record: 9004

By now all of you know that Dr. Gene Scott has passed, but guess what? All of US are going to pass away also. It is appointed unto man once to die AND AFTER THAT THE JUDGMENT! Heb. 9:27

The righteous are REQUIRED to tell the wicked they are going to die. Eze. 3:18

The Christian is better off dead because he is with Christ and no longer concerned about possibly failing and denying Christ here on earth. Phillipians 1:23.

The non-Christian needs to be greatly concerned about dying before accepting Christ for there is NO OTHER WAY to the Father in heaven. John 14:6, KJV, "Jesus saith unto him, I am THE way, THE truth, and THE life: no man cometh unto the Father, but by me."

Some of you rejoice at the death of Dr. Gene Scott. Many Christians rejoice with you for, if he was truly a Christian (only God knows the heart), he is far better off than he ever was here. ... Even before he got prostate cancer. See Phil. 1:23.

Ah, the Commodore. Those little guys were fun to tinker with, and some of the things they could do were years ahead of what the PCs of the day were capable of. I had software that would decode Morse and rtty but dumped it all a long, long time ago.

Commodore BBSes were always the coolest ones to log onto - great BBS software like ImageBBS looked better than the stodgy interfaces you saw on PC boards, and all the really cool "doors" came out for the C= boards first.

I returned the R8 that I bought from Grove in 1991 for $950 because the
sync' was so finicky. I wait about seven years for the R8B, which has a
superb sync' detector. I also have an SW8 with selectable sync'. It
works great.

Thanks for the great reply Pete. You are doing some extraordinary work considering that you started with a two year degree. It shows that good mentoring and job training are just as important as formal education. I went to a four year college for electrical engineering but you obviously know more about receiver design than I do. Of course when I was in college integrated circuits were almost a new technology. :-)

> her passing on to be with Christ - FOREVER!

Yes Al....I am sure that Christ, if he does exist, will welcome
Dr euGene Scott (the guy who lived on a multi-million dollar
horse farm, owned a small CA winery and lived like Hugh
Heffner while he ordered his follows to "get on the telephone")
into the pearly gates......

NOT!!!

"But there were false prophets also among the people, even
as there shall be false teachers among you, who privily shall
bring in damnable heresies, even denying the Lord that
bought them, and bring upon themselves swift destruction.
And many shall follow their pernicious ways; by reason
of whom the way of truth shall be evil spoken of.
And through covetousness shall they with feigned
words make merchandise of you: whose judgment now
of a long time lingereth not, and their damnation slumbereth not."
- 2 Peter 2:1-3

(If that passage above don't describe the
late Dr. euGene Scott to a tee...then I don't know what does!!!!!)

"...and he looked up, and saw the rich men casting their gifts into
the treasury, and he saw also a certain poor widow casting in
thither two mites, and of her he said, 'Of a truth I say unto you, that
this poor widow hath cast in more than they all, for all these have
of their abundance cast in unto the offerings of God, but she of her
penury (poverty) hath cast in all the living that she had"
- Luke 21

...a rich man asked Jesus, "What is required for eternal life?" Jesus
replied, "Follow the commandments." The man told Jesus that
he had always kept the commandments and wanted to know
what else was required. Jesus then told him, "If thou wilt be
perfect, go and sell that thou hast, and give to the poor, and
thou shalt have treasure in heaven: and come and follow me"
(Mat. 19:21). The man walked away very sad because he
was wealthy. Jesus told His disciples, "And again I say unto
you, it is easier for a camel to go through the eye of a
needle, than for a rich man to enter into the kingdom

of God" (Mat. 19:24).

I still have my Commodore 64 and the floppy drive for it. I just recently threw out the first computer I ever built the Sinclair ZX81. I remember taking like 20 min to type in a software program for a game. I was also on the internet way back then using a company called Q-Link which was later bought out by a company called AOL. Those were the days...

Same here. I get the same overloading on *one particular frequency as I do on my other radios so that's the extent of my OL problems. Aside from that station, all is well. Now I would have liked the backlit display on the 150E, but so far I enjoy the rig without it.

I have also read some of these 150e's have quality control problems. I've read about noises appearing on the E that did not reproduce on the original. I also read they are not as sensitive and the knob doesn't feel or turn like the old one either. In fact, one guy wrote the knob actually moved down on it own it was so lose. I'm glad I have a good condidtion original that was built by Lowe for sure.

The one reason I haven't bought a remote control for my 150 yet is that I love the way the dial feels and rotates. It's a pleasure to use it to lock in a station. I do have the keypad for it to jump around but I find the "Fast" button on the 150 is just splendid. You can go where you want in a flash. In all the reviews for the 150 {whch are not many} I have read, not one mentioned this fast feature but gave the impression you would have to turn from one end of the radio to the last all day long.

Funny that if Steve didn't write Frank about the radio not having the name Europa across it, he wouldn't have taken it off Ebay and relisted it without a Buy It Now option for $595. Next look for frank to list the keypad separately for it.

Lucky

I remember a "preacher" with a bushy beard on UHF about the same time.
He would sit right in front of the camera smoking a huge stogie and
rant about how the broadcast would stay in his face until someone
called in and donated $10,000. Is this the same kook?

Hunter S. Thompson

in the same month the planet gets to know the 'journalist' James/Jeff Guckert/Gannon, Hunter S. Thompson decides to make The Big Bit-Spit and eject from the planet. This could be sacrilege, and I hope his family will forgive me, but there is something wretchedly fitting in the confluence.

Hunter was a drunk and a drug-sucker. He would go to cover an event and slather himself with LSD. He went to the '72 GOP convention as a wild-eyed liberal and elbowed his way into the activist bullpen, grabbing a sign reading 'Garbage Men Demand Equal Pay' before charging the floor with the Nixon-shouters to howl "Four More Years!" at John Chancellor.

He wanted to write about motorcycle gangs, so he went out and joined the worst of them, and got his ass stomped in. And wrote about it.

Amusing, then, that Hunter decides to cash his check in the same week we learn about James or Jeff Gannon or Guckert or whatever. What would Thompson have made of this feeble wretch? Of a man who reports on the White House with a fake name? Who was so clearly the go-to guy for McClellan or Bush when the questions got too hot? Who copied and pasted his 'news reports' from boilerplate GOP press releases? Who somehow got within 20 feet of the President of the United States using a false name while peddling his wares online as a male prostitute for $200 an hour?

Hunter once wrote in 'The Great Shark Hunt' about walking in on two Secret Service agents sharing a joint back and forth in a hotel room. Maybe that's how Gannon/Guckert/Whoever got within pistol range of the leader of the free world. No other explanation seems to satisfy.

It comes down to this. The Bush crew has been caught in bed with the proverbial 'live boy.'

Someone in that White House either eased Gannon/Guckert/Whoever through the 'hard pass' application process, which requires a thorough background check, or else smoothed the way for him to get day pass after day pass after day pass.

Some complain that Gannon/Guckert/Whoever is being victimized for his political views. This misses the point. Someone let a working, advertising whore into the White House, and then was stupid enough to let him walk around alive and free after he blew his own cover. That's the point.

The other point is that you conveniently used the death of Hunter S. Thompson to segue into a little rant about something totally different.

You are truly a 'tard boy and a shining example of what is wrong with liberals.

Next time you're sucking cock I really hope you choke on it!

I know that the scripture quoted is true. I DON'T know Dr. Gene Scott. As many times as I ran across him on the dial I very seldom stopped to listen to him. I do know that a few on this group would rejoice at the thoughts of the death of any true Christian.

Again, I can't tell you if "that" described Dr. Scott or not. I suspect it describes a number of radio and tv preachers! ....as well as a number of them who are NOT on radio or tv! :-(

But you left off the most important part of that passage!

Matthew 19:25 When his disciples heard it, they were exceedingly amazed,
saying, Who then can be saved?
Matthew 19:26 But Jesus beheld them, and said unto them, With men this is
impossible; but with God all things are possible.

You seem to have issues with linear thought.

Once again: propaganda is illegal, immoral, and ultimately harmful to
we the people. Bush, nonetheless, insists on employing it. He is a
traitor. His supporters would be traitors too if they weren't so far
removed from reality as to have an insanity defense.

The fires of Hell have been stoked to their highest
and Satan's minions are dancing with glee as
a major religious fraud of the century
and vile polluter of Shortwave Radio, Gene Scott,
goes to his infernal reward.
Can "Brother Stare" be far behind?

I know they'll be playing his drivel on
shortwave for some time yet, but without
the shepherd, the sheep will soon disperse.
I'll bet a couple of SW broadcasters are
sweating over their balance sheets today.
GoodBye, Gene Scott- swindler of the fearful
and weak- master huckster for Jesus.
And good riddance....

Dave S.

That's really too bad. I found Dr Scott to be an excellent entertainer.

For some reason, 6.090 is the strongest signal on SW most nights for me, and his show usually catches my ear with his killer bumper music.

Dr Scott was a lot like Rush. A consummate radio professional, who charmed you into loving him, no matter what his message happened to be.

I do hope his followers didn't actually send him all that money he kept demanding. Hopefully they had enough sense to see through his insane pleas.

I will miss the Good Doctor.

I'd imagine that they thought that way once the big online
services started getting access in the early-mid 90's. I
remember the crap hitting the fan when AOL (and there was
another one before them) came on board the newsfeeds.
At the same time, several people on a couple of the other
ng's I've read in the past wouldn't have been there without
the blanket access of an AOL or MSN, so you take the good
with the bad.

says...
> By now all of you know that Dr. Gene Scott has passed, but guess what?
> All of US are going to pass away also. It is appointed unto man once to
> die AND AFTER THAT THE JUDGMENT! Heb. 9:27
>
> The righteous are REQUIRED to tell the wicked they are going to die.
> Eze. 3:18
>
> The Christian is better off dead because he is with Christ and no longer
> concerned about possibly failing and denying Christ here on earth.
> Phillipians 1:23.

So you claim..proof.

The bible is not proof Al! A book can say anything.

>
> The non-Christian needs to be greatly concerned about dying before
> accepting Christ for there is NO OTHER WAY to the Father in heaven.
> John 14:6, KJV, "Jesus saith unto him, I am THE way, THE truth, and THE
> life: no man cometh unto the Father, but by me."

So you claim, I'm not really worried, I'll just be worm food, like you.
You probably aren't going anywhere...except into the ground.

>
> Some of you rejoice at the death of Dr. Gene Scott. Many Christians
> rejoice with you for, if he was truly a Christian (only God knows the
> heart), he is far better off than he ever was here. ... Even before he
> got prostate cancer. See Phil. 1:23.
>

I thought he was amusing. Most all the other preachers are slimeballs at
best, so I'm not rejoicing he's dead, but I don't think there's any
reason to be happy about it...and prostate cancer can be a bad way to
go...

>Weren't you experimenting with crystal radios a year or two ago?
Generally,
>repair is easier than homebrew.

Yes, but a crystal radio is far less involed than something you plug
in! :-)

>Nearly all single conversion superhets align using the same simple
>procedures. I think the DX-160 service manual is online, and the ARRL

>handbooks have some good straightforward alignment instructions.

>You can even do excellent alignments without a signal generator, if
you have
>digital readout receiver to read the radio's local oscillator
frequency.

>However, the radio may be aligned about as well as it can be.
Generally,
>the dial readout is exactly correct at two or three points on the
dial, at
>best. There are usually areas in which the dial readout doesn't
perfectly
>track with the received frequency probably because the tuning
capacitor/
>coils don't exactly match the prototype they developed the original
dial
>from.

>Anyway, if you want to give it a try, I'm sure you can get some help
here.

>Frank Dresser

THEN...

>>looking at the schematic, it's got a ceramic/xtal/mechanical(?)
filter
for the first IF, so you can't really screw up the tracking by shifting

the IF like you could with an all LC tuned IF.

What I'd look for first is to see if the dial pointers haven't shifted
on the cord(s). <<

Mark Zenier mzen...@eskimo.com Washington State resident <<

Mark and Frank - the frequency aligns correctly near the lower end of each band - for example, on the 4-12 MHz band, WWV shows up at virtually dead-on 5 MHz. At the upper end of the band, however, WWV is off by *about* .6 MHz from 10 MHZ (depending on what the radio ate for breakfast), and things are a bit worse on signals near 12 MHz. The same is proportionally true for each of the other bands.

The bandspread dial, when used, is off by varying degrees from one end to the other, ranging from nil to about 15 or 20 khz.

I have some instructions for fine tuning these ranges using the band-specific coils within, but thus far I simply haven't had the nerve to touch them. Someday I may, but I am content for now to be primarily a listener rather than a tinkerer.

5049. THE ULTRA ADVANCED PSYCHOTRONIC MONEY MAGNET

Newsgroup: rec.radio.shortwave
Date: 2005-02-22 15:51:52 UTC
From: ormusalchemy@aol.com
Message-ID: <1109087512.381531.280720@z14g2000cwz.googlegroups.com>
Source record: 9048

Life Technology Research International®
www.lifetechnology.org
email us at: ormusalchemy@aol.com for more information

The Psychotronic Money Magnet☐ Ultra Advanced Version 1.0
The Ultimate in Causal Engineering Technology
www.lifetechnology.org/ultramoneymagnet.htm

Through the aid of spiritual guidance given to us by the higher forces we have discovered a uniquely different and improved method of creating our well known Psychotronic Money Magnet☐ .The new method was delivered to us through an exceptionally gifted channel and we were astounded by the information that we were privileged to have received. According to the information the new method which we are adopting can raise the subtle energy characteristics and the manifesting capabilities of The Ultra Advanced Psychotronic Money Magnet☐ more than one hundred fold.

According to numerous testimonials this powerful device has certainly proved that it has the power to change one's financial situation for the better in the shortest possible time, and it is without doubt the most powerful and successful money generating talisman of all time. The sole function of The Ultra Advanced Psychotronic Money Magnet☐ is simply to create opportunities for it's owner to gain money and prosper financially. The longer one possesses this unique cosmic money magnet , the stronger it will become, and the more money it will draw to it's owner.

We have been using this device ourselves for some time now and experienced a massive increase in company income and profits just a few days after the first creation of The Ultra Advanced Psychotronic Money Magnet☐ .We have been exceptionally blessed by the higher forces and in particular by the wisdom of The Archangel Mikhail.

Originally Life Technology Research International® had listed these devices as Psychotronic Generators☐ designed to be programmed for various different types of archetypal energy (trend) ,but when we became aware of the massive demand for the money and wealth programmed Psychotronic Generator☐ it was decided to being marketing The Psychotronic Money Magnet☐ as a specifically programmed stand alone device. It is only now that we have been given specific information to create a magical tool that will quite simply transform ones life.

Could The Ultra Advanced Psychotronic Money Magnet☐ become the most powerful metaphysical tool ever created? It is our belief that the most

significant difference between this device and other forms of magickal talisman or life changing catalyst (eg NLP ,Huna , Hypnosis, Kaballah , Magick etc) is its passive mode of operation, ie no conscious input is required from the user, and unlike many other talismans the device will function optimally without any necessity for a certain belief system on the part of the user. The Ultra Advanced Psychotronic Money Magnet□ is so powerful in fact that it will override the belief system of the most hardened sceptic, and will reverse the mindset of the most pessimistic belief system.

Life Technology Research International® has taken this technology of 'Causal Engineering' and using methods based on the developmental work of Pavlita, Rifat , Fortune and many hours of Russian Psychotronics research we convert quartz crystals to Psychotronic Generators□. They amplify, produce and direct bioplasmic energy to modify quantum mechanical collapse, changing the course of events in the macroscopic world. This device uses a multiphase set of fields which apart from altering events, inculcate a theta rhythm of around 7 to 8 Hz, the natural theta frequency of the planet being 7.82. This frequency is the Schumann Resonance, the doorway to the world of causal engineering, ie consciously creating and manifesting ones desires.

The Ultra Advanced Psychotronic Money Magnet□ acts by establishing a new pattern of financial abundance in the subconscious and subtle energy fields of the user by harnessing the lifeforce and wealth enhancing powers of the Hebrew letters of the Kaballah. It is widely recognised in esoteric science and by academics such as James Hurtak and Stan Tenen among others that Hebrew letters through their specific mathematical structural geometry contain information that encodes life force energy, ie it provides an intelligent template for natural creative forces. It is these magical primal creative forces of The Kabbalah that we harness and focus in the preparation of The Ultra Advanced Psychotronic Money Magnet□

In the 1920's it was discovered that quartz crystals resonate at 32,768 khz. Seeing that the Great Pyramid of Khufu or Cheops Pyramid, is made mostly of limestone, which stone crystal matrix is mostly quartz, It is proposed that the entire pyramid operates as a conciously programmable cosmic biocomputer or radionics device, a massive Psychotronic Generator□ originally capable of harnessing and directing the focussed intent of the Egyptian priests who were its engineers .

The fact is that everything in the universe vibrates and oscillates. Therefore the connecting link between all forms of energy is vibration, sympathetic harmony and resonance. By studying and applying the principles of vibration we are enabled to see beyond material matter and into the primary creative forces of nature. Utilising the information from diverse fields such as Radionics, Psionics ,Psychotronics ,Quantum Physics ,Sacred Geometry, Sonics ,music and metaphysics has led to an understanding of how the human mind can interact creatively with the material universe.

Essentially, when the biotronic matrix of The Ultra Advanced Psychotronic Money Magnet☐ interacts with the conscious will of the operator it causes subtle changes to occur in the microcosmic universe which translates to manifestation in the macrocosmic universe (real world).

This device will naturally induce a theta state in the user as it alters reality to make money, wealth, abundance and affluence etc. more probable. The Ultra Advanced Psychotronic Money Magnet☐ is charged with the specific programming described above ,or may be programmed with your own specific intent. On request, Life Technology Research International® creates Psychotronic Generators☐ to generate any operational trend field which will facilitate the materialisation of any wish.

The Ultra Advanced Psychotronic Money Magnet☐ may be used in each of the following ways:
Place on a desk or on a bedside table for passive functionality, no input from the user is required.The device is an ideal size to be carried in a pocket or kept in a handbag. It is better that the device should be kept as close as possible to the user, ideally within 2 meters.

The device may also be kept under a pillow while sleeping where archetypal information will permeate and influence the subconscious mind ,or held in the hands or placed on the body while meditating. While relaxing or meditating it is an excellent idea to hold the crystal in either or both hands and focus positively on areas of ones life where positive financial change could occur, ie ones job ,business practices ,salary level etc. Create a mental movie and visualise achieving a wealthy ,prosperous state of existence. In any form of conscious subtle energy manipulation, results will occur through the artificial enhancement of natural processes. It is therefore important to recognise the new opportunities that you will attract to your life which will direct you towards a new paradigm of wealth and prosperity.

Ordering
The Ultra Advanced Psychotronic Money Magnet☐ supplied is the highest grade clear rock quartz . Please note that this is the much more powerful version of our other Psychotronic Money Magnet☐ for sale at our site and other auctions for $90. Each Ultra Advanced Psychotronic Money Magnet☐ comes with instructions for use. Each individually created Ultra Advanced Psychotronic Money Magnet☐ is priced at $180 US dollars. International shipping is priced at $10 US Dollars.
Shipping Insurance is optional.

Our 100% customer satisfaction rating at ebay indicates how pleased our customers have been since we began supplying our metaphysical products there. Please visit The Life Technology Ebay Store at http://stores.ebay.com/life-technology

This product may be of interest to students or practitioners of Alchemy ,Kabbalah, Reiki, Homeopathy, Healing, Buddhism, Shamanism, Pagansism, Rife Therapy, Chakra Therapy, Witchcraft, Antropology, Wicca, Magick, Huna, Hypnosis, Nlp, Rosicrucianism, Mysticism, Radionics, Psionics and Psychotronics etc.

The same comment could be made about guys that pay $800.00 for a Sony 6800W, $3,000 for a Sony 320, $5,000 for a Panasonic FR-9000 or $100.00 for a Radio Shack DX160 or $30,000 for a wooden cased floor radio from the 1930's. Most SWL's looking for a radio to use would pay far less for a used Kenwood R5000, Icom R71 or Japan Radio and get a lot more performance for their money.

The guy may be a collector and as we all know collectors are governed by a whole different set of rules than users. And if the guy is from Japan, they have a propensity to bid the sky to complete a collection.

Beer isn't any problem,as long as people who drink beer (and other alcohol beverages) can handle it responsively.We still have open borders to the South of us and it isn't just some Mexican's coming across there illegaly,there are people from all kinds of Countries sneaking across our American borders,North,South and in every and any kind of ways they can.I have read before that some of them are terrorist too.

Yes, Dr. Scott always struck me as an honest man.

I remember watching him on TV back in the 80's - he'd be showing off his latest gold lighter, or his horses, and he was very up front about the fact it was none of your business what he'd do with the money you had better send if you wanted him to continue.

I suspect many of the folks who listened or watched him did it for a goof - he was entertaining.

Several people have noted that they use the same external supply from Radio Shack that I tried, and without a noise problem. This makes me wonder if the problem is with something *other* than the power supply itself. Is it possible that the copper wires running from the binding posts of the power supply to the spring clip terminals on the rear panel of the R8B are the real problem? In other words, could they be acting as antennas and picking up the noise I hear? If so, then the problem would persist no matter which external power supply I used.

I own one and use it with my Grundig YB-400PE. I think it does a good job, but usually only on the signals that are somewhat strong to begin with. I live in a very electrically noisy apartment building, and I find it enhances the listenability of signals that are already coming in somewhat decently. I don't think it does a good job on SSB or DX signals. If I had the ability, I would run a wire outside. I think that would give you a much more listenable signal, as the AN-LP1 tends to amplify RF noise quite a bit. I'm not sure what receiver you have, so your results could be different from mine.

I hope I don't sound like I'm bashing the Sony...I think it is superior to a simple indoor reel antenna (the kind that comes with most portables). But it does have its limitations. If you listen to primarily programs being beamed to the US (or wherever you live), then the Sony will probably do a good job.

From:

http://stephan.win31.de/sony7600.htm#an-lp1

~~~~~~

The AN-LP1 antenna

In January of 2004, I finally obtained a (used) AN-LP1 antenna, a project that had once been terminated after the decision to get an AR7030. Now the AOR isn't exactly a portable, so... My AN-LP1 (JFTR: S/N 15243) had been modified quite strongly by the previous owner who, among other things, removed the cloth (for better handling, I suppose), wrapping something around the wire and frame - well, a "naked" AN-LP1 doesn't look exactly pretty, but reception is unaltered. So, what about a little review?

Handling: I got the folding twist right virtually on the first try (after use, the antenna has to be folded together again, which had been reported as being a bit tricky until you get the hang of it), though it's quite possible that it would be more difficult with a stock antenna frame. Operation is quite simple: Unfold antenna module and attach it somewhere (that's a bit of an unsolved problem on this antenna, you can clip it somewhere and attach it to windows and such, but that's about it), connect antenna controller to both antenna and receiver (if you were wondering what the somewhat strange-looking longish part is, that's a filter into which you plug in the cable from the antenna controller on one end and connect the thing to the antenna frame with the other end), put in two AA batteries into the antenna controller (I used rechargeables, since I didn't have anything else at hand, and these work pretty well, with the switchoff voltage being roughly 2.3 V) if not already present, and off you go. At least if you have a receiver with a "hot" EXT ANT socket, like the ICF-SW7600G(R), ICF-SW100 or ICF-SW1000T. On others, it's necessary to explicitly turn the antenna controller on with the respective slider switch. While receiving, it's necessary to select the correct frequency range for best reception.

Reception: That's what we bought this thing for, right? And so far, the AN-LP1 has not disappointed me. One must know, of course, that it's only good for the frequency range from about 80 meters to 13 meters, with a preference for the lower frequencies. There the antenna really shines, with signals that are a lot stronger - say, 20 dB - than just with the whip (even when using an antenna tuner, [ADDX-PRE-1]), and usually cleaner than the signals of a tuned whip + AN-71 combo. Also, the preselection helps a lot to minimise IM (like on 80 and 22 meters,
~~~~~~

where at the time of testing the wire overloaded the receiver on the respective frequencies), and with the apparently rather sharp 5 MHz range, images from 49m on 60m (a nuisance of the 7600G) are considerably attenuated. (19m images on 20m are strong as ever, but you can't have everything.) Minimising interference by rotating the loop is also nice. Performance, while still good on 16m, is no longer stellar on 13m, where the difference to the whip + tuner is no longer that huge.

All in all: Recommended. If you need better reception "on the go", the AN-LP1 makes a good travel companion. (And not only that - it'll also deliver good performance at home and with the receiver used on a wall wart. I've retired the AN-71 for now.) Unfortunately, its availability has never been too great (apparently it's only being made once in a while, in small batches), and the price may also seem a bit deterring, given it costs about half as much as an ICF-SW7600G(R) when new.

~~~~~~

P.S. : I own one, very worthwhile purchase..

NOT a noise amplifier; has a noise filter & several other pre selector features.

Goes with me & my Sangean 606A everywhere

Pick up passport to worldband radio,
theres a detailed review in there..
~~~~~~

You're combining two different things from two different postings.

The point is that the VOA is prohibited from interacting in certain interactions with U.S. citizens and residents because Congress didn't want to create a domestic propaganda agency. (By the way, note the sponsorship scandal in Canada.)

I had thought it included QSL cards but apparently not. But, for example, when they have contests, you always hear that this contest is not open to citizens or residents of the U.S.

On the other hand, the Bush administration has been making "news" segments for local stations and distributing them to U.S. TV stations without disclosing their origin and agenda.

http://dosfan.lib.uic.edu/usia/usiahome/overview.pdf
(USIA publication)
(Page 36)

[quote]
Since its founding, USIA has been
prohibited by Congress from directing its
informational programs toward its own
citizens. By design, under the United States
Information and Educational Exchange Act
of 1948, USIAï¿½s informational programs
have been directed only to overseas
audiences. An amendment to that act in
February 1990 authorized the Director of
the U.S. Information Agency to make
certain products available to the Archivist of
the United States for domestic distribution.
Motion pictures, films, videotapes, and

No, but I don't think I need to. The noise is *only* there when I use the external power supply.

I don't really mind using the Drake's internal power supply, but I suspect an external supply would cut down, at least a bit, on the occasional snaps and pops that come through the AC line.

When I was looking, HF-150's seemed to be easier to find in european on line stores than US ones.

So it's probably worth a shot.

Propaganda is illegal? Someone better go round up Michael Moore, George
Soros, MoveOn.org and the rest of their ilk. They already got Dan Rather.

19th OM with news on Lebanon/Syria conflict plus a mosque bombing in
Iraq. MacKenzie-CA.

FLASH!!! Dr Gene Scott of the University Network that is heard worldwide
via many relay sites has died this day. He started his network on Channel 30
UHF here in California many years ago. He moved to shortwave when he lost
his tv license from the FCC. He recently went on various tv stations in the
USA by leasing time. I suspect that his radio broadcasts will remain on the
air for awhile. Another era of radio broadcasting comes to a close in the
USA!

If you can afford to build one, have the space needed,
and nonly want to listen in one direction.
If you want a LP that is rotatable, prepare to spend even
more money. They are great for VHF TV, scannig, and
have some utiltiy for ham radio.
But for say 3~20MHz it would be HUDGE.
There are better choices for HF.
Terry

If you go to their web site, one of the antennas shown
look a whole like like a spiral antenna. Hardly new or
earth shattering. I saw on back in the late 1960s.
The web site shows it under a pop drink cap, I guess for
RFID.
It is not unusual to talk around the world on 10mtrs (28MHz),
with one watt. Back in 1985 I talked with a ham in Papau New
Guinea with a modified JC Penny CB converted to the 10mtr
ham band. using a fairrly awful antenna, a base loaded converted
CB antenna, running about 1.2Watts PEP.

Depends on what you mean by "better". If you want something that is
broadband enough to cover 3-30 and as directional as a yagi, with very good
directional gain, then a LP is not a "bad" choice given you have the room.

Right here I could interject the same word you used above. Proof. How do you
know its a bad way to go? You gone that way? No. You know someone who has?
Maybe yes. The same could be said for Dr. Scott. If you ever knew any

Christians, you would see their serenity in their leaving this world. Ask the doctors. They can tell you that Christians on the whole have more of a grip on death than those who dont know God. They can tell you the horror on the faces of those who die not knowing what will happen to them after they are gone. So throwing that word "proof" around shouldnt make you feel as smug as you think you are.

There is a fairly well known DX'er in western Canada who uses a rather large
log-periodic antenna mounted on a big tower.

His name escapes me at the moment, but I have seen some pictures of his set up.

Source record: 9180

Got in SWL about forty years ago, then took a long hiatus I renewed my interest and got a general class ham license, then with the advent of computers, I lost interest. Recently I thought about how much I enjoyed SWL. So I did a little research on the web and bought a very inexpensive receiver, Grundig mini 100, 'cause I sold my old ham gear..the old Kenwood 940 had a really nice general coverage receiver.
Question is where I can find some broadcasts that discuss SWL in general? If I find this as gratifying as I did all those years ago I have my eye on a Sony 7600.
I enjoyed reading some of the posts here, you guys are really into it and know your stuff. Have always found newsgroups to be fairly tolerant of newbies and their inane questions. Hope to get up to speed with all the info I am accumulating.
Thanks...
Marc

"Brian Oakley" <brianoakley@ispwest.com> wrote in message
news:cvfbcv030m2@enews2.newsguy.com...

> Matthew 19:25 When his disciples heard it, they were exceedingly amazed,
> saying, Who then can be saved?
> Matthew 19:26 But Jesus beheld them, and said unto them, With men this is
> impossible; but with God all things are possible.

....which was used by the RC Church for Hundreds of Years afterwards
by their claims that they were the sole "Official Representatives" of G-d's
Church on Earth, and for an Indulgence or two anyone could buy their
way into Heaven. What a deal eh?!! You could spend your whole life
plundering widow's houses, murdering infidels in the "Holy Lands" for the
Pope and the Crusades, Burn people alive as a member of the Holy
Inquisition or Convert "heathens" to Catholisim then cut off their heads
a few hours after they said their High Holy Mass....and for just the equal
of a couple of thousand dollars, you could assure yourself a good place
in line at St Peter's Gates! Of course the Protestants took advantage of
this
also, in the many divisions they went thru during their history and their
insistence in a 10% "G-d Tax" right off the top of everyhing you take home
as income. Still being practiced today, I may add, in some denominations.
Then of course today you can buy your healing or financial blessing from
Robert Tilton, Peter Popoff. Or you can be a good USA Loving Patriot
and send a love gift to Pat Robertson or Jerry Falwell or some other
Dominionist fool preacher and spread the gospel of the GOP and GW Bush
all arond the world....just like the Priests and Cardinals did to the poor
ignorant phesants 1000 years ago to raise money for The Crusades of
ethnic cleansing in the "Holy Lands".... (JUST LIKE OUR SHI+STAIN OF
A PRESIDENT is now doing in Iraq and shortly in Iran and Syria for
the glory of Far Right Christian Dominionism to rid the Holy Lands of Islam
and grab some oil reserves in the process.......need I continue?)

There's always an angle of profit motive someplace, you just have to look
for it.
And of course as the Bible is interpreted in MANY different ways by just
about everyone. Money and Power and be sure to use the local holy books
to support your claims and the religious fools of all stripes will beat a
path
to your door to fill the collection plate.

Gene Scott knew this principal---> and he died a multi-millionaire.
Just like L Ron Hubbard and many others before him. I give em credit.

So thump that Bible boy....and send you money to Rev. Cleetus Hogjowles
to do the Lawds work....it don't matter that he's driving a Lexus and

you're
driving a 10 year old beat up rusting Pontiac. ;)

A book could be written here, but I'll attempt to keep it to the rough draft of a tract -- which someone else can polish and publish.

Do you play a musical instrument? If you do you know the first thing you have to do is TUNE it. If the trumpet give an uncertain sound, who shall prepare himself to the battle? On that little word "if" rests so many of the promises of God to mankind. IF we keep His laws, THEN He will do certain things for us. ELSE .... See, It's a basic computer program statement. IF...THEN...ELSE...

You have to get "in tune" to hear and understand some of the things in the Bible.

I'll be asking you a few questions along the way. I'm sure you appreciate the warning. :-)

Did you know that Jesus Christ occasionally spoke in parables so that men would NOT understand what He was saying? Let's say He was speaking ESoterically to His disciples instead of EXoterically to some EXterior group - those who were not "in tune" with His program and plans. He also mentions those who had ears and didn't hear and others having ears TO HEAR. IF we have ears to hear His Word He'll give us understanding.

Did you know that there are 76 drops to a teaspoon? Check it out at http://www.elivermore.com/conversions.htm ...and six teaspoons per fluid ounce? (Bear with me now, I'm going some place, even if I don't know where it is! -- as the Sprint PCS TV commercial used to say before we started talking about the use of cell phones to track us, they'll find you and deliver your phone call to you "even if YOU don't know where you are!") ...16 ounces per pint, 2 pints per quart, etc. Therefore, a peck bucket (that's 10 quarts) would contain 10 quarts times 2 pints per quart times 16 ounces per pint times six teaspoons per ounce times 76 drops per teaspoonful. A formula for drops per bucket could be easily written from the above information. 76 x 6 x 16 x 2 x 10 = Number of drops per 10 quart bucket. That is 145,920 drops per 10 quart bucket --

but God is mighty big and strong and just might be referring, in this allegorical passage, to a VERY LARGE BUCKET. "He's got the whole world in His hands...." POINT: Isaiah 40:15, KJV, "Behold, the nations are as a drop of a bucket, and are counted as the small dust of the balance: behold, he taketh up the isles as a very little thing." ALL THE NATIONS, individually or collectively, are as a drop of a bucket in the sight of God. Remember, there are almost 150,000 of them -- IF we're only talking about a 10 quart bucket - one fourth of a bushel!

NOW, let's look at what is going to happen to ALL the armies of ALL those nations when Christ returns. Old Slough Foot, Satan, that wicked one, is now in control of the armies of the world and they SEEM all powerful. He could rightly promise Christ all the kingdoms of the world if He'd only bow down and worship Satan. God / Christ had given him that power. He is the prince of this world - right now. This is why so many worship the devil. Remember "The Devil and Daniel Webster" ? People actually are selling their souls to the devil, and he is actually rewarding many of them very generously with this worlds good which will all be burned up! When Christ returns He is going to destroy Satan, and presumably ALL his allies. It's a really "tough" job! :-) Check out Second Thessalonians 2:8, KJV, "And then shall that Wicked be revealed, whom the Lord shall consume with the spirit of his mouth, and shall destroy with the brightness of his coming:"

Get that? The Wicked One is going to be DESTROYED -- WITH THE BRIGHTNESS OF CHRIST'S COMING! Nuclear Physics, lasers, etc. won't even compare! ....and all the nations of the world which have gathered to fight against the returning Jesus Christ will be destroyed with him.

Nuclear Physics? Check out Zechariah. Zec 14:12, KJV, "And this shall be the plague wherewith the LORD will smite all the people that have fought against Jerusalem; Their flesh shall consume away while they stand upon their feet, and their eyes shall consume away in their holes, and their tongue shall consume away in their mouth." Now, THAT sounds like a nuclear blast to me. The flesh melting away while the bones yet stand. Remember the shadows of men etched into the steel girders of bridges in Japan? Yep, their bodies "consumed" part of that powerful blast but the blast also consumed their bodies! Wasn't this AFTER Japan had surrendered? Wasn't this one of the Japanese cities with a very high percentage of Christian in it? Didn't the same thing re-occur just a day or two later with the same or very similar circumstances?

Molecular Structure? Colossians, referring to Jesus Christ, says, Col 1:17, "And he is before all things, and by him all things consist." And you probably were thinking electrons, protons, nucleus, etc. held things together. What makes up the nucleus of an atom? Protons and Neutrons? Protons, positively charged, "large" particles. Neutrons - approx. same mass as proton, no charge. So, EVERY ATOM has a nucleus with MANY particles that are positively charged and about the same number of chargeless particles; i.e. the nucleus is POSITIVELY CHARGED. Yes, out in orbit some distance from them are some NEGATIVELY CHARGED particles,

but the nucleus is, again, POSITIVELY CHARGED. Like charges repel! WHO do you think is keeping those positively charged particles which are all repelling each other FROM E-X-P-L-O-D-I-N-G-? Colossians 1:17 tells us it is by Jesus Christ that ALL THINGS CONSIST. The Amplified amplifies on this a bit - pun intended. Col. 1:17, "□And He Himself existed before all things, and in Him all things consist (cohere, are held together)." It also recommends we read Proverbs 8:22-31. So Jesus Christ is HOLDING TOGETHER -- ALL THINGS! ...And yet stupid men would love to "do away" with Christ entirely! Couldn't do it the first time, just played into His hands! Been trying to do it ever since -- those who realize the first "treatment" didn't take! Yet they don't realize that without Christ THEY ARE NOTHING. HE is holding THEM together! How blind can we be?

The point is: While the Bible may not use the words nuclear or physics it has MUCH to say about both! I have hardly scratched the surface.

SOMEBODY TAKE THIS BALL AND RUN A TOUCHDOWN WITH IT!

So does the Old Testament if you read the right parts selectively.
The problem is fundies, /literalists and people that have an agenda
```

and are using a holy book to justify their ends. A pox on them.

The popularly quoted phrase from the Koran that says "kill all the
infidels" is taken out of context. The rest of the paragraph says
"unless they leave us alone". Nothing wring with that.

Read the writings of Karen Armstrong

http://www.islamfortoday.com/karenarmstrong.htm

and Bernard Lewis

http://www.arab2.com/biography/bernard-lewis.htm

>translates exactly the way you want it to in whatever language you choose.

What does your story have to do with either shortwave or the failure of a long time food retailer. Why would anyone gloat over the potential closing of so many stores that employed and served so many people.

I strongly suggest that you go back and reread everything you wrote. Ranting like: "Yep, spend yo' money wif us so we can monitor yo' principles and git you arrested!" makes me think you have been reading too much KKK literature.

Al Patrick wrote:

5107. Kiwa Shortwave Preamp and S/N ratio

Newsgroup: rec.radio.shortwave
Date: 2005-02-23 15:11:55 UTC
From: sdaniel13@nyc.rr.com
Message-ID: <1109171515.678635.149660@f14g2000cwb.googlegroups.com>
Source record: 9105

According to Kiwa's website, their shortwave preamp will make your receiver quieter. They claim that when you turn off your receiver's internal preamp and instead rely upon the Kiwa preamp, you will have fewer noisy circuits operating inside the receiver.

I find myself unmoved by this claim, since it would apply to *any* external preamp--and most external preamps will do nothing to improve S/N ratio, at least in my (limited) experience.

Of course, the Kiwa preamp also has a BCB rejection filter. I *do* see how this could improve S/N ratio, but I'd like to hear some first hand reports.

If you've used Kiwa's preamp, can you comment on whether it resulted in a significantly improved signal to noise ratio?

Thanks in advance,

Steve

5108. Re: The Number Eleven - BANKRUPTCY !

Newsgroup: rec.radio.shortwave
Date: 2005-02-23 15:19:24 UTC

You have written a lot, but so far none of it makes any sense.

Put down in five coherent sentences how the number eleven, the number of former WTC towers and the bankruptcy of Winn Dixie are tied together. You seem to have some difficulty creating sentences that tie togwether as complete thoughts. So, when composing your response take plenty of time and think before writing.

Have you been by a good steak house about 6 or 7 PM lately? You need to
take one of your neighbors out to supper with you. They'll change their
minds about the smell of char-broiled steak!

>
> 5. I have a neighbor who insists on working on the Sabbath. Exodus
> 35:2 clearly states he should be put to death. Am I morally
> obligated to kill him myself, or should I ask the police to do
> it?

First you need to learn when the Sabbath begins and ends to be sure you
aren't following some tradition of men. Are you referring to Lunar
Lunacy? The Solar Sabbath? The "legal" day - midnight to midnight? Or

are you referring to the Jewish "sabbath" which they claim begins on one day and ends on another; i.e. sundown Friday to sundown Saturday?

>
> 6. A friend of mine feels that even though eating shellfish is an

> their in-laws? (Lev. 20:14)

Just as the previous question. These laws were for a peculiar, separated, chosen, holy people. I doubt they apply at all to YOU.

However, you might be surprised how much healthier and happier we'd all be if we did NOT eat genetically engineered foods, wear clothing of different materials or have disobedient children! Think about it!

Back then, that stuff made sense. If you got Trichinosis, you had it forever. Now, unless you are just itching to get it, you won't, because we know better, and know how to prevent/cure it. Back then, all they did was know, or suspect the cause.

One of the few really logical things they did back in the olden days..

My granddad ate F1 hybrid tomatoes all his life and it did him no harm. My cycling top is made of man made fibres and is far superior to cotton or wool which just get damp, but what I really want to know is this. One of the ten commandments says thou shall not kill.

Last week, I got an infected elbow joint which had bacteria in it. My doctor gave me some antibiotics. Have I committed a mortal sin by killing the bacteria?

Oh now that is just mean. Next thing you know she'll be contacting the site owner and harrassing him to take the picture down. Than she'll call the local police department complaining about "internet crime" because she didn't sign a "model release"...

Then she'll go after YOU for "hacking" the site...and contact Sneakmail about your WebTV "internet" postings!

See how it snowballs...

1) I first heard it on shortwave radio.

2) They appeared to have a company policy to snoop and spy and report
on those who would train up their children to be obedient, mannerly
children.

3) I'm glad something makes you think! THAT is the intent of most of
my messages. Of course, I can't help WHAT you think. All of us choose
to think what we wish! You have made your choice. I appreciate your
sharing it with all the rest of us! ;-)

5120. Strings and the cosmos...

Newsgroup: rec.radio.shortwave
Date: 2005-02-23 15:49:36 UTC
From: artbellfan <artbellfan8@yahoo.com>
Message-ID: <1109173776.383490.267230@z14g2000cwz.googlegroups.com>
Source record: 9117

Strings and the Cosmos....

http://www.shadowpeoplebooks.com

The entire concept of "Strings" fascinates me. The more I learn about this theory the more curious I become. If in fact this radical theory proves to be correct, the 'big bang' theory becomes an event that is a common occurrence. If this is true what implications does it have for man and our sense of reality? Perhaps the great distances of the cosmos are but micro measurements in a colossal system of some sort. Time when measured in human terms may be an insignificant measure when compared to whatever or whoever this system really is. Perhaps we were never meant to find answers to questions that are beyond the scope of our understanding. Maybe life and in turn intelligent life is simply a parasite that clings to a system ever changing.

Great minds of the past have given us wisdom to reach today's levels of what we refer to as advanced technology. Today the ones that will push the envelope still farther dabble with concepts that defy explanation. Science fiction writers have relied upon imagination to create situations that at the time of their writing seemed impossible. Later we often utilize many of these ideas in everyday life. Tomorrow will bring with it answers to many questions but more importantly it will bring more questions that need answers!

Currently I am writing a new book tentatively titled "Parallel Universes-Man's First Steps Beyond!" Researching the topic of parallel universes has already stretched my imagination and I would suspect that this story will give the reader some thought provoking ideas of what man might expect when the technology is perfected that allows travel between the layers of parallel universes. Many scientists believe such a layer exists and travel between them possible.

I invite you to share with me any ideas you may have as to 'parallel universes' and the 'string theory' and please do not be shy. It has been said, 'whatever can be will be' so any ideas you may have are equal candidates for discussion. Please take time to visit my website and check out my writings.

Hi Group,

I have a bud who would like a FM transmitter to send his stereo tunes out to his back yard. I built my own but this chap is a non-builder, needs plug and play.

Can anyone recommend a transmitter that takes RCA line inputs and is plug and play?

Thanks
Tom

1) The number eleven, which two tall parallel towers appear to some to represent, is also used in SOME bankruptcy proceedings.

2) If the two/twin towers represented to the 9/11 attackers, whoever they were, the number eleven and they wanted to send us a symbolic message, could that message have been BANKRUPTCY - as in a CHAPTER ELEVEN BANKRUPTCY?

3) Winn-Dixie filed for CHAPTER ELEVEN BANKRUPTCY and this reminded me of the elusive Al Qaeda, one of whose goals is allegedly to BANKRUPT America.

There, I did it in THREE sentences. Do you now understand how they are "tied together" or was this just another attempt at the tying of the knot? :-)

Another link? I just got this weeks HQ Intel-Alert http://www.stevequayle.com which is confidential and for subscribers only but it seems we are not rid of Al Qaeda yet by any means. Yes, ONE of their goals is the bankrupting of America! They boast that even if they put out DISinformation that causes us to beef up our securities, add more cops to the streets, bars on our windows or alarms in our cars and the "treat" does not take place they still are winning because they are forcing us to spend that "almighty" dollar at whose shrine many of us worship all too often.

Time expired! Sentences exceeded! Sit down! Next opponent, please!
You have THREE minutes! State you case!

Good day!

From: Hatfield <utility_infielder@earthlink.net>
Message-ID: <1109182200.307965.192840@o13g2000cwo.googlegroups.com>
Source record: 9134

"Why has the journalistic community chosen to downplay the latest 9/11 Commission Report? Actually the report substantiated much of what the 9/11 Commission Report states repeatedly. There were many warnings that Osama Bin Laden was going to attack the U.S. on our soil, with strong indications that he would be using aircraft and would target an American icon, be it landmark buildings, bridges etc. It is all in the report, which is very readable. "

Yes, there were also many reports that Osama was going to attack America back when Clinton was the President. In response to these warnings, what radical changes did Clinton make to national security procedures. You know, what very evident hassles and inconveniences which Americans had to then endure for the first time in their history when they board airliners, cross borders, obtain passports, etc.?

Apparently Pres. Clinton did next to nothing. Go figure then, David, how wise you appear when you post criticisms about Bush for being unreasonably negligent or worse, when actually Bush was doing about the same as Clinton, or for that matter about the same as any President would have done before nine eleven.

Sorry David, you don't seem to realize that unlike the exalted Prophet Stair, most world leaders cannot foretell the future. Because down through history all Presidents and Kings have all been bombarded with thousands of warnings concerning the latest news of enemies working to undermine the country. Its hard to sort out which one or two of the avalanche really are very serious. Frankly no President, Republican or Democrat could have predicted anything like nine eleven.

A crackpot like Stair might now shout that he knew an extremely serious attack was about to come. Other folks like David might shout now that Bush should have known.

Do tell.

(quoting from the site.....)

"PRESS RELEASE: Ailing T.V. Preacher Dr. Gene Scott's Art on e-bay!"
Thursday February 10, 2005 from: Truth or Consequences, New Mexico
No, this isn't about Elvis, O.J. Simpson or a piece of cheese looking
like the Virgin Mary, but rather true art! In an effort to publicize the
plight and too often damage that allopathic medicine's cancer treatment
can have on a patient, and in believing that Dr. Scott will recover.
a silent seller of an original numbered and autographed print
of "The Wrecking Ball Lost" through an intermediary, is up for
auction on e-bay, and to demonstrate that love him or hate
him. Dr. Scott's art has great value here and now. Bidding opens
at $50,000. Recommended to any King's house or whosoever
wanting to acquire this 20 year old work of art by Dr. eu-Gene Scott.
look below for photo of print, then, just go to e-bay and type in
search.'Dr. Gene Scott's Art.'"

BAAAAAAAAAAA!!!!!! HAHAHAHAHAHAHA...
...HAHAHAHAHAHAHAHAHAHAHAHAHa!!!!

"...true art" you say?

Looks more like something that someone from the
LOCAL NUT-HOUSE would draw while under a
heavy regimine of Prozac and/or Lithium.

In fact if you look *carefully* at it, you will see that
it may suggest...(gasp)...SEX!

Consicer, there's the two balls either side with what
looks like a penis in the middle...and what's that circling around
the penis you say...?? Why, it looks like a cute single lost little
sperm, doing circles around the same lookin for an egg
to fertilize. There's some guy ibelow raising what looks
to be a whiskey glass in his right hand and he's standin inside
what looks to be a map of the Continent of Africa...
...or perhaps is that a *mons pubis with an opened labia*
instead....Hmmmm!! Also has what looks like a
tounge like the old Rolling Stones logo right inside

the labia majora?? (Mabey like Stan Marsh from
The Southpark Movie...he's lookin to find the clitoris?)

"Is finding the clitoris like finding jesus or somehing?"
- Eric Cartman (grin)

Who knows....but 50G for that scribbling?

What happened? Is the light bill for the cathederal due
and all the cash has dissappeared down to the Cayman Islands???

>DX hardware for a commie... ?? dunno

Gee - why not? It can run almost any CP/M software and any C'64
software as well as native software.

The main problem, I should think, is that it doesn't have the standard
ports that are used today so you might need homebrew hardware to
connect say the "user port" to something.

One of the best collections of C'64 (and C'128) software was lost when
AOL / Quantum Link pulled the plug on their Commodore service without
adequate notice.

You might look at, among other places

Clinton did do something. Bush didn't want to hear about terrorism.
Period. He ignored Richard Clarke and others pleadings. The attack
was on Bush's watch.

Perhaps if the Republican attack dogs weren't distracting President
Clinton all the time he might have been more effective.

"Clinton did do something."

Yes Clinton was no fool, therefore when U.S. intelligence had Osama precisely located, Clinton decided to just throw a couple bombs in the general direction of the bad guys' training camps, nothing more. I find no fault with that. Very professional actually, anything more intense at that time would have been seen as over reaction, a little crazy.

Clinton's general common sense allowed him to avoid being perceived as an extremest, which in truth he wasn't, allowing him to be twice elected in a Republican dominated political era, unseating an incumbent Republican President in the process. As did a Sunday School teacher from Georgia who had reduced the size of his State's government with a new "needs based" annual budget process, and who called himself a fiscal conservative. And then there's another who actually received more votes than the Republican, Gore, who was the self proclaimed most conservative Democrat candidate in the year of seven candidates when they foolishly instead nominated Dukakis. Dukakis, very very "progressive", had vetoed a State pledge of allegiance bill, refused to remove convicted murderers from the prison inmate furlough program, opposed capital punishment, no doubt he was somewhat rather near the fringe of the political spectrum.

Perhaps its the moderate Democrats, the kind who probably don't fully agree with your extreme postings, who are the likely to actually win elections nowadays.

So, I have a question...

What, other than her perceived weight problem and poor grooming make this lady deserving of everyone's cruel humor? Do all of you know her personally? Do each one of you excel at the niceties to which she is apparently poorly suited?

Just curious.

Bruce Jensen

She entered herself in a online beauty contest (Miss American Rose?).
When one places oneself in the limelight in such a manner then
criticism is to be expected. Especially since her head looks like an
olive loaf.

In addition Loafhead is netKKKopping scum. She emails abuse complaints
willy nilly and then refuses to stand up for her own complaints. Most
recently she has emailed sneakemail concerning usenet posts in agc.
What an email service has to do with usenet posts is unknown to either
sneakemail or anyone else. Yet Loafhead sent a notice for them to
invoke their email TOS for usenet posts she considered off topic.

Lastly, she fucked with AUK, again.

I totally agree. We need more people like Maryanne in this world, willing to stand up and fight for what is fair and just. If it weren't for people like Maryanne, we'd be living in anarchy.

It's not a beauty contest, you morons!

It's an ACHIEVEMENT contest. Maryanne is an achiever, something obviously
completely alien to you fools.

It's about LEADERSHIP. Leading others. Maryanne is a leader, you all are
obviously followers.

Another good radio is a desktop, Icom R75 at $500 from Ham Radio Outlet, complete with UTC 106 option, none other needed to make it comparible to much more expensive radios.

The utes nowadays can be decoded with freeware software which cables from radio speaker jack into computer soundcard. So, $500, plus an antenna, can be all that's necessary to go first class

And chanches are you allready know Morse code (multimode/RTTY freeware will provide the narrow bandwidth for listening to CW, not just for decoding it). If not, freeware learning programs are available and very SWL needs to learn copying CW by ear. Was too easy, not difficult like touch typing for me :).

I believe a long time ago (Net standards-wise), in the
mid-90's she sued someone for libel on the
ancient history newsgroup. At first it stood up,
but got thrown out later because the person she
brought the libel against proved that no one took
her (the defendant, not Kehoe) seriously.

I noticed that Universal shows the Drake MS8 speaker as being discontinued. Drake's website no longer has it available for order, and Grove doesn't have any left either.

It was a pretty crappy speaker for the money, but it looked good next to the R8B.

It can't be worse than the Grundig G1000a.

http://www.goinginstyle.com/gis/body_individual_new.asp?dept_id=5&pf_id=2365

Mine drifts off frequency so badly, you have to reset it every fifteen minutes. The clock can't keep time either and that is directly related to the frequency generation/stability of the set.

Grundig..another fine old name driven into the mud by the money men in search of fast profits. "Screw the future, let's make money TODAY". These people probably pimp their own grandmothers for a quick Dollar.

The point is that EVERYONE would do it, silly. And they keep doing it every time they don't help the hungry, poor and suffering. And the instruction to help others does not end at the borders of your own community or country. I hear so much said in the name of religion, and then it's back to exploit, not caring, justifying hate and making lotsa money. It just takes human beings regardless of dogma or religious belief to either help fix or help screw it up.

JD,

>From what you have written here; I soumds like
you built yourself a SkyWire Loop Antenna.
.
"SkyWire Loop Antennas" Forum {eGroup} on YAHOO !
SKYWIRE => http://groups.yahoo.com/group/SkyWires/
.
Dr. Ace [WH2T] is one of the Moderators of the eGroup.
http://www.bloomington.in.us/~wh2t/loop.html
.
A Critical requirement for a SkyWire Loop Antenna is "LAND" & Space.
.
SkyWire Loop Antenna Size per Square Side:
160 Meter Band = 529 Feet Loop = 132 Feet per Side = "SPACE"
80 Meter Band = 268 Feet Loop = 67 Feet per Side = 'Space'
40 Meter Band = 141 Feet Loop = 35 Feet per Side = space
20 Meter Band = 71 Feet Loop = 18 Feet per Side
10 Meter Band = 35 Feet Loop = 9 Feet per Side
.
Some SkyWire Loop Antenna Messages to Read :
* Using a SkyWire Horizontal Loop Antenna ? One or Two WaveLengths
Size ?

Should I
start a thread about orange juice?
---

well, if you did, it would definitely tuen into a thread about O.J.
Simpson.

And then after that, it's likely it would turn into a thread about
Jackson's trial, the very subject of this thread.

"Tard boy!" "Fraud!"

Could we stop the insults and get back to radio? Thanks.

(But that would mean Al would have to stop posting bible thumper stuff
that he thinks is relevant because he happened to hear it on shortwave,
and tianli would have to stop blaming Kerry for 9-11--hint, the
election's over, Kerry lost.)

Might as well. Call it "Orange juice, the Talmud and Michael Jackson"
and mention that one of the bible thumper kooks had a program on
shortwave about the connection between the three, and the hidden evils
of drinking orange juice while reading the Talmud and watching the
Jackson trial on TV to make SURE it's as relevant to rec.radio.shortwave
as Al's "I heard it on the last half of the last hour of (insert bible
thumper here)'s shortwave show on the upper part of the 31m band" posts.
By the way, I haven't heard any commercials on shortwave lately, except
for the BBC's relentless self promotion.

I haven't heard them yet. 6930 seems to have a lot of noise at my
location. I don't know whether the noise is coming from somewhere around
me or is just general interference.

I don't know if intolerance is the word. Christianity in general though, has been practiced by people who don't actually practice what they preach. They lie, cheat, steal and murder when they want something others have. Much like what the zionists are doing in Palestine now.

If you are going to convert someone to your way of thinking, the best way is to LIVE and DO what you believe. Set an example. Don't steal anything, including resources and land. Don't pretend to believe in some commandments and live up to them only when it suits you. That is just so much crap that doesn't go unnoticed by others..they say "Christian? Jewish? Their word is meaningless"

He just has to find a woman who:

1. Is already pre brainwashed by her parents.

Or

2. One who can be convinced of almost any crazy conspiracy, who has no "kook" filtering whatsoever. In other words, a female version of himself.

y'all was talking about those radios a few weeks ago.Yesterday,on the way back home from the food store I stopped off at a Walgreens store and I bought one of those Sony AM/FM ICF-S10MK2 shirt pocket radios.I don't see what the big deal is about those radios,it doesn't pick up any better than some of my other little shirt pocket radios.And the AM stations are really crowded up next to each other too.When I was in the Army (October 28,1962-October 29,1965) they used to call me Radio Ryan because a lot of times I had a transistor in my shirt pocket.Bell Laboratories did not invent the Transistor either.Walgreens has some little shirtpocket Shortwave AM/FM Radios too. www.ryans.org

There is an inverse ratio between illegal CB amplifier wattage and the IQ of the operator. As an example, The 'Ace' was using 1200 watts before the Feds visited him.

I bought a mint Sears FRG-7 for $200 and I mean mint. That's the only reason I paid $200 for it. But, some bidders have no idea what some items go for. They want a FRG-7 and don't check on past prices. Now, I always thought these FRG-7's were worth more then were going for on Ebay. I saw many in great condition going for $150 to $175.

They really are excellent old classics. I bought mine to collect and to use. I waited perhaps 6-8 months till I saw the one I wanted. It was worth the wait.

But it does seem to me people mainly in the US have more money then they know what to do with.

There is a guy in Alabama who builds,or used to build,for sale,some hopped up CB Radios that all one would need to do is aim the Antenna of the CB Radio at whatever vehicle close by that one wished to STOP! and said CB Radios would STOP! those vehicles! All of the stuff we read about on the internet nowdays about law departments and govts getting new technology to stop vehicles,that next door to me (Mississippi) in Alabama was building CB Radios that would STOP! vehicles! at least seven or eight years ago.

Here's all the reason some people need to accuse me of being racist, Jew-hater, anti-semitic, etc. All you have to do is EXPOSE one "Jew" and some people ACCUSE, though FALSELY, of HATING all Jews.

Let's take a look at some of the court proceedings of some of the Orthodox Jewish communities around Brooklyn, NY!

Only this top part is mine.

Brooklyn Corruption Figure Admits He Arranged Bribes
By MICHAEL BRICK

The central figure in the wide-ranging investigation of judicial and political corruption in Brooklyn, a man accused of arranging bribes in divorce and child custody cases for people in the borough's Orthodox Jewish communities, pleaded guilty yesterday to 13 counts of bribery and conspiracy.

The man, an electronics dealer named Nissim Elmann, admitted passing thousands of dollars to a lawyer to arrange preferential treatment in cases before a State Supreme Court justice, Gerald P. Garson. Justice Garson has been suspended from the bench and is awaiting trial on bribery charges.

The investigation into dealings by Justice Garson, a former treasurer of the Brooklyn Democratic organization, has spilled over into a conspiracy inquiry involving the judicial nominating system and taking aim at, among others, the Brooklyn Democratic Party leader, State Assemblyman Clarence Norman Jr.

Prosecutors portrayed Mr. Elmann as a fixer, a known figure in Orthodox communities who accepted cash through the window of his car or inside a warehouse and passed it to a former lawyer who had an advantage in Justice Garson's courtroom.

The former lawyer, Paul Siminovsky, pleaded guilty to a misdemeanor charge of giving unlawful gratuities last year, after wearing a hidden microphone at the direction of the office of Charles J. Hynes, the Brooklyn district attorney.

Jury selection had been scheduled to begin yesterday in the case against Mr. Elmann, and his guilty plea came as a surprise to prosecutors, who

had requested electronic gear for the courtroom to play tapes of 110 telephone calls and dozens of other conversations.

"He is not cooperating, nor have we asked him to cooperate with us," Assistant District Attorney Noel Downey said. "The D.A.'s office came to play ball, and he backed down."

In State Supreme Court in Brooklyn yesterday, Justice Jeffrey C. Berry read through the counts aloud in a meticulous monotone, noting the legal language and asking in plain terms if Mr. Elmann understood the charges. "You knew this conduct was illegal?" Justice Berry asked repeatedly, and repeatedly Mr. Elmann replied that he had.

In all, Mr. Elmann agreed to guilty pleas to seven felonies and six misdemeanors. Justice Berry ordered a presentence investigation and indicated that the sentence would probably amount to between one and a half and seven years in prison.

Mr. Downey, the Brooklyn prosecutor, described the guilty pleas as "a telling event, because it supports the massive investigation undertaken by District Attorney Hynes and the Rackets Division in uncovering the vast corruption scheme that was unleashed on the matrimonial courts of Brooklyn."

Gerald J. McMahon, a lawyer for Mr. Elmann, said that his client chose to plead guilty in part to spare his family the stress of a trial (Mr. Elmann did not appear to have any family members in the courtroom) and in the hope that Justice Berry would hand out sentences "in a proportional way."

His comment was a sidelong reference to the open cases against several other people, including Justice Garson. Justice Berry has set a status hearing for May 26 involving several of the defendants in the intertwined investigations.

Mr. McMahon described Mr. Elmann as someone pressured by his community to gain access to the spoils of corruption.

"He tried to help people, and he was pushed by people in his shul, especially David Cohen," Mr. McMahon said, referring to a rabbi in Midwood. "It was almost a religious obligation, and Mr. Elmann was a seriously religious person."

Reached by telephone, Rabbi Cohen, who Mr. McMahon said had been on his witness list, declined to comment.

In court, Mr. Elmann passed up an opportunity to blame his rabbi or his community. After he finished pleading to the charges, Justice Berry asked him, "Nobody threatened, forced or coerced you to do these acts?"

"No," Mr. Elmann said.

Cross-posted to: rec.radio.swap,rec.radio.shortwave

I have one more cassette deck to sell (that will leave me with 3 pro level and a few lower class ones) that has use to a DX'er.

this is the VSC vscA-7 speech controller tape deck

features:

special circuitry to playback at speeds .6X to 2.5X with intelligibility !
that is 1 1/8 to 4 11/16 ips
meter
tape counter
monitor on/off

jacks include:
MIC/remote
AUX in
earphone
headphone
12V (this unit does not have internal battery capability)
AC

this was an expensive unit when new, but I will let it go for $35 plus shipping or trade for an interesting preselector ot maybe something else I don't know.

I received a Degen 1102 on Saturday and haven't had time to play with it much yet but find it a pretty nice little radio so far. Didn't see a sleep feature, but it may be there. One of the things that impresses me is the size. I can place the radio AND THE OWNER'S MANUAL in the little drawstring bag and it's still probably just a bit smaller than the 7600GR. Haven't tried to compare selectivity, etc.

Quit whining. You've never exposed -one- Jew; you promote crap like "The Protocols" that damns them all. On top of that, if you're exposing -one- individual, why point out that he's a Jew at all...unless you're trying to make some kind of point. Which of course brings us right back to damning all of them.

I can't see this being practical except in the 10 m band and shorter. For shortwave broadcast listening, which is normally 13 m and longer, this isn't going to be practical. Also, as someone else noted, it's more much more important for transmitting than receiving to have an idea length (1/3 wave monopole?).

Local HAMs around here often have a decent sized flexible antenna, like 10 feet long or so, but they usually just tie it down to another part of the vehicle.

Also, for a WebTV user, I'm surprised you dislike google--it's generally regarded as the best, and has a very simple interface that will load fast on that 56 K modem. If you're having trouble with the amount of stuff it is returning you need to modify your search terms and use things like quotes "", +, -, |

i.e.

internet | webtv = internet OR webtv
internet + webtv = internet AND webtv
internet - webtv = internet but NOT webtv
"internet webtv" = exact phrase search for "internet webtv"

does anyone have an opinion on why yosemite sam would get busted so fast? was he interfering with any licensed service? harassing amateur nets? im just curious that the feds would get off their asses to get him with all the jammers and QRM'ers and linear amped cb'ers swamping the waves. not to mention the bad power poles and transformers that they dont care about, and the abundance of consumer products that broadcast noise across huge swathes of the spectrum. and bpl blanketing their trial cities. why was he such a priority? or did he just fall into their hands somehow?

Well, he did broadcast on 5000 and 10000 khz over WWV(H) at one point, I believe. Although, he was a minor annoyance on they are 50 kW stations or something.

I wonder if they got a guy or just a transmitter and a computer playing a sound file in a loop.

Interesting. I remember that about a month ago, someone was hyping those radios on here. Suddenly, a guy on E-Bay started selling them for $20 (about $10 too much) as "Sony Long range AM/FM pocket radio" or similar with the model number removed (to make price comparisons difficult).

The quick answer is that Sam operated for at least two incarnations on 3700 which is located inside an amateur band.

That tends to get folks moving rather rapidly to figure out who is running the operation, and where it is coming from.

9/11 Report Cites Many Warnings about Hijackings

By Eric Lichtblau

The New York Times

Thursday 10 February 2005

WASHINGTON, Feb. 9 - In the months before the Sept. 11 attacks, federal aviation officials reviewed dozens of intelligence reports that warned about Osama bin Laden and Al Qaeda, some of which specifically discussed airline hijackings and suicide operations, according to a previously undisclosed report from the 9/11 commission.

But aviation officials were "lulled into a false sense of security," and "intelligence that indicated a real and growing threat leading up to 9/11 did not stimulate significant increases in security procedures," the commission report concluded.

The report discloses that the Federal Aviation Administration, despite being focused on risks of hijackings overseas, warned airports in the spring of 2001 that if "the intent of the hijacker is not to exchange hostages for prisoners, but to commit suicide in a spectacular explosion, a domestic hijacking would probably be preferable."

The report takes the F.A.A. to task for failing to pursue domestic security measures that could conceivably have altered the events of Sept. 11, 2001, like toughening airport screening procedures for weapons or expanding the use of on-flight air marshals. The report, completed last August, said officials appeared more concerned with reducing airline congestion, lessening delays, and easing airlines' financial woes than deterring a terrorist attack.

The Bush administration has blocked the public release of the full, classified version of the report for more than five months, officials said, much to the frustration of former commission members who say it provides a critical understanding of the failures of the civil aviation system. The administration provided both the classified

report and a declassified, 120-page version to the National Archives two weeks ago and, even with heavy redactions in some areas, the declassified version provides the firmest evidence to date about the warnings that aviation officials received concerning the threat of an attack on airliners and the failure to take steps to deter it.

Among other things, the report says that leaders of the F.A.A. received 52 intelligence reports from their security branch that mentioned Mr. bin Laden or Al Qaeda from April to Sept. 10, 2001. That represented half of all the intelligence summaries in that time.

Five of the intelligence reports specifically mentioned Al Qaeda's training or capability to conduct hijackings, the report said. Two mentioned suicide operations, although not connected to aviation, the report said.

A spokeswoman for the F.A.A., the agency that bears the brunt of the commission's criticism, said Wednesday that the agency was well aware of the threat posed by terrorists before Sept. 11 and took substantive steps to counter it, including the expanded use of explosives detection units.

"We had a lot of information about threats," said the spokeswoman, Laura J. Brown. "But we didn't have specific information about means or methods that would have enabled us to tailor any countermeasures."

She added: "After 9/11, the F.A..A. and the entire aviation community took bold steps to improve aviation security, such as fortifying cockpit doors on 6,000 airplanes, and those steps took hundreds of millions of dollars to implement."

The report, like previous commission documents, finds no evidence that the government had specific warning of a domestic attack and says that the aviation industry considered the hijacking threat to be more worrisome overseas.

"The fact that the civil aviation system seems to have been lulled into a false sense of security is striking not only because of what happened on 9/11 but also in light of the intelligence assessments, including those conducted by the F.A.A.'s own security branch, that raised alarms about the growing terrorist threat to civil aviation throughout the 1990's and into the new century," the report said.

In its previous findings, including a final report last July that became a best-selling book, the 9/11 commission detailed the harrowing events aboard the four hijacked flights that crashed on Sept. 11 and the communications problems between civil aviation and military officials that hampered the response. But the new report goes further in revealing the scope and depth of intelligence collected by federal aviation officials about the threat of a terrorist attack.

The F.A.A. "had indeed considered the possibility that terrorists would hijack a plane and use it as a weapon," and in 2001 it

distributed a CD-ROM presentation to airlines and airports that cited the possibility of a suicide hijacking, the report said. Previous commission documents have quoted the CD's reassurance that "fortunately, we have no indication that any group is currently thinking in that direction."

Aviation officials amassed so much information about the growing threat posed by terrorists that they conducted classified briefings in mid-2001 for security officials at 19 of the nation's busiest airports to warn of the threat posed in particular by Mr. bin Laden, the report said.

Still, the 9/11 commission concluded that aviation officials did not direct adequate resources or attention to the problem.

"Throughout 2001, the senior leadership of the F.A.A. was focused on congestion and delays within the system and the ever-present issue of safety, but they were not as focused on security," the report said.

The F.A.A. did not see a need to increase the air marshal ranks because hijackings were seen as an overseas threat, and one aviation official told the commission said that airlines did not want to give up revenues by providing free seats to marshals.

The F.A.A. also made no concerted effort to expand their list of terror suspects, which included a dozen names on Sept. 11, the report said. The former head of the F.A.A.'s civil aviation security branch said he was not aware of the government's main watch list, called Tipoff, which included the names of two hijackers who were living in the San Diego area, the report said.

Nor was there evidence that a senior F.A.A. working group on security had ever met in 2001 to discuss "the high threat period that summer," the report said.

Jane F. Garvey, the F.A.A. administrator at the time, told the commission "that she was aware of the heightened threat during the summer of 2001," the report said. But several other senior agency officials "were basically unaware of the threat," as were senior airline operations officials and veteran pilots, the report said.

The classified version of the commission report quotes extensively from circulars prepared by the F.A.A. about the threat of terrorism, but many of those references have been blacked out in the declassified version, officials said.

Several former commissioners and staff members said they were upset and disappointed by the administration's refusal to release the full report publicly.

"Our intention was to make as much information available to the public as soon as possible," said Richard Ben-Veniste, a former Sept. 11 commission member.''

Transmission lines have characteristic impedance, non-frequency
dependent. Antenna impedance (original question) does have a
frequency component.

I'm not a liberal. NPR receives federal matching grants which are contingent on local community support. All civilized countries subsidize a form of public broadcasting as it is essential to democracy.

When you say you vote with your pocketbook, what you are really saying is that you are a whore and that you carry a purse.

The Anti-Conservatives

Who convinced the president that our democracy depends on a worldwide crusade?

by Patrick J. Buchanan

That George W. Bush would seek to embed the Iraq War in the higher cause of global democracy was to be expected. That is the way of wartime presidents.

By late 1863, Lincolnï¿½s war to crush Southern secession was about whether ï¿½government of the people, by the people, for the people shall ... perish from the earth.ï¿½ By 1917, the European war whose causes Wilson professed not to understand in 1916 had become ï¿½the war to end all warsï¿½ and to ï¿½make the world safe for democracy.ï¿½

Leaders alchemize wars begun over lesser interests into epochal struggles for universal principles because only thus can they justify demands for greater sacrifices in blood and treasure. But Bush has gone Wilson one better. He is not only going to make the world safe for democracy, he is going to make the world democratic. Where Lincoln abolished slavery in the South, Bush is going to abolish tyranny from the earth: ï¿½So it is the policy of the United States to seek and support the growth of democratic movements and institutions in every nation and culture, with the ultimate goal of ending tyranny in our world.ï¿½

A conservative knows not whether to laugh or weep, for Mr. Bush has just asserted a right to interfere in the internal affairs of every nation on earth. Why? Because the ï¿½survival of liberty in our land increasingly depends on the success of liberty in other lands.ï¿½ But this is utterly ahistorical. The world has always been afflicted with despots. Yet America has always been free. And we have remained free by following the counsel of Washington, Jefferson, and Adams and staying out of foreign quarrels and foreign wars.

Who is feeding the president this interventionist nonsense?

The president now plans to hector and badger foreign leaders on the progress each is making toward attaining U.S. standards of democracy. ï¿½We will persistently clarify the choice before every ruler and nationï¿½the moral choice between oppression, which is always wrong, and freedom, which is eternally right.ï¿½ This is a formula for ï¿½Bring-it-on!ï¿½ collisions with every autocratic regime on earth, including virtually every African and Arab ruler, all the ï¿½outposts of tyrannyï¿½ named by Secretary Rice, most of the nations of Central Asia,

China, and Russia. This is a prescription for endless war. Yet as Madison warned, ï¿½No nation can preserve its freedom in the midst of continual warfare.ï¿½

Who and what converted a president who came to office with no knowledge of the world to the idea that only a global crusade for democracy could keep us secure? Answer: 9/11ï¿½and the neoconservatives.

In his inaugural address, Mr. Bush calls 9/11 the day ï¿½when freedom came under attack.ï¿½ This is sophomoric. Osama did not send fanatics to ram planes into the World Trade Center because he hates the Bill of Rights. He sent the terrorists here because he hates our presence and policies in the Middle East. He did it for the same reason FLN rebels blew up cafes in Paris and Hamas suicide bombers blow up pizza parlors in Jerusalem.

From the Battle of Algiers to the bombing of the Beirut Marine barracks, from the expulsion of the Red Army by the mujahideen of Afghanistan to the expulsion of Israel from Lebanon by Hezbollah, guerrilla war and terror tactics have been the means Muslims have used to expel armies they could not defeat in conventional war.

The 9/11 killers were over here because we are over there. We were not attacked because of who we are but because of what we do. It is not our principles they hate. It is our policies. U.S. intervention in the Middle East was the cause of the 9/11 terror. Bush believes it is the cure. Has he learned nothing from Iraq?

In 2003, we invaded a nation that had not attacked us, did not threaten us, and did not want war with us to disarm it of weapons it did not have. Now, after plunging $200 billion and the lives of 1,400 of our best and bravest into this war and killing tens of thousands of Iraqis, we have reaped a harvest of hatred in the Arab world and, according to officials in our own government, have created a new nesting place and training ground for terrorists to replace the one we lately eradicated in Afghanistan.

Among those who have converted President Bush to the notion that without Arab democracy there can be no Mideast peace is Natan Sharansky, and much of what the famed Soviet dissident writes is undeniably true. Even inside the darkest despotism, people yearn for freedom. They hate tyranny and love liberty. They wish to live in lands that allow them to choose their own leaders. And as democratic rulers must return to the people for renewal of their mandates in free elections, they are more likely to seek the peace and prosperity their people desire. Thus, only democracy can pave the way to true peace and security. This is the message of Sharanskyï¿½s Case for Democracy, which the president has embraced and encouraged all to read.

But what is often true is not always true, and U.S. foreign policy, which is to protect U.S. vital interests and the peace and freedom of Americans, cannot be rooted in the idealism of an ex-Soviet dissident

or the ideology of neoconservatives who promised us a ï¿½cakewalkï¿½ in Iraq and assured us we would be welcomed with flowers. Sharansky notwithstanding, democracy is neither a necessary nor sufficient condition of Americaï¿½s peace and security, nor even of Israelï¿½s.

In 1967, David Ben-Gurion told Richard Nixon and this writer he hoped Nasser would survive Egyptï¿½s humiliation in the Six-Day War because only Nasser had the prestige to lead the Arabs to accept peace with Israel. Sadat was no democrat when Israel gave him back the Sinai and signed a peace. Arafat was no democrat when Rabin and Peres agreed to the Oslo Accords and shared a Nobel Prize with him. Assad was no democrat when Israel negotiated a truce with him on the Golan Heights. That truce has held. Nor was Khadafi a democrat when Bush agreed to lift sanctions imposed on Libya for the massacre of Pan Am 103 if Khadafi would surrender his weapons of mass destruction. Khadafi did, and Bush rightly claims this as a diplomatic success of his first term.

While it is true that the dictatorships of Franco, Pinochet, and Marcos gave way to democracies, that was not true of Batista, Somoza, or the Shah. When Carter undermined the Peacock Throne, we got the Ayatollah.

Urging Bush not to press Israel into making peace with the Palestinians until Palestine embraces democracy is a clever way to postpone peace indefinitely and let Israel expand its settlements and consolidate its hold over the West Bank and East Jerusalem. That may be in Israelï¿½s interest. But it is not in Americaï¿½s interest. Sharanskyï¿½s idealism just happens to coincide with Sharonï¿½s agenda. Can President Bush not see this?

America has old friendships and important interests in the Middle East that cannot await the dawn of democracy in the 22 Arab states where it currently does not exist. We cannot make the best the enemy of the good. And if democracy means rule by the people, how enthusiastic should we be about its introduction into the Middle East? In 1991, Algerians were given a democratic voteï¿½and elected an Islamist regime. The army intervened, igniting a civil war that left 100,000 dead. President Bush might ask his father why he did not speak up for Algerian democracy then.

Unlike Eastern Europe, where communism was imposed on Christian countries with traditions of self-rule, democracy never took root in the Arab lands of the caliphate. Thus King Faroukï¿½s ouster gave us Nasser. King Idrisiï¿½s ouster gave us Khadafi. And King Feisalï¿½s ouster gave us Saddam Hussein. How certain are we that if the kings of Morocco, Jordan, and Saudi Arabia fall, democracies will arise?

Given that the neocons were wrong on every count about Iraq, does Bush truly wish to gamble the Middle East on their confident predictions that, once the Arab monarchies fall, Western democracy will flourish among people who seem to revile Bush and revere Osama bin Laden?

After the shocked reaction in many quarters to the presidentï¿½s inaugural address, the White House, George H.W. Bush, and later the president himself hastened to explain that there was nothing new or radical in the speech. Perhaps a sense of reality has already begun to manifest itself.

We are simply not going to stop buying Saudi oil or cut off our $2 billion in annual aid to Egypt or sever relations with Musharraf or sanction a China that could sink the dollar because these regimes refuse to make the reforms Bush demands. It is not going to happen. President Bush will either wind up eating his overblown rhetoric or following it over the cliff and taking us with him.

America ï¿½goes not abroad, in search of monsters to destroy,ï¿½ said John Quincy Adams, ï¿½She is the well-wisher to the freedom and independence of all. She is the champion and vindicator only of her own.ï¿½ Under the tutelage of Jacobins who call themselves idealists, Bush has repudiated this wise core doctrine of U.S. foreign policy to embrace Wilsonian interventionism in the internal affairs of every autocratic regime on earth. We are going to democratize the world and abolish tyranny.

Giddy with excitement, the neocons are falling all over one another to hail the president. They are not conservatives at all. They are anti-conservatives, and their crusade for democracy will end as did Wilsonï¿½s, in disillusionment for the president and tragedy for this country.

5321. Grundig S350 AM BCB DX results part II

Newsgroup: rec.radio.shortwave
Date: 2005-02-27 17:59:19 UTC
From: "WDX9KHY@AOL.COM" <WDX9KHY@AOL.COM>
Message-ID: <1109527159.048320.9070@l41g2000cwc.googlegroups.com>
Source record: 9327

Hello Friends
Having had the S350 for a day or two I have had the chance to do some DX'ing with it. Nice catches I never heard before :
WOC 1420 Kc/s Davenport IA
CFRW 1290 Kc/s Winnipeg MB
WLIK 1420 Kc/s Paducah KY (1KW)

nothing real exotic. but not afraid to take on the graveyard freqs now. Maybe my memory is playing tricks but sure seems harder to pull 'em out now than on the pre-1975 dial. Not to raise flames but I'm glad I didn't spend big money for that CCrane receiver. I am very happy with this one. Only fly in the ointment..I get an image at 690 KC for a local on 1600 KC and
an image on 950 Kc/s for WLS 890 Kc/s (whose 50KW transmitter site is in a town very close to here). At night "real stations" come in on these freqs and I don't get the images..so no big deal.
All in all....nice little RX. Glad I got one.
73 Greg

5322. Re: Longwire question

Nice jd!

Many folks here are missing the point. It doesn't have to be 2X wavelength
or
even 1X wavelength. Just string up a horiz. loop anywhere you can and as
long as you can make it. Don't worry about height above ground or if it is
in a
circular, square or trapezoid, or what have you, configuration. If it is
anywhere
near as high as your proposed longwire or dipole it will work just as well
but
over a much broader swath of frequencies. Think of its performance as much
like a discone antenna at VHF & UHF - no gain over a half-wave vertical but
very broadbanded. The H-loop "generally" has omni-directional
characteristics
where as a dipole or longwire has definite nulls and peaks around the
compass.

I would guess that my H-loop is about at least 70-75 meters in circumference
at an average height of about 20 ft. It is strung around the edge of my
roof in
a large "L" configuration with the wire tucked under the roofing shingles at
strategic locations - invisible! It has survived several seasons of severe
weather and hasn't budged. I use it for SWLing as well as transmitting on
80-10 meters using a vintage Johnson Matchbox - sweet!

Compared to a dipole or a longwire it doesn't experience those "dips" in
reception on certain bands. Any "dips" that do occur are not as deep and
an antenna matchbox will easily make up for it.

Where anyone obtained the idea you must use dozens of 75+ ft telephone poles
around 100 acres of real-estate has simply never built or used a horiz.
loop.

> Granted, it would undoubtedly work better at greater height, my horizontal
> loop encircles a small section of my woods at varying heights of anywhere
> from 6 feet to (maybe) 15 feet. I ran about 475 to 500 feet of wire,
> hanging it off available tree branches as I went, in what is more or less
a
> square with somewhat bulging sides. I couldn't tell you exactly how much
> wire I used, other than I used enough to form a loop through the woods. I
> couldn't tell you it's impedance. I feed it with coax through a home-made
> 1:1 transformer. I have no complaints with it's performance.
>

"Sullivan followed up by having the undercover videotape hand-delivered to Kerry's office."

"More than 11 weeks later, Kerry finally replied to his well-informed and anxious constituent. "I have forwarded your tape to the Department of Transportation's Office of Inspector General [DOT OIG]," he said in a brief July 24, 2001, letter, a copy of which I've obtained."

"Yet Sullivan had made it clear in his letter that going to his old agency was a dead end. He and other agents had complained about security lapses for years and got nowhere. "The DOT OIG has become an ineffective overseer of the FAA," he told Kerry. Sullivan suggested he! show the tape to peers on committees with FAA oversight. He even volunteered to testify before them."

"But he never heard from Kerry again."

I need some help. It is 18:30 utc & I am hearing YZE on .245 MHZ. My BeaconfinderII book shows the only YZE on .245 is in Gore Bay Ontario??? They are sending YZE & then a Long dah around 4or5 seconds.

I don't think that would be possible at 18:30 utc here in central KY ?

Anyone know if there is another YZE ? I know there are 2 BU. One in Columbus & one in Buffalo ?

Just thought I would kill some time & make a sweep on the LW band. Kind of fun.

Any help appreciated.

Do you do any LW Ace ?

I love my BCL2000 (OEM S-350)
Try 1040 WHO in Des Moines, Iowa
They sent me a QSL card for a written report sent to:

WHO Radio
1801 Grand Avenue
Des Moines, IA 50309

I'm sure lots of other MW stations still QSL, but
WHO was kind enough to respond when I
emailed the chief engineer and inquired about sending
reception reports.

Message-ID: <17382-4222155B-89@storefull-3138.bay.webtv.net>
Source record: 9334

i am constructing the typical bcb receiving loop. its 18 inches on a side, 15 to 18 turns, 365 variable cap, the usual setup. my question is this, is it feasible to throw one or two turns on the same frame parallel to the other turns to tune a sw loop? does the proximity of the other bcb loop wreck the characteristics of the sw loop? how about if i switch the variable from one loop to the other, leaving the opposite loop open and untuned? or how about switching in taps, decreasing the number of turns at each interval to tune from bcb up to sw? would the unused turns on the frame make the remaining loop untuneable?

Hello Michael,

Just a quick update. There are fourteen, not twelve,
"bottom-of-the-short wave bands" (which you can count as additional
"memories") and I should mention that the image rejection on the 'SW35
is superior to that of the ICF-SW7600GR, and while it's possible that
that may be partly due to the '7600GR's somewhat better sensitivity, it
appears to me that the 'SW35 is inherently better in that regard as I
find few, if any, images even with the auxiliary antenna attached.

I also didn't mention that the radio is a good performer on MW and FM,
as well.

All in all, it's a very fine receiver and I wish you the best of luck
with it. (You may find that you will want to leave it in your car with
the batteries removed, as I do, just for "emergencies" or casual
listening on the road.)

Best,

Joe

I don't think so. I think Bush ignored the warnings because he wanted
an event to use to scare the people into backing his PNAC ambitions.
He knew something was coming and approximately when. He went absent
from the White House for the longest Presidential vacation in history.
He is swine.

While it sounds like you have little more than a cloud warmer there (if
otherwise please do advise), you're right that it costs very little to run a
few hundred feet of wire anywhere you can get it. The result could be a
good listening antenna. What it won't normally be is a good transmitter,
unless it meets mimimum design conditions.

Also, don't you worry what kind of RF you illuminate the house with? It looks to me like people inside could be as close as 2 or 3' from your antenna, and at most HF frequencies that is way too close to 100+w transmit power.
--

That would be me. I have seen one in use, just never replicated by a hobbyist (yet). Without the near 1/2 wave design-elevation, a horizontal wire antenna becomes NVIS (or cloud warmer). We've all heard of people doing this with their rain gutters for years, but that doesn't translate to a worthwhile effort when compared to most achievable antenna designs.

Thanx again Joe.... Although a radio's memory features have never been
important to me, sensitivity and selectivity are. It is interesting to hear
that the SW35 is more selective then the 7600gr. After I have a few weeks
with it, I should be able to tell how is stacks up against my 7600gr as far
as sensitivity goes. I really love evaluating portables.

Hello Steve,

You are correct that the '7600GR's speaker leaves a bit to be desired, though I personally do not find extended listening to be fatiguing.

A "cheap" way for improving the sound is to buy a Radio Shack stereo cord (Cat. No. 42-2483 which is 6-feet in length; they also sell longer cords, if desired) to run from the line output jack on the radio to your stereo system's AUX jack. This affords excellent sound.

Your comment on headphones: 100% agreed. It almost goes without saying that a good pair of headphones is an absolute "must" for ANY short wave radio.

Best,

Joe

I followed it accurately. If the antenna is resonant (frequency) the
impedance drops to a value which is dependant on distance from ground.
Away from resonance the impedance goes high. The impedance of a
random wire is largely a function of frequency.

Ace,

My BeaconFinderII Book shows the BU on 230 as Columbus. I logged that one today. It also shows a BU on 231 Buffalo , NY. My book is older 2003 Rev. A however.

YZE still in good. My settings are .245.000 mhz. USB 1.8 khz bandwidth & the DPBT-400. I have PWF Batavia OH the strongest . DFI Defiance OH next on .246 & YZE in there with a lower note or tone than PWF but very audible @ 20:21 utc.

I checked 231 on AirNav and found nothing. Does show BFK on 215 however.

5353. Thought on my Super ATS-909

Newsgroup: rec.radio.shortwave
Date: 2005-02-27 20:32:12 UTC
From: Al Arduengo <exalti@yahoo.com>
Message-ID: <MPG.1c8bea4111725eef989680@news.dallas.sbcglobal.net>
Source record: 9352

I recently bought a barely used Super ATS-909 after having owned a stock version for about a little over a year. Initially I was hesitant to get one based on some negative reviews about the highly modified radio but curiosity overcame me and besides, I actually love the stock version especially when connected to a moderately long wire. The radio is rich in features and really just a pleasure to use. The Super 909 is hands down better!

In case no one knows the details, it has been modified to remove the mute while tuning, the detent is removed from the tuning knob, the speaker is replaced, the LEDs are replaced with blue ones, an external AM antenna jack is added and selectivity/sensitivity are drastically improved.

Tuning it is a pleasure. The knob turns easily enough that my finger does not tire or feel irritated. The RF gain knob has a significantly greater effect compared to the original version does. Turning the gain down all the way will silence all but the absolutely strongest local AM sources.

The display looks pretty cool in my opinion. Bright blue. Sound is noticeably improved with the new speaker and seems to take higher volumes much more easily.

It seems to be a little less forgiving on batteries now but I don't care since I have mine on a 6V DC supply via the adapter anyway.

One of the improvements this radio got over the original version was in sensitivity. Trust me when I say, it is a HUGE difference. This radio easily matches and mostly exceeds my DE1102/DE1103/7600GR off the whip. The original version of the 909 was all but deaf off the whip. Add a 40-60 ft random wire to the Super 909 and I had to turn down the RF gain to keep it from overloading. I have heard many stations since I started using this radio than I ever did on the original version. It is very gratifying. I ordered a AN-LP1 and am finding it performs extremely well with this radio. I am retiring my random wire since the AN-LP1 seems to do at least as well for me. I often don't even turn on the LP1's controller but just use the loop.

The Super 909 has very good selectivity in my opinion. The only negatives I have encountered is 1) strong adjacent stations force me to detune a little to separate them from each other but it is still doable and 2) SSB reception is a sight more difficult to achieve now. I knew this going into the purchase but in the short time I have been a listener I have grown to decide I find the ramblings of most HAMs to be, let's just say, less than interesting. So no loss for me. Broadcast

listening is a treat now and I can hear much more out there than before.

I think this is a very nice portable radio and as long as skeptics keep the fact that it is a portable in mind, it is hard to beat this thing in comparisons to comparable models. I got a great deal on mine ($200) but you can get them for $300-350 on line in a few places. I love mine and will never get rid of it. I will be probably sell my stock version though.

Thanks for listening and feel free to ask if you have questions about these comments or the radio itself.

Cheers all.
-Al A.

5354. Sony AM/FM ICF-S10MK2 / Sangean DT-200 / Sony SRF-S84 'pocket' Radios

Dedicated twaddle? Like you? Like the Communist Party propaganda you spurt?

Got deep pockets?

Who is the "NATIONAL SECURITY ARCHIVE"? (oooh, big name - LOL)

"The Archive's approximately $2.3 million yearly budget comes from publication revenues and from private philanthropists such as the Carnegie Corporation, the John D. and Catherine T. MacArthur Foundation, the John S. and James L. Knight Foundation and the Ford Foundation."

It's offices are located at George Washington University.
Yes, your public tax dollars at work - for what? Keep reading...

Who are the m funders of the "NATIONAL SECURITY ARCHIVE" (oooh, big name - LOL)...

Carnegie Corporation of New York (Hilary's State):

A former board member was Teresa Heinz Kerry.
Condemns the Patriot Act and America's proposed development of missile defense system
Funds many civil rights, environmental, and anti-nuclear organizations
Assets: $1,824,314,932 (2003)
Grants Awarded: $74,542,133 (2003)

Much, much more:
http://www.discoverthenetwork.org/funderProfile.asp?fndid=5266

John D. and Catherine T. MacArthur Foundation

Established by John D. MacArthur and his wife Catherine in 1978; the sole owner of Bankers Life & Casualty Company, at the time of his death Mr. MacArthur was one of the three wealthiest individuals in America.
One of the ten largest private philanthropic foundations in the U.S., supporting hundreds of leftwing groups
Holds assets that total three times those of the three largest conservative

foundations combined
Major funder of groups advocating leftwing visions of gun control, feminism, environmentalism, juvenile justice reform, alternatives to incarceration, and civil rights
Major funder of the open borders lobby
Assets: $4,530,410,640 (2003)
Grants Awarded: $195,114,644 (2003)

Much, much more:
http://www.discoverthenetwork.org/funderProfile.asp?fndid=5223

Ford Foundation

Originally funded by the Ford Motor Company stock from the estates of Henry and (son) Edsel Ford in 1936
Largest private funder of the American left and its radical agendas
Supports communist front groups like the Center for Constitutional Rights and the National Lawyers Guild
Key funder of the Open Borders lobby
Assets: $10,015,612,595 (2003)
Grants Awarded: $431,643,480 (2003)

We all know about the history of the Ford family...

Much, much more:
http://www.discoverthenetwork.org/funderProfile.asp?fndid=5176

Who is the "NATIONAL SECURITY ARCHIVE"? (oooh, big name - LOL)

To most Americans, the acronym NSA refers to the National Security Agency, the United States' largest intelligence agency. But there is another NSA, and its motives are diametrically opposed to those of the National Security Agency, which is committed to promoting America's safety from terrorist threats. This second NSA is the National Security Archive at George Washington University (GWU) in Washington, DC, a self-proclaimed watchdog of U.S. intelligence and security agencies created by "anti-war" leftists. It is a favorite resource cited by proponents of "openness" in U.S. foreign policy; that is, those who advocate that the United States stop gathering intelligence on its enemies.

The NSA describes itself on its website as "a research institute on international affairs, a library and archive of declassified U.S. documents obtained through the Freedom of Information Act (FOIA), a public-interest law firm defending and expanding public access to government information through the FOIA, and an indexer and publisher of the documents in books, microfiche, and electronic formats." As a research entity, the NSA is the beneficiary of the painstaking work done by its sister group at GWU, the Center for National Security Studies (CNSS), which openly lobbies for more "openness." CNSS is the progeny of Morton Halperin, a leftist whose public record beginning in the early 1970s can be reviewed here. His entire career has been devoted to undermining U.S. intelligence efforts.

The CIA has been voluntarily declassifying documents since it released over nine million pages of Office of Strategic Services (the WWII-era predecessor of the CIA) records in the 1980s. But established procedures for declassifying records under voluntary or non-voluntary programs have been co-opted by political interests hostile to U.S. government clandestine activity. The NSA is in the vanguard of such groups. It has initiated over 18,000 FOIA requests since its inception in 1984. FOIA requires federal agencies to disclose records unless they are classified or otherwise legally non-public.

Since 1995, classified documents have fallen under Executive Order (EO) 12958, which removed the declassification process from the realm of national security considerations and placed it within the reach of political groups such as the NSA. Halperin was appointed as a top assistant to the acting Defense Secretary Les Aspin in 1993, which marked the initiation of the review of declassification procedures that culminated in EO 12958.

EO 12958 is to NSA what Roe v. Wade was to abortion proponents. EO 12958 de-fanged agency declassification authority and opened up the FOIA review process in a most dramatic way. There is no longer a presumption of confidentiality for sensitive security or foreign policy issues. The burden is on the federal agencies like CIA to review, on a case-by-case basis, each classification decision. Petty requirements in the order constrict the agency and become fodder for challenges by groups such as the NSA and the American Civil Liberties Union to overturn classification decisions on the basis of legal and procedural technicalities.

This has resulted in conflicting criteria for declassification and an ever-growing bureaucratic bloat to meet the flood of declassification requests and challenges. The NSA makes over 2,500 "public service" requests for documents and information annually. Resources that were once applied to deterring America's enemies are now being diverted to handle this process. The CIA employs 350 people to review and declassify documents. It receives over 6,000 FOIA and other declassification review requests every year. New electronic FOIA amendments require reduction of backlogged review requests subject to court-imposed penalties.

The EO also established the Interagency Security Classification Appeals Panel (ISCAP), an appeals panel that, pursuant to a 1999 Justice Department ruling, can legally overrule CIA classification authority and responsibility. There is no precedent, either in the U.S. or in any other foreign government, for this level of declassification of clandestine activity. For example, Britain's MI5 only recently made its first-ever release of records to the public of some 8,000 scanned images of original documents. But these records relate only to British political and intelligence history before and during World War I.

It is not surprising that prior to the 9/11 terrorist attacks, the CIA had such scanty human intelligence in the Middle East, where infiltration is notoriously difficult. Agents past, present, and future, foreign or domestic, who might be named are now at risk of reprisal from their enemies. Foreign governments are increasingly reluctant to cooperate with American intelligence agencies for fear that their actions and agents may be publicly

exposed. The same applies for any individuals or groups that may be able to help the U.S., or themselves, by aiding U.S. intelligence agencies.

This is precisely what the NSA wants. A perusal of the NSA website confirms the charade of its pretense as an innocent repository of historical documents. A link on the homepage is entitled: "Nixon: Brazil helped rig the Uruguayan elections (1971)." This is followed by a descriptive caption: "Documents reveal U.S. efforts to influence Uruguayan election." Even assuming that this is true, it is not necessarily something nefarious. The United States has done much more than influence elections before (such as basically running Japan and Germany for ten years following World War II).

Other headlined links on the NSA's website include: "Argentine Military Believed U.S. Gave Go-ahead for Dirty War. New State Department documents show conflict between Washington and US Embassy in Buenos Aires over signals to the military dictatorship at height of repression in 1976." Imagine an alternative headline that is just as plausible from a reading of the documents in question: "U.S. Government Struggles to Contain Communist Terrorists Amid Concerns Over Argentine Government Tactics."

Another headline reads: "State Department Opens Files on Argentina's Dirty War. Documents describe key death squad under former army chief Galtieri." Again, imagine an alternative headline that is just as plausible from a reading of the documents in question: "CIA Opens Files on Argentina's Dirty War. Documents describe key leftist terrorist groups under communist support from Soviet Russia." The public, however, does not have access to any such files for the simple reason that declassifying them would compromise the sources and methods used to obtain them. There is thus a bias at the NSA in favor of disclosing the unpleasant side of covert operations without disclosing the reasons for them.

Another link - "Did NATO Win the Cold War?" - lists mostly old documents that putatively weaken the claim that U.S.-led NATO containment and the U.S. military buildup ultimately ended the Cold War and protected the United States from Soviet Russia's expansionist goals. The title insinuates a phony argument. It is absurd as a matter of intellectual honesty to raise the question without acknowledging, much less documenting, contrary recent testimony from senior ex-Soviet officials stating that U.S.-led NATO containment and the U.S. military buildup did in fact cause the USSR to concede Cold War victory to the United States.

Two related items are conspicuously absent from the NSA archives. First are the Venona Files that revealed how thoroughly the Soviets infiltrated the U.S. government during the Cold War. Second are the Mitrokhin Archives. These were compiled by Victor Mitrokhin, the former archivist to the KGB's First Chief Directorate. Over the course of many years, he quietly made copies of a multitude of papers, and when he defected to the British in 1992, he brought copies of 25,000 documents with him. These documents are among the most damning public, first-hand historical evidence of Soviet aggression in existence. The omission of any mention of them completely debunks the illusion that the NSA is even-handed.

The NSA wins the public relations war since it can disingenuously argue that it has requested FOIA access to all documents relating to a particular subject (in an effort to be "balanced"), but that its requests have not been met; therefore the selective documentation in its archive is technically not the NSA's doing. The NSA can say, "This is government documentation - you be the judge." This can be maintained under the knowledge that CIA and other security agencies will never declassify all of their documents because it is precisely the most revealing documents that need to be most carefully guarded. The unknowing researcher relying on the NSA for documentation of the conflict in South America during the 1970s, for example, is faced with a one-sided portrayal of the difficulties faced by the U.S. government in combating communist infiltration. Equivalent documentation of atrocities committed by leftist groups would give the researcher reason to consider why the United States supported certain regimes to preempt communist takeover of Latin America. But "objectivity" here is a ruse. The word is cover for covert propagandizing.

There is no documentation on the NSA website of the most egregious recent lapse of U.S. National Security prior to 9-11: the stealing of nuclear secrets by the Communist Chinese during the Clinton Administration. A Congressional Committee headed by Fred Thompson (R-TN) produced reams of evidence indicting the entire Democratic National Committee apparatus in abetting a massive shakedown of U.S. security. A Los Alamos scientist, Wen Ho Lee, was found by the FBI to have downloaded the equivalent of 400,000 pages of nuclear design and testing information. Then-FBI Director Louis Freeh testified, ".the Department of Justice and the FBI stand by each and every one of the 59 counts in the indictment of Dr. Lee. Each of those counts could be proven in December 1999, and each of them could be proven today." Lee was subsequently released because the FBI could not reveal in court the evidence indicting Lee without compromising key national security information and sources. But that is less important to the NSA than revisiting anecdotal exchanges by Hungarian commissars circa 1956.

According to the NSA, a long list of recent international mishaps are somehow attributable to American neglect. These include the Rwanda genocide of 1994 (the NSA charges that Americans were willful "bystanders" during that calamity). The NSA makes no reference, however, to the 1991 Somalia genocide - curious, given the notoriety of that event and the much-publicized slaughter of 19 Americans - as a failure of U.S. foreign policy. Americans were certainly not "bystanders" in Somalia. Neither were they in Haiti in 1994, which was another U.S. foreign policy disaster. It is likely that there were valuable lessons to be learned from Somalia that led to America's decision to avoid a similar disaster from intervening in a localized, age-old ethnic conflict in which there was no compelling reason for risking the lives of Americans. That is an opinion shared by a good number of foreign policy observers, yet there is no documentation of it at the NSA.

The following quote, taken from NSA's commentary on the Rwanda episode, is most revealing:

"Despite overwhelming evidence of genocide and knowledge as to its perpetrators, United States officials decided against taking a leading role in confronting the slaughter in Rwanda. Rather, U.S. officials confined themselves to public statements, diplomatic demarches, initiatives for a ceasefire, and attempts to contact both the interim government perpetrating the killing and the RPF. The US did use its influence, however, at the United Nations, but did so to discourage a robust UN response. In late July, however, with the evidence of genocide littering the ground in Rwanda, the U.S. did launch substantial operations - again, in a supporting role - to assist humanitarian relief efforts for those displaced by the genocide."

The NSA is only interested in risking U.S. lives so long as they serve interests having nothing in common with America, and in support of regimes whose existence constitutes no real threat to the liberal democratic order of the civilized world, of which America is the principal caretaker.

The NSA is not true to any self-stated purpose, nor does it constitute a viable source of information. It does not speak to the history of any country, to the foreign policy of the United States worked out at great length, nor to the cost and risk to national security related to any of the documents it collects. In the end, the NSA only succeeds in compromising American national security and demoralizing, with its semi-fact-based reports, those people who serve the foreign policy of the United States.

I mentioned recently under the heading of Degen 1102 vs. 7600Gr that I hadn't noticed the sleep timer on the Degen 1102. It IS there. Actually, it's quite accessible and can have an input of from a few seconds to 99 minutes. I know the manual tells us it exists from 01 - 99 minutes, but it depends on where the seconds are (or how close it is to the minute change) when the timer is set. The minute you are in when it is set is counted as the first minute and can be from a sec. or two up to a full minute.

<snip>

Thank you for a detailed description; I tried the drop wire earlier.
It worked, but not as good as the original built-in whip out of the
window; I got somewhat better results with a whip under a moderate
angle pointing upward, like a penis in erection, something like that.
Is it because the antenna under the angle picks less noise, or is it
something else, I can't tell, I don't know.

So I decided to build an "external whip", and asked will an equally
long peace of wire through the window do the job equally good as a
whip, maybe CB whips are worth purchasing if they are making whip
antennas with silver in the alloy for better conductivity, or do other
tricks in production process to increase reception performance ?

Since replies suggest to stick with a wire, yesterday evening I
completed a bamboo stick with a wire within, and it works as expected.
I don't use a window frame as grounding point, the frame is made of

aluminum. Few weeks ago I visited a local flee-market and found a piece of iron previously used as a weight for live-stock scales. Works good.

After Grasscutter Radio signed off 6925 at 2114 another station came up much weaker and it sounded as though they were saying "This is Radio Swan testing" several times, then off.

Guess I'd need an accomplice to haul their body out back and toss it into the ravine for the critters to gnaw on.

It's pretty hard to outrun a shotgun or an SKS, or even a 45 pistol as well.

By the way, my neighbours are all heavily armed as well.

In the immediate future I doubt it, but over the next few months as time marches on new people will rise up and practices will change. I seriously doubt this time next year if we will be hearing Scott's tapes nearly as much as we do now.

Except when they take a lightning hit. ;-) Even then, the protection system inside spares most of the radio from damage. Turnaround from Drake was two days!

Leftie Anchorman Peter Jennings and his a CanadAlien broadcast

As a child he was "bone lazy and a bit delinquent," Jennings told a Good Housekeeping Magazine interviewer, and he found school "boring." He was expelled from several private schools, then dropped out of school forever before completing 10th Grade.
...
"My mother.was pretty anti-American," Jennings said on the September 6, 2002 CBS "Late Show with David Letterman. "And so I was, in some respects, raised with anti-Americanism in my blood, or in my mother's milk at least."
...
Jennings had limited knowledge of American history and culture. He pronounced words like "schedule" and "lieutenant" in a distinctly Canadian and aristocratic way - "SHED-u-al," "lef-TEN-ant." He once mispronounced Appomattox, site of Confederate General Robert E. Lee's surrender that effectively ended the War Between the States. He confused the U.S. Marine Corps anthem with the U.S. Navy's, "Anchors Aweigh."
...
He impressed bosses by doing the first-ever interview with terrorist Palestine Liberation Organization (PLO) leader Yasser Arafat.
...
"In the early 1970s, when he was single [i.e., divorced from his first wife] and head of the ABC bureau in Beirut, Peter Jennings dated Hanan Ashrawi, who at the time was also single and a graduate student in literature at the American University in the Lebanese capital," reported the December 30, 1991/January 6, 1992 U.S. News & World Report. "Jennings was introduced to Ashrawi's parents and sisters and became part of her circle of friends."

Ashrawi was, in fact, the youngest of five daughters of a politically active doctor. At American University she was a leader of the General Union of Palestinian Students while dating Jennings. As an adult the chain-smoking Ashrawi became part of the public ruling circle of the Palestinian Authority in Arafat's regime. "Anyone who has known Hanan as long as I have," Jennings said, "is not surprised to see her emerge as a persuasive spokesperson for

the Palestinians."

On September 11, 2001, Jennings was Anchor of ABC when Islamist terrorists killed nearly 3,000 Americans in a series of attacks that destroyed New York 's World Trade Center and struck the Pentagon.

"It is certainly a motivating factor," Jennings told viewers during his coverage of this horror, "that the hatred of the United States, and the hatred of the United States as a patron of Israel, whether you're from Afghanistan, or whether you're from Iran, Iraq, or inside the Palestinian territories is so intense at some levels, and has become more intense in recent months, that nobody will be, very many people will not be surprised at this attack today though like everybody else will be amazed at the magnitude and success of it."

"[Peter Jennings] hosted what looked like a little intercontinental tea party for alleged experts on the Middle East," wrote liberal television critic Tom Shales in the September 17, 2001 Washington Post, "one of whom was professional Palestinian spokeswoman Hanan Ashrawi, whom Jennings hailed as 'widely known in the United States.' "Jennings wanted to know," wrote Shales, ".how anyone could hate America so much that they would launch this kind of vicious, calamitous attack. Ashrawi blamed U.S. foreign policy (for having 'fought Arab nationalism') and, predictably for her, Israel. Ashrawi complained that 'Israel is given preferential treatment, treated as a country above the law, as part of her condemnation. Jennings deferred to Ashrawi, as usual, and let her filibuster. It was a nauseating display," concluded Shales.

Jennings never informed his audience about his close relationship with Ashrawi, nor of his having been "part of her circle" of radical friends in Beirut. In 1972, while covering the murder of 11 Israeli athletes by Palestinians at the Munich Olympics, Jennings went out of his way to refer to the murderers as "guerrillas" and "commandos," never using the word "terrorists."

"I first saw Jennings on ABC when, as a young TV journalist, he reported from the Munich Olympics," wrote Martin Peretz, publisher of the liberal The New Republic in its September 13, 2001 issue. "And I was filled with disgust that his subsequent career has only deepened. At Munich - I still remember it, 30 years later - Jennings tried to explain away the abductions and massacre of the young Israeli athletes. His theme: The Palestinians were helpless and desperate. Ipso facto, they were driven to murder. That's life.."

"In Sept. 2002, when ABC News aired a retrospective on the Olympic Massacre," wrote the web site HonestReporting.com, "Jennings unabashedly said that Israel should stop regarding the Palestinians as terrorists as a result of the Olympic Massacre of three decades ago. Jennings dismissed the continual barrage of thousands of Palestinian terror attacks against Israelis, not only before, but also since the '72 Olympics."

In large part because of Peter Jennings, ABC News was quicker than its rivals to air foreign criticism of Israel and to portray Palestinians, other Arabs, Iranians and even terrorist organizations sympathetically. "I felt very strongly - and I still do - that there is much more than the Israeli side to the Middle East story," Jennings told Rolling Stone Magazine. "There are nineteen countries in the Arab world, and I worked in all of them."

"It is Hezbollah, which means 'The Party of God,' that gets credit for liberating Lebanon from the long Israeli occupation," said Jennings in his report from Beirut on March 27, 2002. "Yesterday, I went to see its 38-year-old leader, Hassan Nasrallah. He is a popular member of the political establishment. The Bush administration says Hezbollah is a terrorist organization. 'Hezbollah was proud to resist the Israeli occupation,' he says. 'We gave our lives. We are not terrorists.'"

Jennings never informed his audience that Hezbollah was responsible for bombing the U.S. Embassy in Lebanon and a U.S. military barracks where 241 Marines were murdered by a Hezbollah truck bomb. He also neglected to mention the theocratic dictatorship of Iran's role in arming and funding Hezbollah, a Shiite terrorist organization with close ties to Tehran.

As war with Iraq approached in 2003, Peter Jennings did reports favoring continued inspections by the United Nations. On January 21, 2003 Jennings reported on "several hundred artists and writers walking through the streets of Baghdad to say thank you to Saddam Hussein" whose regime "has always supported the arts." On his newscasts Jennings featured anti-war activists, described as noble idealists, but he never told viewers of the radical background of many activists nor that the organizer of the largest anti-war protests was the Marxist-Leninist pro-terrorist group International A.N.S.W.E.R.

After U.S. troops removed Saddam, Jennings described those gathered at the toppling of the dictator's statue as "a small crowd." Jenning's prot�g� during the war, fellow Canadian and MSNBC reporter Ashleigh Banfield, ascribed U.S. policy to the influence of what she called "the Jewish Lobby."

In 1975 Jennings returned to Washington, D.C. to host "A.M. America," forerunner to today's "Good Morning America." By 1977 he transferred to ABC's London bureau, from which in 1978 he became part of a triumvirate of evening news anchors along with Frank Reynolds and, from Chicago, Max Robinson.

In 1983 Frank Reynolds was suffering from cancer, and ABC chose Jennings to replace him. "Anchor people are slaves to the daily broadcast," Jennings has said. "Very high-priced slaves I grant you. But slaves." He has been enslaved as anchor of "World News Tonight" for more than 20 years.

In 1990 he also began doing specials under the name "Peter Jennings Reports." These have often dealt with controversial topics. In 1999 he anchored a 12-hour series titled The Century and co-authored a best-selling book with the same name. In 2004 he anchored "Jesus and Paul - The Word and the Witness," a three-hour special that provocatively interpreted these founders of Christianity through the views of radical theologians such as

Episcopal Bishop John Shelby Spong.

"We may tell you all the time that our principal aim in life is to communicate and assist, inform," said Jennings on a 2001 CBS News special Breaking the News. "But if you see injustice and you can get people to do something about it, ahh, it's just a glorious feeling.. There's nothing a reporter likes more than to have an effect on policy."

In what directions has Peter Jennings shaped ABC News coverage to influence policy? Decades of documentation and analysis by the Media Research Center and others, as well as statements by Jennings himself and those with whom he has worked, provide answers.

"Peter, I believe, genuinely thinks of himself as a nobleman doing public good," former ABC News Correspondent Peter Collins told Cybercast News Service (CNS) in December 2003. "When he and his producer load and tilt a story, you can argue it's leftist bias, but it's just as effective to say they left out basic facts because they couldn't see them or they are incompetent to see them... In order to save the peasantry in America.it's their obligation to present these facts the way they present them."

Jennings' patronizing condescension towards American "peasants" - "Americans are pretty insular people for the most part," he told David Letterman in 2001 - was never more on display than in November 1994 days after voters removed Democrats and put a Republican majority in control of both houses of Congress for the first time in four decades.

"Ask parents of any two-year-old," said Jennings in his daily ABC Radio commentary on November 14, 1994, "and they can tell you about those temper tantrums: the stomping feet, the rolling eyes, the screaming. It's clear that the anger controls the child and not the other way around. It's the job of the parent to teach the child to control the anger and channel it in a positive way. Imagine a nation full of uncontrolled two-year-old rage. The voters had a temper tantrum last week.. Parenting and governing don't have to be dirty words: the nation can't be run by an angry two-year-old."

Jennings did not vote in that election. He was a citizen of Canada, ineligible to cast a ballot in the United States. When his rival American news anchors were prevented by a legal travel ban from visiting Communist Cuba, Jennings traveled there to do reporting with his Canadian passport.

In 2004 Peter Jennings announced that he had become a U.S. citizen, but this statement was incomplete. He in fact also retains Canadian citizenship and is therefore a dual citizen. Jennings' political views remain those of a cosmopolitan Canadian. He is far more European than American in values and culture.

Among the most repeated themes in stories by Peter Jennings are that the United States is "lagging behind" the rest of the "industrialized world" (and Europe in particular) in government-provided health care, child care, paid leave for parents and other social programs.

"The best child care system in the world..the Swedish system is run and paid for by the Swedish government, something many Americans would like to see the U.S. government do as well," declared Jennings in a virtual editorial on "World News Tonight" on November 22, 1989. Jennings did not mention that in the socialist nanny state of Sweden, children have been taken away from parents who were declared unfit for being overweight.

"Mr. Bush believes in a universal tax cut," reported Jennings on October 4, 2000, "which would mean a very large chunk of money not available for government programs." His reporting depicts nearly every potential tax cut negatively. Jennings in 1996 dismissed the proposed "flat tax" as "a very radical notion."

But Peter Jennings admires radicalism on the left.

"Medical care was once for the privileged few. Today it is available to every Cuban and it is free," Jennings on April 3, 1989 told "World News Tonight" viewers. "Some of Cuba's health care is world class. In heart disease, for example, in brain surgery. Health and education are the revolution's great success stories." He did not mention that patients must bring their own sheets and light bulbs to the operating room or may die from lack of antibiotics. He did not mention that education includes making children work unpaid in factories, and that it includes military training to teach children how to "kill the Yanquis."

After the mother of five-year-old Elian Gonzalez died trying to bring her son across the waters between Communist Cuba and the United States, the prison island's Marxist dictator Fidel Castro demanded the boy's return. President Bill Clinton's Administration sided with Castro and on an Easter Sunday used shock troops to attack reporters and at gunpoint to tear the boy from the arms of relatives in Little Havana, a suburb of Miami, Florida.

"In Miami today, immigration officials met with the Miami relatives of Elian Gonzalez again," said Jennings, also siding with Castro, to begin his newscast on March 28, 2000. "And once again the government has failed to get the kind of cooperation from the relatives that might allow the case of this young boy to end in a civilized manner that is best for him."

According to former ABC Correspondent Peter Collins, when in 1989 he proposed to do a report from Nicaragua on the 10th Anniversary of rule by the Soviet-aligned, Fidel Castro-supported Marxist Sandinista regime, Peter Jennings intervened.

"[Jennings] himself called me up in Managua and essentially dictated to me what I should say. Basically what Mr. Jennings wanted was for me to make a favorable pronouncement about the 10 years of the Sandinista revolution," Collins told Cybercast News Service, "and he called me up, massaged my script in a way that I no longer recognized it."

"The Sandinistas brought with them Marxist ideas about spreading wealth and creating a new, unselfish society," read part of the Jennings-rewritten script that ABC broadcast. "And in the first few years, they did manage to reduce illiteracy, the infant death rate and launched the biggest land reform in Central America. But the Reagan administration saw the Sandinistas

as a threat and forced them into a war with the U.S.-backed Contras."

Jennings frequently pressed ABC reporters to rewrite their stories with a more leftward slant. In recent years he has supported efforts by ABC News Political Director Mark Halperin to do the same. Halperin on the day of the final 2004 presidential debate, a debate moderated by Charlie Gibson of ABC News, sent out a memo directing all ABC news reporters and other personnel to deal more harshly with any misstatement by Republican candidate President George W. Bush than any by Democratic presidential candidate Senator John Kerry (D.-Massachusetts).

"In terms of the direction that Peter Collins recalls Peter Jennings pushing in - and that was to the left of where the correspondent is - that's consistent with my experiences, and I think most [ABC News correspondents'] experience," Bob Zelnick told Cybercast News Service. Zelnick ended his 21-year career as an ABC News reporter in 1989 and now chairs the Department of Journalism at Boston University.

Is Jennings a biased journalist? "I'm a little concerned about this notion everybody wants us to be objective," he said in October 2004, noting that journalists are human and have points of view through which they filter their perceptions of the news. He added: "There's a whole industry of conservatives saying, 'Ah, it's those damn liberals,' and a whole group of liberals saying, 'It's all those damn conservatives.'"

"Historically in the media, it has been more of a liberal persuasion for many years," L. Brent Bozell III quotes Jennings as saying in his 2004 book Weapons of Mass Distortion: The Coming Meltdown of the Liberal Media. "It has taken us a long time, too long in my view, to have vigorous conservative voices heard as widely in the media as they now are."

"I think there is a mainstream media," Peter Jennings told CNN's Larry King on May 15, 2001. "CNN is mainstream media, and the main, ABC, CBS, NBC are mainstream media. And I think it's just essentially to make the point that we are largely in the center without particular axes to grind, without ideologies which are represented in our daily coverage, at least certainly not on purpose."

On the October 17, 2000 "World News Tonight," Peter Jennings eulogized Soviet apparatchik and Communist Party USA leader Gus Hall, who died that week at age 90. Gus Hall devoted his life to defeating America in the Cold War and to establishing a totalitarian dictatorship in the United States, none of which was mentioned by Jennings. "Hall," said Jennings, "never wavered."

If I understand you what you want to do is make two loops, one for MW
and the other for SW with fewer turns for two resonate loops.

You could just leave the terminals open on the unused loop where it
would not affect the in use loop much.

Well, you might try:

Radio Station 4960
Catholic Radio Network
Vanimo
Papua New Guinea

I'd put a prepared card in with it, and an addressed envelope, and maybe a dollar along with your report.

It might just work.

I have one of the stock versions and did the mute and detent mods myself.
What speaker did they put in for you? This is sort of a hybrid portable
almost table top radio - belying the other poster who criticized it. This
radio I have an R75 which has a much worse stock speaker than the 909.
has its place in my shack.

Al Arduengo wrote:

I thought this guy was a washed up has been.

The problem with these sorts of ideas is that they don't actually say what the issue really is - which making money however you can.

BTW WW1 was NOT about making the world safe for democracy. It was about Germany wanting to be a world power and the strongest nation in Europe. Among other things.

TIANLI,

And people wonder why many American's call the so called Big Three
National News Organizations ABC, CBS and NBC "The Liberal Media ELITE".

.
Clearly Peter Jennings and ABC = Anti-American Broadcasting Comraden
are a prime example of the Liberal Anti-American Bias in the US Media.
.
Fair-and-Balanced :
1. One Hour of FOX News
2. One Hour of NPR/CPB News
3. One Hour of ABC/CBS/NBC News
Just Listen, Learn and Understand for Yourself.
.
so say i - my opinions stated as facts ~ RHF

That's flawed logic. Besides, there's more to it than just having a government funding scheme. The entity must be competent and editorially independent.

Open and transparent government is called for in the Constitution.

Your red-baiting is absurd. You are politically immature.

I used the site because it came up first on Google. The letters are photcopies of official U.S. Government documents. These belong to all citizens of the USA. We paid for them. We hired the people who wrote them. We have every right to see how our government does (or doesn't do) its job.

You sir, are the Antiamerican one.

I live in an apartment building in Brooklyn. If your building is like mine, the angle of the antenna has nothing to do with your reception problem. By scouting around with a portable receiver, I found a noise 'envelope' literally surrounding my building. No kidding, I could walk out onto my fire escape, hold the receiver out as far away from the building as I could get it, and at some point it would spring to life with signals popping out all over the place. It was the same at ground level, on other floors, and a tad worse on the roof. My guess is that, if you just use the bamboo stick to get a wire outside the noise envelope of your building, it can hang straight down and you'll get decent reception. In fact, if you've noticed improved reception with a whip extending up at a 50' angle or so, I suspect it's because part of the whip is making it 'into the clear' and out of the building noise.

Yes they do exist unto themselves. No need for EM wave to be present for
them to exist and they have a characteristic impedance that does not
need any EM waves around either.

An antenna takes or causes or converts a local current loop into
electromagnetic energy on transmit. The antenna performs the reverse
function on receive.

> ? ? ? What Would Be ? ? ?
> The Better Shortwave Antenna (3 MHz - 30 MHz) in Outer Space ?
> * A simple Dipole ?
> * A basic Longwire ?
> [Where Space is Unlimited -&- The Ground Effect is Nothing]

Not a lot of difference between air and vacuum. All antennas would work
about the same. They would all resonate at a slightly higher frequency
in vacuum than in air.

> OBTW - One might also think as a Speaker and/or Microphone as a
> form of Antenna 'mechanism' in that they to perform this function
> with respect to what is labeled as Audio Frequency Energy.

Speakers and microphones convert energy between sound pressure waves and
a local current loop. This has nothing to do with electromagnetic waves,
which antennas convert.

> Logic and Reality
> - Can Only
> - - Come Together

When the far left and the far right agree on something, you know we're in trouble. Buchanan's monologue could easily have been the commentary on CNN or the BBC or even (with a few word changes) Radio Havana Cuba. Bush's radical ideology has alienated both the left and the right as well as the center (Bush was reelected with the lowest approval ratings of any president who has won a second term). It's not accurate to think of Bush and his cronies as "neoconservative" because as Buchanan points out they're not really conservative. Bushism is a new Third Way, a radical break from American tradition that calls for endless war and endless suppression of freedoms at home and abroad in support of this war. Bush's ideology is closer to Nazism in its call for endless war and an ever expanding sphere of influence for America won through war. Bush has called for American hegemony over the world, a Pax Americana enforced not through peace but through the brutal occupation and oppression of the peoples of the world, including Americans. Well, even if Bush brings back the draft (which he will have to) and young Americans gladly march off to enforce the tyrannical rule of Emperor George, there's not enough people in America to enforce peace through occupation over the entire world. At least the Muslims and Arabs, and many of the Europeans, are not afraid, and FEAR is the only way for Bush to enforce the War Americana without occupying every single country in the world with massive manpower. Even 150,000 troops are not enough to create an artificial peace in Iraq. Just think of how many more troops it would take to occupy Iraq AND Iran AND Syria AND North Korea AND a zillion other places. Bush's goal of creating "democracy" through war and occupation is doomed to fail and take the world with it.

Only if another goofy cloistered rich eccentric
someplace comes forward and gives him another
million dollars. In that case the likelyhood
is high that Profit Stair will buy up all
the remaining airtime on the Caribbean
Beacon (1620 Khz AM?) to spread his
unique brand of bullshi+ among the stupid
and the easily led.

It has nothing to do with frequency. When you are measuring the antennas
reactance to a EM wave then it does but that is not the same thing as
the antennas characteristic impedance.

Get frequency and the reactance to it, out of your head. The impedance
of the antenna or anything else for that matter depends on its physical
properties not what you might stimulate it with.

Here is a news flash for you. This RRS news group. I don't read this news group to gain political insight or other off topic news items.

Take this somewhere else or you are going in the kill file.

David is an off topic Troll. You and others are just going to end up in everyone else's kill file. This has nothing to with the fact that I agree with you or not. I just want to read radio related stuff. You on the other hand repeatedly post off topic and only occasionally post on topic.

I expect people to sometimes post off topic but you and a few others are doing it constantly.

Join some political topic news groups.

I forgot about those. Actually, WNCX = "North Coast eXpress to Rock and Roll" and that's how they ID'd themselves when they signed on in 1987.

> WUAB -- "United Artists Broadcasting"
> WKBF -- "Kaiser Broadcasting" (looong defunct)

These, I didn't know about.

Lessee, there are a couple more. KKJZ Long Beach, California - "K-Jazz", simulcasting on KUOR Redlands, owned by the University of Redlands. KKJZ is licensed to Cal State, Long Beach, IIRC.

Apropos of WCLV, Los Angeles's classical station is KMZT 105.1, "K-Mozart."

Los Angeles also has Kiss 102.7 (KIIS) and "Coast" 103.5 (KOST).

I was anticipating that exact sentiment to be expressed here. If and when it becomes economically prohibitive for powerhouse networks to broadcast over the airwaves due to all the lord high advertising revenue going satellite, it will only open the way WIDE OPEN for a group of "rebels" to make use of good old fashioned radio. As a matter of fact, if you have just five cents worth of socio-psychology, you'd understand full well that there would be a huge group of people that would turn from the main stream and tune into the new age "underground" culture that uses good old fashioned radio waves to bring their message, music, media etc free of the oppressive commercial laden satellite jerk-offs.

Bank on it.... If and when satellite does away with radio, radio will become free, and unencumbered by mass-media money grubbing pigs, and thus, attract the masses again until it becomes commercialized again.

In short... Radio wont die... Just evolve... At the very worst, it will indeed even become way more interesting then it is now.

Michael

I remember seeing an ad for a Vespa from 1974 (the year I was born) that
was sold at Payless (a drug store) for $400 or so. Now a Vespa will run
you four THOUSAND dollars, and there's only ONE dealer for ALL of
Northern California (in San Francisco). Here in Sacramento you can buy a
scooter called a Kymco, but even that will run you two to three thousand
dollars. My, how times have changed!

Caribbean Beacon broadcasts on shortwave, although I don't remember the frequencies offhand since I'm not much into that sort of thing. (Gene Scott, that is.) I doubt that a 1620 khz station on Anguilla would reach to Miami. The local diocese here in Sacramento runs a "Catholic Radio" station on 1620. Which reminds me, whatever happened to Vatican Radio? I haven't seen them listed in Passport for a couple years now. I once saw, in a book, a QSL from them showing an antenna shaped like a Christian cross. For that matter, is Eternal Word Network still on shortwave? It seems like the traditionalist Christian broadcasters (including HCJB) have gone by the wayside while kook religious stations like WWCR and WWRB have grown. A sad commentary on the state of Christianity today.

Could you post links to these "various reports"? I'd like to know more.
Given Sam's sophistication, I wonder if the guy they "caught" isn't a
fall guy meant to mollify the ham/SWL community's curiosity.

We'd like to invite you to join our free
WORLD SCIENCE e-newsletter, which
contains some of the world's most exciting
science news and photos long before they're
in the papers and magazines. A sample
newsletter is below.

To join, just send an email with "subscribe"
in the subject line to:
neutrino750 @ yahoo.com (remove the spaces).

The newsletter, sent out about every 3-10
days, contains short summaries of our new
stories, with links to web pages containing
the full stories. It's free: no pop-ups, passwords,
spam, or gimmicks -- that's our pledge! The full
story pages do contain small side ads (non
pop-up), which are what supports our news-
letter. YOU pay nothing ever. You can cancel
anytime simply by replying to a newsletter
email and typing "unsubscribe" in the subject
line.

Below is a sample newsletter. It doesn't
contain the full story links because we're not
allowed to provide them here, but the real
newsletter will contain working links.

****
LAST WEEK'S WORLD SCIENCE EMAIL
NEWSLETTER

* Possible dinosaur-bird missing link found:
It's not the first bird-like dinosaur ever found --
but it is the closest yet found to the actual
dinosaur ancestor of birds, researchers say.

Click here for full story (link will work in the real newsletter)

* Science in Images - A more life-friendly Mars:
Most Mars photos show a rocky, dry-looking land-
scape. This is another view: an area of the planet
that researchers think might have once been
habitable. They plan to explore further.

Click here for full story (link will work in the real newsletter)

* Another record: biggest blast ever in our
galaxy:
The most powerful explosion in our galaxy ever
recorded occurred recently when an exotic star's
magnetic field snapped, astronomers say.

Click here for full story (link will work in the real newsletter)

* New robots walk nearly like humans:
An older robot does it too, but it used 10 times as
much energy as humans do, researchers say; that is
changing.

Click here for full story (link will work in the real newsletter)

* Brain doesn't have universal language rules,
researchers claim:
Some researchers argue that language is more like
a creation of itself than a creation of our brains.

At 04:08 UTC - faint, but steady. Listed as 1,000 watts. If that's right, and it's the only thing I can find on this frequency at this time, pretty good catch! (Corrections welcome).

Anybody have any idea what the CW is on 9.330.5 @ 0424 UTC Monday?

I can actually hear it quite well on AM on my Yaesu with the outdoor antenna. The Icom using an indoor antenna receives it better on LSB.

Pittsburgh PA, signal is very strong with very deep fades at times.

No Amateur priveleges on 9.330, from what I can see.

Sounds mechanical, but I just get gibberish using CW GET.

WHO does come in ok all day in the Chicago area..........good signal. Since
you are also in the Chicago area, try for WLW, 700kHz; 1520, for some
station in southeast Missouri..........I haven't IDed it yet; 524kHz, the
Iowa City aero beacon; WKAR, 870kHz, East Lansing Michigan; and finally,
WOWO, 1190, Ft. Wayne, Indiana.
These are pretty easy to receive, except maybe the 524kHz station.

I notice that looking through the letters, that most of the CW decodes
into blocks of 5 characters. A numbers equivalent station perhaps?
(Apparently Cuban, see below.)

Unfortunately, attempts to copy the text results in the entire text being
compressed without the spaces. The transmission just ended at 0439, with
the following characters:
AR AR AR SKSKSK (these are spaced normally, as they are viewed in CW Get)

Soliloquy. See below, I found the following.

From http://www.dxing.com/intrg012.htm

MAY LOGGINGS in kHz order with comments and UTC date/time
13375 Cuban cut numbers. Went down with AR AR AR SK SK SK 15/1837

13420 Cuban cut numbers in CW. Down with AR AR AR SK SK SK 17/1936

Also mentioned on http://www.cvni.net/radio/nsnl/nsnl49ms.html Search for
ar ar sk sk on that page.

Also http://www.spynumbers.com/enigma.html

Greetings all:

Radio Nacional de Angola heard on 4950 at 2204 GMT 2/25 with talk in PT, telephone interview and positive station ID at 2207. ID almost sounded Brazilian-style (shouting and pop music). A little bit of piano music afterwards. Fair signal but some deep fades.

Radio Brasil Central heard on 4985 2/25 at 2047 GMT with fair signal. Lotsa Brazilian music, echo station ID and many commercials, many for beer. Many mentions of their "onda tropical" frequency in IDs at 2100.

Radio Southern Highlands (Papua New Guinea) on 3275 heard on 2/26 at 1155 GMT with C&W music (of all things!). Horriby tinny modulation on this particular song (may have been a bad recording) and time check at 1159. On at 1210 GMT past normal sign off of 1200. As far as I can tell, the sign-off times vary according to the whims of the staff.

Radio Mauritania 4845 with fair signal at 1859 on 2/27 with FR/AR IDs and Arabic style wailing as well as African drumbeats.

Radio Myanmar 5040 at 1040 GMT 2/26 with female announcer and pop music. Has a version of "Swingin' Safari" by Billy Vaughn that they use as intro music to certain parts of the program. Positive ID at 1100. Some utility QRM.

AND FINALLY....

Bhutan Broadcasting Service on 6035 with good signal, but severe and horrible QRM from adjacents. Low modulation on the voice made this very hard to ID. Several mentions of Thimpu and EZL music in English. Positive station ID by female announcer at 1130 and then carrier stayed on, but programming went away. They are scheduled to stay on, so dunno what happened. Hope for a nice QSL out of this one!

Al

BUSH SHOWS TRUE COLORS
THE RED AND THE PINK
http://www.etherzone.com/2005/stang022505.shtml
By: Alan Stang

How dumb is the Republicrud Party? We are about to find out. Long before the election of 2000, I warned that the only difference between Bush and Clinton was the latter's propensity to drop his pants and ask for sex, which the media used to divert attention from his treason with Red China.

I was wrong. Except for China, you can make a strong case that President Smirk is a lot worse than President Scumbag, and typically the same Communist media that protected one is protecting the other, while zombie Republicruds mindlessly scramble to explain him. Let's go down the list.

How does a homosexual prostitute pretending to be a reporter worm his way into the White House Press Corps using an alias and stay there, lobbing softball questions at the President, for two years? Needless to say, Republicrud zombies and their media front men (Limbaugh, Hannity, etc.) are mystified.

The chronology tells us that the buggeree got into the White House soon after Nine Eleven when the District of Criminals became a city under siege. Is it reasonable to speculate that, in such an atmosphere, access to the President could be so easy and his security could be so incompetent? Is it possible that nobody knew? Or is it more likely that President Smirk and his people knew and saw nothing wrong?

Remember that Smirk is a flaming homosexualist (someone who may be "normal" yet advances the perversion). We see that in the recently released conversation surreptitiously recorded by Smirk's former friend. We saw it the day after the recent election, when the biologically female "husband" of Vice President Smirk's dildo daughter appeared on stage as a member of the immediate family.

People who keep score tell us that when it comes to appointing sodomites to top jobs, Smirk makes even Scumbag look like a "gay basher," which gives a meaning we didn't expect to "bring them on." The sodomite media now taste blood. They are looking for other closet sodomites to "out," a reminder of the reason security experts always consider the perversion a disqualifying risk.

Of course, something similar happened in St. Ronald's Republicrud White House, including credit card charges for sodomy rendered, except that there was no sodomizer posing as a reporter. And remember that the

Communists are using organized sodomy as a weapon to destroy the moral foundations of the nation.

Word now arrives that Smirk is negotiating with the monsters we are fighting in Iraq—the monsters who have killed 1,400 of our men. The theory is that the monsters are killing them because we have wrecked the economy, so terrorism is the only work they can find, financed with the billions left over by Saddam.

So, what's to negotiate? If you haven't heard this yet, you will think you are insane when you do, but Smirk is apparently proposing to pay the monsters to stop the killing, kidnapping and beheading. Everyone else is on the federal payroll. Why not the terrorists in Iraq? Would they also get government health care and No Child Left Unbrainwashed for their kids? If so, we would still save money on the war.

This probably means that Himmler and Dr. Mengele were born too soon, but there is recent precedent for President Smirk's revolutionary proposal. Remember that a couple of Soviet KGB generals have been working for Homeland Security and now they will be joined by Communist Marcus Wolfe, former head of the East German secret police, who no doubt will help perfect the new national identity card. Your papers please!

That identity card (a.k.a. driver license) will do nothing to fight terrorism — its alleged rationale. It continues the process of merging us with Canada and Mexico, on the way to world government, and certainly does nothing about Smirk's pals in the Soviet Union and Red China, the world's biggest sponsors of terrorism.

When Smirk took office, he proclaimed in almost as many words that there would be no more semen or intern knee prints on the Oval Office carpet. But now the former President Bush has linked the family name to the man his son was elected to reject. George New Vorld Order Bush (41) and Bill On Your Knees and Inhale My Cigar Clinton are an item.

They travel together, looking for tsunami victims to restore. Bush (41) even says he and Clinton have been friends a long time. What is happening? Is the Conspiracy for World Government thereby signaling that it has chosen Senator Hillaroid, the nation's leading cause of lower back pain, to be our next President?

Notice also that the Communist media, left and right, from Limbaugh to the Communist Broadcasting System, are presently talking about how bad the UN is. But they love the UN. It is as Communist as they are. Until now it could do no wrong. Yet, now they tell us every day about the oil for food scandal, about teenage girls used as UN sex slaves, about the maladministration of Kofi Annan, etc.

But isn't former President Scumbag doing all kinds of humanitarian things under the imprimatur of the UN? Why not pay Kofi off and send Scumbag to the rescue? As President of the world, he could nail as many nubile exotic females as a man with a bypass can catch. And Hillaroid would be President

of the former United States.

Is that the plan? As always, my answer will be brief, direct and completely comprehensible. I don't know. But if it makes no sense at all, why is the hair on the back of your neck standing up? Put your hand back there ma'am, and you will see I am right. We do know that Bush (41) is going out of his way to underline the connection. Need I add that Republicrud zombies are mystified?

Speaking of Clinton and Iraq, remember that candidate Smirk expressed displeasure about his predecessor's "nation building," and gave us to understand he would stop it. Many Americans were ecstatic, because the U.S. government should not build any nation, including our own. Now Smirk wants even more money to build Iraq.

In the "read my lips" department is President Smirk's suggestion that the present $90,000 cap on Social Security taxes be raised. Wouldn't this amount to the tax increase Smirk said he would reject? Remember that Smirk's father lost reelection for raising taxes after telling us he would not. "Read my lips." But of course Smirk no longer needs to worry about being reelected.

Since mass murderer Franklin Roosevelt, the Democrud Party has more and more become the party of big government. Clinton certainly was an advocate of that. President Smirk continues to smirk about Free Enterprise, about the new "Ownership Society," but he makes all preceding Democrud Presidents, including Clinton and even Johnson, look like Ebenezer Scrooge.

I could insert a few yards of statistical compost here to prove the point, but that would be redundant. You already know the numbers as well as I do. Under Smirk the budget has lost all meaning and could serve a real purpose only when you run out of Charmin. The dollar is collapsing.

Indeed, financial analyst Jim Turk's new book is entitled The Coming Collapse of the Dollar. To get it call the American Opinion Bookstore of North Hollywood, 1 (800) 470-8783. What happens when the nations that presently buy U.S. paper decide to get off? They are now using it to buy our country out from under us. Soon the "dollar" no longer will be the world's reserve currency.

Please name for me some area of life where the federal government under President Smirk does not intrude, and ask yourself whether a Democrud could have arranged this. Could Clinton have gotten away with it? No. Smirk has because he is a Republicrud and routinely mouths his enthusiasm for so-called Republicrud ideas. You are seeing the classic implementation of Marxist dialectical materialism, in which we are being whipsawed between two legs on the same bug.

Question: If a President were trying to bring us to our knees, what would he do? Yes, I know such a thought is unthinkable, intolerable and impossible. Think it however, just for a moment. Remain impassive so no one present knows what you are doing. If a U.S. President's real agenda

were to destroy this country, what would he do?

Obviously, he would have to do so with subterfuge. He could not announce his purpose. He would need to talk about Free Enterprise, about the Bible, about morality, about patriotism, about extending freedom around the world. That's what he would say. Wouldn't he do exactly what President Smirk is doing now?

Is there some point at which zombie Republicruds will awaken, some intolerable imposition that finally will remove the scales from their eyes and prove that Emperor Smirk is wearing a red dress? I doubt it, because they have made Smirk worship a religion. St. Smirk soon will occupy a hallowed position beside St. Ronald in the Republicrud pantheon.

Isn't it inspiring, Pilgrim? That means the fate of the nation is up to you.

Some of those images could be lower-power rebroadcasting transmitters in
nearby cities, couldn't they?

Only issue I had on MW with an S-350 when I had one was drift, mostly from
the dial-string tuning mechanism. I got a scrap bcl-2000 sitting around,
got to try to modify it to use a geared mechanism on of these days.

5453. Loop Antenna Questions : Paired ? -or- A Pair ?

Newsgroup: rec.radio.shortwave
Date: 2005-02-28 11:11:01 UTC
From: RHF <rhf-newsgroups@pacbell.net>
Message-ID: <1109589061.661604.212360@g14g2000cwa.googlegroups.com>
Source record: 9503

JIM,
.
SIDE-BY-SIDE PAIR OF LOOP ANTENNAS AM/MW & SHORTWAVE :
You might try Making the Width (Spreader Arms) Wider and have an
Inch or Two separation between the two Loops. Try Three to Five
Turns as a Starting Point for the Shortwave Loop Antenna.
.
CONCENTRIC PAIR (Big-&-Small) LOOP ANTENNAS AM/MW & SHORTWAVE :
Instead of a Pair of Side-by-Side Loops. Consider having your
'smaller' Shortwave Loop Antenna inside the Larger AM/MW Broadcast
Band Loop Antenna. If your AM/MW Loop is 18" on a Side then try
making the Shortwave Loop between 13" to 15" on a Side and try
Three to Five Turns as a Starting-Point.
.
BY-THE-NUMBERS : Loop Antenna Calculators
http://www.ourhousenews.com/loopAnt.php4
http://www.mindspring.com/~loop_antenna/amloop_calc4.htm
.
.
THE BETTER SHORTWAVE LOOP ANTENNA IDEA :
The better idea may be to make a separate Shortwave Loop Antenna
using Coax Cable. A Single Turn Shielded Loop Antenna can work
very well as an In-Door Low Noise Shortwave Antenna where an
Out-Side Antenna is not allowed or where there is a high local
RFI / EMF Noise Environment.
NOTE - Use your MW Loop Antenna by itself for the AM/BCB Band.
.
The "GreerTech" Coax Cable [Shielded] Loop
Antenna is good and very practical.

There is a possibility that it is 10 kW vs. 100 kW. However, it is unclear whether that 10 kW transmitter is still in service. They do apparently have a newer 100 kW transmitter which was installed in 1996.

Subject: Release Date
.
Hi all: This is the latest from Eton.
I asked when we could expect a release for this radio.
Here's the complete reply:
.
"Dear Boyd,
.
In my last communications,
I used the time line as end of first quarter.
So, we are still planning it that way.
May be plus minus few days.
.
Best regards
Arvind"
.
So, I guess there's no new news.
Good listening: theboyd

LMAO at the 'tard!

> So.... where's the link to all this new information?

No links to the information will be provided by myself to the 'tard boys.

Suffice it to say that I've read it online via several sources, and I took it upon myself to contact two of the amateurs who were involved in assisting the FCC in tracking down Yosemite Sam.

I'm fairly certain that at some point the FCC will release some information regarding their enforcement action. It is in their hands now.

You can believe that or not, but Yosemite Sam was indeed busted on February 16 around 1800 MST, 0100 February 17.

You have yourself a nice day, 'tard.

STEVE,
.
That is a very good suggestion, to use the Bamboo Pole
to extend the Wire Antenna Element beyond the Building's
RFI / EMF Envelop and let it 'hang down' from "Out-There".
.
.
PINOT,
.
1. Mount the Matching Transformer on the Far-End
(Out-Side) of the Bamboo Pole.
.
2. Use a Coax Cable from the Radio out to the Matching Transformer.
.
3. Use a Wire Antenna Element that Drops Down 23 Feet to 35 Feet.
.

Why am I not surprised?
Perhaps you just made it all up,
since you haven't had a good reason to show your ass lately.
Maybe you were probably suffering from "Acting Like a Jerk"
withdrawal and just cooked-up this story to have an excuse
to be a rude prick again.

You know, they have medicine that will help you with that...

Lloyd,

I don't mean to be rude (believe it or not! ;-)) but if you'd do a cut and past of the previous message (or set up you mailer to automatically quote the previous message) we'd get a better idea as to who you are referring to here. You can always delete the unwanted part after getting it into your mail editor.

If your message was intended for me because I posted "I doubt ANY of Gene's air time will be given up in the immediate future. Neither do I expect ANY of R.G. Stair's time to be immediately surrendered upon his passing over to the other side! :-) ," you must have misread it. I do not WISH anyone dead, even some of the smart alecks on r.r.s., BUT it is a reality - we ALL ARE GOING TO DIE. It's an appointment you nor I can avoid even if we wished or attempted to avoid it.

I mentioned Stair because someone else had mentioned both Gene and R.G. having a lot of air time -- and it possibly being "freed up" at their passings.

Schmucks is right.....the devoted following seems to have lost sight of one of the well-known stories we all learned in Sunday School - of Jesus overturning the tables of the money changers on the steps of the Temple - overcharging for the animals used for sacrifice and the changing of monies to local currency - all at usurious rates. God is FREE. One cannot buy their way into heaven nor into the graces of God and we ride in no human's coattails. A good leader is to be sought but not at the price of one's finances and emotional wellbeing

It is good to hear a useful message every week and useful to learn of historical, earlier versions of the text as indeed many words got changed during the process of translating Aramaic to whatever and in turn to modern languages. Sometimes intentional but usually not, anymore than I when I translate English into Spanish or vice-versa I surely don't intend to mis-translate a word but one must account for colloquialisms and it happens to the best of us. Scott and some other preachers make those errors in translation sinister but those those old timers were no different thanb scholars of today and I'm sure most were human error.

However, I would be very surprised if more than 1/8th of the audience truly had a clue about his scribblings. I am no idiot and I was clueless most of the time. It's just like the fairy tale the "Emporer's New Clothes": I am sure 80% of the audience didn't want the rest of the audience to know it was all a muddle to them.

I haven't made up my mind as to whether Scott actually believed his captive audience really understood since they were browbeaten into yelling "Yes Sir!" and it stroked his inflated ego or he did know it was going over their heads and it was merely a chance to display his "book larnin'" as a a fellow who knew all this stuff and had nowhere to put it where it might do some good. Surely he would not give up his own personal goldmine to lecture at some University on a professor's pay!

P.S. RF - glad you liked my diatribe but if you saw me you would say, "That woman doesn't need fine Scotch, what that woman needs is a good, homemade, 2-layer German Chocolate cake!" :o)

How come nobody else on this group has found your "several sources" that
you claim reported it?

> I'm fairly certain that at some point the FCC will release some information
> regarding their enforcement action. It is in their hands now.

If they did, would you link to the notice of apparent liability? Or
would you tell us tard boys to find it ourselves?

> You can believe that or not, but Yosemite Sam was indeed busted on February 16
> around 1800 MST, 0100 February 17.

Prove it. Post links to the sources that reported the bust. Or should we
just conclude that you're making the whole thing up?

5492. Saudi Arabia NOT heard last night

Newsgroup: rec.radio.shortwave
Date: 2005-02-28 18:59:15 UTC
From: running dogg <run@ning.dog>
Message-ID: <42236aab$1_1@127.0.0.1>
Source record: 9541

It used to be that I could hear morning prayers from Saudi Arabia on 15170 starting around 0300-Passport says it's a three hour broadcast, but it usually fades out around 0430-0500 as the sun rises over Saudi Arabia. So I tried it last night, and there was nothing. I tried SSB, and there was no hint of a signal. I used to listen to this station every so often for a while after 9-11, but I hadn't tuned in in about a year to a year and a half. It would be weak but readable, but conditions have been so terrible lately that I'm not surprised that I can't hear it. What a winter-I've barely been able to hear the BBC, much less anything not beamed my direction.

Does anybody have times and frequencies for Radio Sawa and Radio Farda
on shortwave? I used to listen in on 9805 after 0300 to Sawa (beamed
from Morocco to Iraq) but Passport says they're not on then anymore.

Oh can we stop with the conspiracy theories already?

http://www.dxing.com/dxr.htm

UNIDENTIFIED. YOSEMITE SAM --- Glenn, I still have to wait until the
FCC completes their investigation, but I can tell you that Yosemite
Sam's transmissions did originate west of Albuquerque. There were more
than one group of Amateur Radio Operators hunting. The information
about where to start the hunt was provided by the FCC HF DF remote
stations to the ARRL NM Official Observers and NM Section Manager.
Both Amateur Radio DF hunt teams converged on Yosemite. One group had
made contact and the transmitter was turned off. At this time, the FCC
Enforcement Division has all of the information. I was part of the
team that had made contact with Yosemite Sam, but I was not the team
member who physically made contact (WA5WHN, Jay Miller, NM, Feb 21, DX
LISTENING DIGEST)

Apparently a bunch of hams tracked the signal down and made contact with the
guy who was running it. That's all the info I can find so far. Keep
watching the ARRL and FCC websites to see if they post an enforcement
letter.

Fall guy? You must be joking. If it really were a government operation,
they wouldn't give a rat's ass about what the SWL community thought about
it.

bubelah, one has to wonder re doc's scribblings and use of dead languages (as in his Romans series). My tendency is that doc did know it was going over people's heads partly because doc has pretty much the only arcane reference books in his museum and he has admitted, more than once, that he taught himself the dead languages.

Where else is someone to go to check him out?

What about your supporters on the group (non tards, I assume)? Don't
they have a right to know too? Why are you withholding information from
them just to get back at the tards? Does anything you say/do make any
sense to anybody but you? Why do you post "LMAO at the tard" more often
than you post substantive radio information? Why are you responding to
everybody's posts immediately? Don't you have better things to do, like
maybe a job? Even myself, who is currently unemployed, doesn't stay on
usenet all day.

Well, fortunately for you he assisted someone who doesn't have all theirs.

That be YOU 'tard boy, in case you can't figure that out.

Still sitting here having a good laugh.

Thanks. It's about time that we had substantive info other than dxAce's
"various reports" shtick.

I guess the thing that really surprises me about Y.S.
is that (apparently) someone thought they could
carry on a long-term operation like this and escape being caught.
That's the biggest thing that lead me to believe this
might be an exercise of some kind by Uncle;
I didn't think anyone could be that foolish.
And what he was doing couldn't have been cheap;
it's not like an old CB and tape recorder could
have pulled this off.
Of course, I'm just speculating;
we'll have to wait for all the facts,
but I freely admit to being surprised by this turn.
Dave S.

YS made his mistake by operating on 3700 as I pointed out before. That really set things in motion for his demise. If not for that, he may have been a fixture for some time, with a bit of prudence.

Lots of things are obviously surprises for you.

Operating on the same frequencies as WWV and in a ham band were pretty bold moves. Even if YS hadn't done those things, the prominence of the signal (it was pretty strong on 3700-the freq in the ham band-in the morning here in California) would have meant that hams all over the US would be trying to track him down. Coordinating the signals like that took some doing; I'm assuming that this isn't your garden variety Hard Harry type pirate. All the signs pointed to it being a government operation. I'm quite surprised that it has turned out to be a pirate. There was quite a bit of time and I assume money invested by this person in YS, why he did it nobody can say at this time. Remember KIPM, the pirate who operated with a gazillion watts and never seemed to get caught? Alan Maxwell put a lot of effort into his operation as well, but at least he had something to say. YS just seems to have been done for kicks.

Yeah, that's the thing. He screwed up by operating on 3700. Granted, the operations on the WWV frequencies might generate a bit of interest, but there have been various operators (the majority I assume to be outside the USA) operating on the WWV freqs over the years.

The biggest mistake I can see with YS is that he operated on 3700 and then the ARRL Intruder Watch got involved.

Myself and various other monitors resolved the location down to the desert SW of the USA in December. I think, unbeknownst to us at the time, that the Intruder Watch in conjunction with the FCC was already working on the situation.

I am proud of the fact that I was able to resolve the location down to the general area at the time using simple antennas and communicating with various other monitors around the USA.

My general feeling at the time was that it was in extreme Western Texas, Northern New Mexico, or possibly Southern Colorado.

That was based upon other monitoring reports, and my own observations here of fade in fade out times while observing the grey line.

It was fun.

That's my story, and I'm sticking with it!

7415 is where I believe I heard the fellow from NY (Seems it was Brooklyn instead of NYC) on Monday night at 8:00 pm est, 01:00 UTC Tue. AM.

He says he's a Jew. He has a foul mouth, per some people's perspectives. Says he pays -- GET THIS -- $4000 Taxes on his house, AND THAT IS FOR ONLY SIX MONTHS - and he says, "It doesn't even have a basement."

BUT he makes a lot of sense on a lot of things. Don't recall his name, but he calls his program THE RIGHT PERSPECTIVE.

Might be worth hearing if you can put up with the language.

I think I also heard him on Friday (?) night on WWCR 5070 in Jackie Patru's time slot - except she never had Fridays.

I'm getting 7415 now but not too clearly. I blame local "noise" and an insufficient antenna on my end for that - at least for the radio beside me now.

Where are you located? I've head quite good BBC to americas, BBC to Africa, Australia to pacific, Japan, China and a few others for the past 10 days or so. I'm at 53N 102W, in Saskatchewan. Listening with an R75 and 100m (~110 yds) of wire. Most of this listening is around 0400 and then again round about 1200 UTC. (evening and morning here locally)

911, WMD (actually, we use this most often, Weapon of Mass Deception),
"Operation Iraqi Freedom", "coalition of the willing", Democracy in the
U.S., free elections, etc.

Visit the following link, for an unbiased dissertation on Propaganda, the
word. Anyone that believes that the U.S. is not actively involved in
propaganda, I have some prime seaside land for sale on mars. It's quite
juvenile to assert that the U.S. is somehow as pure as the wind driven
snow concerning propaganda. Please visit the link and see how propaganda
has shaped history over the ages. Plenty of pictures for those of you
that are alphanumerically challenged.

Dr. Artaud

http://en.wikipedia.org/wiki/Propaganda
"Propaganda is a specific type of message presentation aimed at serving
an agenda. At its root, the denotation of propaganda is 'to propagate
(actively spread) a philosophy or point of view'. The most common use of
the term (historically) is in political contexts; in particular to refer
to certain efforts sponsored by governments or political groups.

The aim of propaganda is to actively influence people's opinions, rather
than to merely communicate the facts about something. For example,
propaganda might be used to garner either support or disapproval of a
certain position, rather than to simply present the position. What
separates propaganda from "normal" communication is in the subtle, often
insidious, ways that the message attempts to shape opinion. For example,
propaganda is often presented in a way that attempts to deliberately
evoke a strong emotion, especially by suggesting non-logical (or non-
intuitive) relationships between concepts.

An appeal to one's emotions is, perhaps, more obvious a propaganda method
than utilized by some other less overt and perhaps even more insidious
forms. For instance, propaganda may be transmitted implicitly. Propaganda
can be transmitted as the presupposition or presuppositions within an
ostensibly fair and balanced debate or argument. This can be done to
great effect in conjunction with a broadcast news format. Here is an
example of a hypothetical situation in which the opposing view points are

supposedly represented: the hawk (see: hawkish) says, "we must stay the course", and the dove says, "The war is a disaster and a failure", to which the hawk responds, "In war things seldom go smoothly and we must not let set backs affect our determination", the dove retorts, "setbacks are setbacks, but, failures are failures." As one can see, the actual validity of the war is not discussed and is never in contention. In giving the appearance of representing opposing positions and view points, a debate (of what is really aspects of the actual, genuine, argument worthy issue) in which the debaters argue from the same basic assumptions, implicitly inculcates the presupposition(s) as sacrosanct truth, thus, establishing it as an accepted fact about the given issue for ignorant observers.

The method of propaganda is essential to the word's meaning as well. A message does not have to be untrue to qualify as propaganda. In fact, the message in modern propaganda is often not blatantly untrue. But even if the message conveys only "true" information, it will generally contain partisan bias and fail to paint a complete and balanced picture. Another common characteristic of propaganda is volume (in the sense of a large amount). For example, a propagandist may seek to influence opinion by attempting to get a message heard in as many places as possible, and as often as possible. The intention of this approach is to a) reinforce an idea through repetition, and b) drown-out or exclude any alternative ideas.

In English, the word "propaganda" usually carries strong negative (as well as political) connotations. This is not necessarily so in other languages, and usage of the term may lead to misunderstanding in communications with non-native English speakers. For example, in Brazil and some Spanish language speaking countries, particularly in the Southern Cone, the word "propaganda" usually means the most common manipulation of information"advertising.""

i was watching this with much amusement and a great time was being had
by all..... and then pow-zow someone pulls out the "portable" card!
what the hell kind of crack is that? i mean "tard boy" and "ace hole"
are pretty specific (and hilarious) targeted insults but that "portable"
thing is pretty broad-banded! what are you some kind of radio bigot?
just because my radio is light am i a second class swl? well guess what!
i have a dream! i dream of a day when a man is judged by the content of
his loggings and not by the price of his rig! now everybody play nice
before someone gets an eye poked out! damn, cant we all just get along?

Go back and read the post, 'tard. I never mentioned 'portable' in the post you responded to.

Are you 'second class'? I don't know. But I do know that you are obviously a 'tard without a dog in this fight.

Go tote it.

i like the idea of the smaller loop inside the larger one. the frame is for an edge winding like a box loop. i could do a spiral winding for the sw loop inside, then the nulls would be at 90 degree angles to help avoid interaction. my purpose is to have both sw and bcb available on the same antenna lead because my radio uses the same ant input jack for both sw and bcb antennas. i want one portable package that eliminates the need to change plugs to go from sw to bcb. i can mount a switch to drop the variable across the winding i need and save wear and tear on my plugs. thanks for your thoughts!
